#### INFORMATION ON THE MAIN REPRESENTATIVE OFFICES ABROAD

The information documents concerning the SICAV, including the articles of incorporation, the prospectus and the Key Information Documents (KIDs), the annual reports including audited financial statements and semi-annual unaudited reports and the statement of changes in investments for the year referring to this report are available free of charge at the registered office of the SICAV, 287-289 route d'Arlon, L-1150 Luxembourg and at the office of the following financial intermediaries:

#### Organisation and administration

#### - General distributor, representative and paying agent in Switzerland

Union Bancaire Privée, UBP SA, 96-98, rue du Rhône, P.O. Box 1320, 1211 Geneva 1, Switzerland Tel: + 41 (0) 58 819 21 11

Payment services, execution place and jurisdiction place are established, for the shares offered in Switzerland, at the place here-above mentioned

Supplementary information concerning the offering of the different types and classes of shares of the SICAV in Switzerland are specified in the prospectus and the Key Information Documents (KIDs).

The Articles of Incorporation, the prospectus, the KIDs (for Switzerland) and the annual and half-yearly reports can be obtained free of charge at the representative's premises in Switzerland.

Information in Switzerland concerning the SICAV are published on the electronic platform Swiss Fund Data (www.swissfunddata.ch). The subscription and redemption prices of the shares of the different sub-funds are published daily on the said electronic platform at the time of each issue and redemption.

Investors liable to a tax in Switzerland are hereby informed that transactions made in the SICAV's shares may be subject to a different tax treatment depending on the canton in which the investor is taxed. Potential investors in the SICAV's shares must nevertheless inquire about the legislation and rules applicable to the acquisition, holding, selling and redemption of shares, in the light of their place of residence.

Additional information for Swiss investors regarding the payment of retrocessions and rebates in accordance with the Code of Conduct of 5 August and 23 September 2021 of the Asset Management Association Switzerland (AMAS) - (marginal numbers 127 to 141):

The SICAV and its agents may pay retrocession to finance the distribution and marketing activities of the shares in the Fund in Switzerland. In addition, the SICAV and its agents may directly pay rebates to investors, upon request, within the framework of the distribution in Switzerland. The purpose of these rebates is to reduce the investment-related costs borne by the investors (e.g. management fee). Rebates are permitted upon certain conditions. Investors are kindly requested to read the Fund's latest prospectus for more information regarding the payment of retrocessions and rebates (annex "Information for Swiss investors" of the prospectus).

#### Report of the Board of Directors

#### MANAGEMENT REPORT

#### 1. REVIEW OF THE MARKETS

#### Robust economic activity and inflation more persistent than expected

The world economy grew by an estimated 2.8% in 2023, and so was more resilient and buoyant than expected, particularly given the very rapid monetary tightening carried out by central banks in their fight against inflation.

In the United States, growth was 2.5%, far outpacing that of other developed countries. However, US domestic activity was volatile: weak in the second quarter but stronger in the second half of the year. Consumer spending and certain investment-driven sectors continued to show good momentum, helping to avoid a recession. Strong job creation, rising wages and lower energy prices underpinned household demand, particularly for services. The IRA and the CHIPS Act provided strong support for investment, partly via companies reshoring activities to the US.

Relations between China and the US remained tense, with new restrictions on bilateral trade introduced in strategic sectors such as electronic components. China's reopening at the start of the year brought major hopes for growth, both in Asia and worldwide. However, bankruptcies in China's real-estate sector dragged down consumer spending and investment. This forced the authorities to provide targeted support to certain participants in the real-estate sector and adopt measures to stimulate consumer spending. Growth stabilised at the end of the year, but confidence in the manufacturing sector remained depressed. Meanwhile, India's output was boosted by production being relocated there from China, and by high levels of infrastructure investment.

