UBAM - 30 Global Leaders Equity, a sub-fund of UBAM

Class: IHD EUR (Distribution) LU0877610450

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow your capital and generate income by investing primarily in worldwide -including Emerging countries- equities or equivalent.

The Fund is actively managed, invested around 30 positions and focused on large market capitalization and leading companies in their particular business fields, which are expected to provide growth and leading (i.e. sustainably high quality) levels of Cash Flow Return on Investment (CFROI® Credit Suisse HOLT).

The Fund is long-term oriented with little need for turnover.

The Environmental, Social and Governance (ESG) approach is embedded in the investment process of the Fund and the selection of stocks includes ESG considerations which can be an important driver for risks associated with an investment and for maintaining or improving CFROI® of a company. The qualitative sustainable analysis is partly based on inputs provided by MSCI ESG Research and on the Investment Manager's own analysis.

The Fund is managed for an ESG quality score superior to that of the MSCI AC World Net Return Index ("the Benchmark"), at all times. The Fund also promotes a lower carbon footprint than its investment universe.

The Investment Manager performs a negative screening and a norms-based screening to filter the investment universe. ESG related information is entering the proprietary Discounted Cash Flow models of companies. The portfolio construction will consider the overall ESG score as well as the contribution to risk that arises from ESG exposures.

ESG considerations may include carbon footprint as well as the Paris Agreement goals, human rights and global norms compliance, social and corporate governance standards.

The ESG analysis covers 100% of the Fund's portfolio.

A performance fee in reference to the Benchmark is applied to some share classes. The Benchmark is representative of the investment universe and not representative of the risk profile of the Fund. The performance of the Fund is likely to be significantly different from that of the Benchmark because the Investment Manager has significant discretion to deviate from its securities and weighting. The Benchmark is not aligned with the environmental and/or social characteristics promoted by the Fund.

The Fund's value is calculated and expressed in US Dollars. The currency risk between the currencies of the sub-fund's underlyings and the share's currency is mainly hedged.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg.

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>. The recommended holding period is minimum five years.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is distributed (distribution share class).

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk category 6 reflects a very high potential gain and/or loss in the value of the portfolio.

This is due to investments in equities on worldwide markets.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

ESG and Sustainability risk: it may result in a material negative impact on the value of an investment and performance of the Fund. Assessment of sustainability risks is complex and requires subjective judgments, which may be based on data which is difficult to obtain and/or incomplete, estimated, out of date or otherwise materially inaccurate. All or part of said data may come/originate from third parties.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	3.00%