The eurozone economy stagnated for several quarters. On the plus side, rapid declines in oil and gas prices, despite the ongoing conflict in Ukraine, provided some welcome support to economic activity. The jobs market remained firm and, together with government aid to help households cope with the initial surge in energy prices, this supported consumer demand for services. However, demand for manufactured goods was much weaker. Manufacturing activity saw large swings, particularly in the automotive sector, due to supply-chain problems. There were also wide variations between countries, with Germany flirting with recession while Spain achieved average growth of more than 2%.

Inflation slowed sharply in 2023, although at different rates in different countries, and there were often large discrepancies between overall and core inflation. Lower energy prices were good news for inflation, which fell to 3% in the US at the end of the year, around 2.5% in the eurozone and below 4% in the UK. Inflation in industrial goods prices also fell as supply chains returned to normal and commodity prices moderated. However, inflation remained high in services because wages continued to see upward pressure in some sectors while demand remained firm.

One key feature of 2023 was the resilience of the jobs market in developed countries. Although unemployment rates rose slightly in the second half, job creation remained strong. US wage growth started to slow mid-year. In Europe, after a lag, wages followed the rise in prices and several sectors were still experiencing rapid wage growth at the end of the year.

To combat inflation, central banks tightened their monetary policies sharply, taking them into restrictive territory. The Fed raised rates from 4.50% to 5.50%, the ECB from 2% to 4%, the Bank of England from 3.5% to 5.25% and the SNB from 1% to 1.75%. At the same time, some central banks reduced the size of their balance sheets by no longer reinvesting coupons received on their bond holdings. China and Japan were the exceptions. The Bank of China injected liquidity on numerous occasions and cut both its official interest rates and the reserve requirement ratio for banks in order to stabilise the real-estate sector and support consumer spending. The Bank of Japan maintained its accommodative monetary policy but loosened its grip over long bond yields during the year, allowing the 10-year yield to rise towards 1%.

The first quarter of the year brought a banking crisis in the US and the disappearance of Credit Suisse. Several US regional banks had to close during the spring. First, Silicon Valley Bank and Silvergate Bank, both heavily exposed to the tech sector and cryptocurrencies, were caught up in a wave of panic and saw large-scale withdrawals in early March. As a result, these banks were forced to sell their bond holdings, which had fallen in value because of the rise in interest rates. The crisis then spread to Signature Bank and First Republic, which were the subject of fire sales to New York Community Bank and JPMorgan Chase respectively. The Fed and the Treasury Department took extraordinary measures to guarantee the deposits of these failed banks and put in place emergency loans to provide liquidity to US financial institutions. The crisis clearly accelerated the loss of confidence in Credit Suisse, which in the end suffered a bank run and was no longer able to refinance its liabilities by itself. In the space of a weekend, the Swiss authorities were forced to take action and announce Credit Suisse's takeover by UBS, which received extensive government guarantees, in order to restore confidence in global markets. Despite the systemic risks related to this crisis, central banks did not waver from their commitment to raising rates.

#### Very large movements in interest rates

From February, economic data showed stronger-than-expected economic output and inflation in both the US and Europe, and this gave rise to very rapid increases in both short- and long-term interest rates. After yields saw a near-record decline during the banking crisis in March, they quickly reverted to their upward trend, which stayed in place until mid-October. Higher yields were driven mainly by the prospect of central-bank official rates remaining high because of persistent inflation and the fading risk of recession in the US. Growing public-sector deficits in the US, Fitch's move to downgrade its credit rating on US sovereign debt and the expected change in Japanese monetary policy also played a part. US 10-year yields briefly rose above 5% in October for the first time since 2007, having started the year at 3.9%. Then, lower-than-expected inflation figures and the cooling US labour market led to renewed expectations of a pivot by the US Federal Reserve. This caused yields to fall again during the last two months of the year, taking the long end of the curve very close to early-2023 levels in the US and UK, and even lower in the eurozone. As a result, having spent most of 2023 in negative territory, returns from sovereign bonds turned positive at the very end of the year. US government debt returned 3.9% in 2023 as a whole. Returns were similar in the UK (+3.6%) but higher in the eurozone (+6.7%) and even more so in Switzerland (+12.2%).

### Report of the Board of Directors

Credit spreads widened sharply during the banking crisis, but gradually tightened again over the following months. As a result, high-yield paper (+13.4% in dollars and +12.0% in euros) and the external debt of emerging-market countries (+11.1%) posted double-digit returns over the year as a whole. Investment-grade corporate bonds returned around 8%.

#### Sharp rises for the Swiss franc and gold

Volatility in the forex market remained relatively low. The Swiss franc was one of the strongest currencies in 2023, rising 10% against the dollar and 7% against the euro. In its December meeting, the SNB sent a message that the franc had risen enough, taking into account its inflation target. Against a basket of other major currencies, the dollar ended the year almost unchanged.

It rose sharply between mid-July and end-October because of the US economy's resilience, before losing ground at the end of the year due to the growing likelihood that official interest rates would be cut several times in 2024. In the end, the euro (+3%) and sterling (+5%) rose against the dollar in 2023, while the yen fell 7% as Japan's central bank maintained its ultra-loose monetary policy. In terms of emerging-market currencies, the Mexican peso (+15% against the dollar) and Brazilian real (+9%) were boosted by their high interest rates. In Europe, the Polish zloty (+8% against the euro) was particularly in demand.

Most commodity prices fell in 2023, with oil down 10% and natural gas in Europe down 58%. Despite the post-Covid recovery in China, base metals were down 5% on average in 2023, although the copper price rose 2%. The economic and geopolitical environment was clearly helpful for gold, which rose by 13% during the year and hit a new all-time high in December.

#### Equity markets: exceptional performance in some segments

After big losses in 2022, which caused investors to start 2023 in a very depressed mood, equity markets rallied strongly last year: the MSCI AC World index gained 21.6% in local-currency terms, net dividends reinvested. Markets did not rise in a straight line: there were corrections of around 7% during the banking crisis and 10% between August and October, mainly caused by the sharp rise in long bond yields and the eurozone's deteriorating economic outlook. The last two months of the year brought an impressive rally, due to growing hopes that the US economy would see a soft landing and that 2024 would see a number of official rate cuts. The artificial intelligence theme prompted much excitement among investors from spring onwards, and this clearly contributed to the exceptional performance of the "Magnificent Seven", which saw their share prices double on average during the year. They accounted for over half of the rise in the S&P 500, which delivered a net return of 26%. The Japanese market did even better, with the MSCI index posting a 28.6% gain, helped by the decline in the yen. In Europe, eurozone markets rose 18.8% on average, significantly outperforming the UK (+7.7%) and Switzerland (+5.3%). The Swiss market was held back by the mediocre performance of its bluechip stocks. A number of emerging markets delivered very strong gains. In Latin America, they included Mexico (+41% in dollars) and Brazil (+33%), and in Asia, Taiwan (+30%), South Korea (+23%) and India (+21%). However, with a decline of 11%, the Chinese market was one of the year's big losers.

To achieve outperformance, investors had to be exposed to the tech (+51.1% globally), communication services (+37.8%) and consumer discretionary (+29.1%) sectors; those same sectors had declined by around 30% in 2022. The utilities (-0.6%), consumer staples (+1.0%), healthcare (+2.6%) and energy (+3.7%) sectors brought up the rear, while the financial sector only slightly underperformed (+14.7%), helped by the good performance of European banks (+20%).

### 2024 OUTLOOK: moderate global growth

The world economy should see moderate growth of just under 3% in 2024. Disparities between developed and emerging-market countries are likely to remain significant, but the economic cycle is expected to become gradually more positive in G7 countries.

Among developed countries, the US is likely to see growth in excess of the OECD average. US growth is expected to slow due to the delayed impact of the monetary tightening that has taken place in the last two years. Nevertheless, it should rebound to around 2% by the end of 2024 as investment recovers and consumer spending stabilises. The European economy is likely to remain sluggish in the first half, particularly in Germany, but growth should also recover slowly in the second half. Japanese growth is likely to be moderate, supported by fiscal support measures.

Despite its real-estate crisis, China should see growth stabilise at around 4.5%. Steps taken in late 2023 to support the real-estate sector will eventually have a positive impact on growth. Among emerging-market countries, India and certain Latin American countries are likely to post relatively strong growth rates.

Inflation should continue to decline during 2024, moving close to central-bank targets in Europe and the US. The disinflation process was boosted in 2023 by the fall in energy prices and, at the end of the year, by lower prices of certain manufactured goods. That process should also become more pronounced in the service sector in the next few quarters, allowing both overall and core inflation to fall towards 2.5% in the US. In Europe, inflation could drop below 2% in the middle of the year, barring a further shock in energy prices. However, wages and service prices could remain volatile in Europe. In developed countries, tension in jobs markets is likely to fade and unemployment rates should rise gradually.

After numerous rate hikes in 2022 and 2023, monetary policies will be loosened in 2024, with rate cuts likely to start at the end of the second quarter in the US, followed by more widespread reductions in the second half. The contraction in central-bank balance sheets should continue in 2024, but central banks are expected to provide more details on this, and particularly on the optimal level of banks' surplus reserves.

Budget deficits will remain large in 2024, due in particular to heavy investments in strategic industrial sectors and those connected with climate transition. Overall, assuming moderate economic growth, deficits will remain close to their 2023 levels. Debt/GDP ratios should rise again in 2024 in most countries, pushing up debt servicing costs.

Geopolitical risks will remain high, with numerous elections scheduled for 2024, including the US presidential election. Armed conflicts begun in recent years could also have a major impact on the scenario.

To the Shareholders of UBAM 287-289 route d'Arlon L-1150 Luxembourg

#### REPORT OF THE REVISEUR D'ENTREPRISES AGREE

#### **Opinion**

We have audited the financial statements of UBAM (the "SICAV") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments and other net assets as at December 31, 2023 and the statement of operations and other changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the SICAV and of each of its sub-funds as at December 31, 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### **Basis for Opinion**

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (Law of July 23, 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the *réviseur d'entreprises agréé* for the Audit of the Financial Statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Deloitte.

#### Other information

The Board of Directors of the SICAV is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

### Responsibilities of the Board of Directors of the SICAV for the Financial Statements

The Board of Directors of the SICAV is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the SICAV determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the SICAV is responsible for assessing the SICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the SICAV either intends to liquidate the SICAV or to cease operations, or has no realistic alternative but to do so.

#### Responsibilities of the réviseur d'entreprises agréé for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Deloitte.

As part of an audit in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
  appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
  SICAV's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the SICAV.
- Conclude on the appropriateness of the Board of Directors of the SICAV use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the SICAV's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d'entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d'entreprises agréé*. However, future events or conditions may cause the SICAV to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence.

For Deloitte Audit, Cabinet de révision agréé

Anne Ricci

Anne Ricci, Réviseur d'entreprises agréé

Nominal corresponds to the underlying exposure.

The sale of protection through Credit Default Swaps allows the SICAV to receive a premium as the SICAV is exposed to the risk of default by an issuer. A payment default by the issuer may be offset by settlement either in cash or in kind. In the case of settlement in cash, the buyer of a Credit Default Swap for hedging purposes receives from the seller a sum equivalent to the difference between the face value and the redemption amount which is still recoverable. In the case of settlement in kind, the buyer of a Credit Default Swap for hedging purposes receives from the seller the entire face value, in exchange for which he hands over the defaulted security to the seller; alternatively the buyer and seller exchange securities selected from a basket whose composition is decided in detail when the Credit Default Swap contract is signed. Events of default are set out in the Credit Default Swap contract, as are the arrangements for the delivery of bonds and debt securities. The SICAV may, if necessary, re-sell the Credit Default Swap acquired for hedging purposes, or reproduce the credit risk by buying call options.

#### Other notes to the financial statements

#### 1 - General information

UBAM (hereinafter the "SICAV") is a variable capital investment company incorporated in Luxembourg on 6th December 1990 in accordance with the legislation of the Grand Duchy of Luxembourg, subject to Part I of the law of 17th December 2010 relating to undertakings for collective investment (the "2010 Law"), as amended.

The objective of the SICAV is to offer its shareholders the possibility to invest in an investment vehicle oriented towards the growth of capital invested in various transferable securities.

The SICAV offers investors a choice between various sub-funds, each having different investment objectives. Each sub-fund constitutes a distinct set of assets, represented by different classes of shares. The SICAV thus constitutes a company with multiple sub-funds.

The Board of Directors may at any time and in conformity with the articles of incorporation, issue classes of shares falling within other sub-funds, whose investment aims differ from those of already existing sub-funds.

At closing date, the following sub-funds are active:

## Types of shares

Within each sub-fund, shareholders may be offered various types of shares:

- Type A shares; standard share class;

#### Other notes to the financial statements

#### 1 - General information

- Type A+ shares with the same characteristics as the A shares, but subject to a lower Management Fee and the same minimum initial subscription amount as I+ shares. The minimum amount can be divided among several classes of each Sub-Fund.
- **Type I shares**, reserved exclusively for institutional investors who may subscribe on their own behalf or on behalf of third parties, who must also be institutional investors. These shares will be subject to a lower Management Fee and will not have any marketing or general distributor fees.
- Type I+ shares, reserved exclusively for institutional investors who may subscribe on their own behalf or on behalf of third parties, who must also be institutional investors. These shares will be subject to a lower Management Fee and will not have any marketing or general distributor fees

For this Type I+, the minimum initial subscription amount is:

Sub-Funds	Minimum initial sul	bscription amount					
Sub-rulius	or equivalent in an	other currency					
Bond Sub-Funds							
UBAM - ABSOLUTE RETURN LOW VOL FIXED INCOME (merged)	EUR	10,000,000

The minimum amount can be divided among several classes of each sub-fund.

### - Type U / U+/ U1 shares are only available for:

- investors who need to be pre-approved by the SICAV's Board of Directors and who purchase the Shares indirectly through a financial intermediary (such as a fund platform or wealth management firm) which provides either:
  - (i) portfolio management services; or
  - (ii) independent investment advisory services; or
  - (iii) similar services based on agreements specifically providing for investment in retrocession-free share or unit classes;
- investors in the United Kingdom, the Netherlands and such other countries as may be decided by the SICAV's Board of Directors from time to time who purchase the Shares directly;
- other investors having received a specific approval given by the SICAV's Board of Directors;
- **Type U+ shares** have the same characteristics as the U shares, but subject to a lower Management Fee and the same minimum initial subscription amount as I+ shares. The minimum amount can be divided among several classes of each Sub-Fund.

  These U, U1 and U+ shares do not entitle to any retrocessions. The Class U / U1 / U+ Shares are retail distribution review (RDR) compliant.
- Type R shares
- Type F shares, only available for UBAM BIODIVERSTY RESTORATION, UBAM POSITIVE IMPACT EMERGING EQUITY, UBAM POSITIVE IMPACT EQUITY and UBAM POSITIVE IMPACT GLOBAL EQUITY, which are reserved for selected charitable organisations who have received specific approval given by the SICAV's Board of Directors:

#### Other notes to the financial statements

#### 1 - General information

- Type K shares, which are reserved for investors in the United Kingdom, the Netherlands and such other countries as may be decided by the SICAV's Board of Directors and who have received specific approval given by the SICAV's Board of Directors. K shares do not entitle to any retrocessions:
- **Type M shares**, only available for some sub-funds, which are reserved for UBP clients who have signed a Discretionary Portfolio Management with Union Bancaire Privée, UBP SA or with any other member of the UBP Group;
- Type S shares are only available for:
- investors who purchase the Shares through a Spanish distributor which need to be pre-approved by the SICAV's Board of Directors and have signed a specific cooperation agreement with Union Bancaire Privée, UBP SA or any other member of the UBP Group, which provide either:
  - (i) portfolio management services; or
  - (ii) independent investment advisory services; or
  - (iii) similar services based on agreements specifically providing for investment in retrocession-free share or unit classes;

These Shares do not entitle to any retrocessions.

- Type V shares, only available for:
- external (non UBP) banking groups or asset managers which entered into specific corporate restructuring transactions (mergers, acquisitions or joint ventures) with Union Bancaire Privée, UBP SA or any of its subsidiaries / branches who invest on behalf of clients on the basis of discretionary mandates and have received a specific approval given by the SICAV's Board of Directors;
- Type X / X1 shares, which are reserved for distributors who have signed a specific cooperation agreement with Union Bancaire Privée, UBP SA or with any other member of the UBP Group who invest on behalf of their clients;
- Type Y / Y1 shares, which are reserved for institutional investors who have signed a specific cooperation agreement with Union Bancaire Privée, UBP SA or with any other member of the UBP Group;
- **Type Z shares**, which are reserved for institutional investors who have signed a specific remuneration agreement with Union Bancaire Privée, UBP SA or with any other member of the UBP Group. No performance fee or management fee is charged for Type Z shares.

For the sub-fund UBAM - BIODIVERSITY RESTORATION, sub-type of A and I share classes are available. These share classes bear a higher management and/or performance fee than the standard A and I classes and part of this management fee and/or performance fee is donated to non-governmental organization chosen by the SICAV's Board of Directors. These shares will include the letter "N" in their denomination. "N+" share classes are also available with higher management fee and/or performance fee than the "N" share class and the extra management fee and/or performance fee is donated to the chosen non-governmental organization. Considering the donation to non-governmental organization(s), these "N" shares do not entitle to any retrocessions.

For some sub-funds, certain Types of shares with reduced fees may be offered to early investors. These Types of shares will then include the letter "E" in their denomination. Their availability will be at the discretion of the SICAV's Board of Directors and will not entitle to any retrocessions, unless otherwise exceptionally authorized by the SICAV's Board of Directors. However, and in any event, Type U, Type K and Type S shares will not entitle to any retrocessions.

For the sub-fund UBAM - HYBRID BOND, considering the investment of up to 100% in Contingent Convertible Bonds, the minimum initial subscription amount for all Types of shares is USD 50,000 or equivalent.

There is no minimum subscription for any other sub-fund, except for the I+, A+ and U+ Type of shares.

#### Capitalisation or Distribution shares

Within each sub-fund, each Type may be issued in distribution shares (D shares) or capitalisation shares (C shares).

Distribution shares are denominated and categorised as follows:

- D share classes with annual dividends
- Dq share classes with quaterly dividends
- · Dm share classes with monthly dividends
- · Dm+ share classes with monthly dividends higher than those of Dm share classes

#### Shares with performance fees

The Types of shares which include the letter "P" in their name bear a performance fee.

#### Shares in currencies other than the sub-fund's base currency

Shares in currencies other than the base currency of each sub-fund may be offered. These shares will bear all exchange-related costs concerning the subscription price and/or redemption price respectively received or paid in the Sub-Fund's base currency, costs relating to the calculation of the net asset value and any related costs.

Depending on the sub-fund, the currency risk for these shares, denominated in other currencies than the sub-fund's base currency may or may not be hedged. When hedged, the hedging will be as accurate as possible and will be in a range between 95% and 105%.

The shares, hedged against currency risk, are denominated with the letter "H".

Depending of the concerned sub-funds, the objective of the hedging transactions is:

- either to cover the exchange-related risks between the base currency of a sub-fund and the share's currency or;
- to cover the exchange-related risks between the currencies of a sub-fund's underlyings and the share's currency (hence, some of these sub-funds also offer hedged share classes denominated in the base currency of the sub-funds).

#### Other notes to the financial statements

#### 1 - General information

The table below details which hedging method is applied for concerned sub-funds:

Sub-fund	Hedging method
UBAM - 30 EUROPEAN LEADERS EQUITY UBAM - 30 GLOBAL LEADERS EQUITY UBAM - BELL GLOBAL SMID CAP EQUITY UBAM - GLOBAL EQUITY UBAM - GLOBAL FINTECH EQUITY UBAM - SWISS EQUITY *	Hedging transactions aim to cover the exchange-related risks between the currencies of the sub-fund's underlyings and the share's currency.
UBAM - GLOBAL AGGREGATE BOND	Hedging transactions aim to cover the exchange-related risks between the currencies of the related benchmark and the share's currency.  100% Bloomberg Barclays Global Aggregate Total Return Index
All other sub-funds and shares	Hedging transactions aim to cover the exchange-related risks between the base currency of a sub-fund and the share's currency.

<sup>\*</sup> Only the CHF Hedged share class

#### 2 - Principal accounting policies

#### 2.1 - Presentation of the financial statements

The financial statements of the SICAV are prepared in accordance with the Luxembourg regulations relating to undertakings for collective investment and generally accepted accounting principles.

#### 2.2 - Portfolio valuation

The valuation of any security traded or listed on a stock exchange is based on the last known price unless such price is not representative.

Regarding the valuation of money market instruments and other debt securities with a residual duration of less than 12 months, the valuation will be based on the nominal value plus any capitalised interest or based on the amortisation costs. The valuation thus calculated may differ from the actual market price. In case of significant variations in market conditions, the basis for evaluating the different investments is adjusted based on the new market returns.

The valuation of any security traded on another regulated market is based on the last available price.

When securities held in the portfolio are not traded or listed on a stock exchange or another regulated market, or when the price determined in respect of securities listed or traded on a stock exchange or another regulated market is not representative of the actual value of those securities, such securities are valued based on the likely realisable value, which must be estimated with caution and in good faith by the Board of Directors.

The net unrealised appreciation or depreciation is disclosed in the statement of net assets. Net realised profits or losses and movement in net unrealised appreciations or depreciations are disclosed in the statement of operations and changes in net assets.

Shares/Units in underlying open-ended investment funds are valued based on the net asset value available on the business day preceding the valuation date, provided said net asset value is dated on prior to the valuation date, after deducting any fees applicable.

#### 2.3 - Net realised profits or losses on sales of investments

The net realised profits/(losses) on sales of investment securities are determined on the basis of the average cost of the securities sold and are recorded in the statement of operations and other changes in net assets.

#### Other notes to the financial statements

#### 2 - Principal accounting policies

#### 2.4 - Foreign currency translation

Bank balances, other net assets and liabilities and the valuation price of the securities portfolio expressed in currencies other than the currency of the sub-fund are converted into this currency at the exchange rate prevailing at the closing date. Income and charges expressed in currencies other than the currency of the sub-fund are converted into this currency at the exchange rate prevailing on the date of the transaction. Exchange gains and losses are recorded in the statement of operations and changes in net assets.

In each sub-fund, the cost of acquiring securities denominated in another currency than the currency of the sub-fund is converted into this currency at the exchange rate on the date of purchase.

The cost of acquiring the SICAV's securities portfolio is equal to the sum of the acquisition costs of the securities portfolio of each sub-fund, converted into EUR at the exchange rate prevailing at the closing date.

At closing date, the exchange rates prevailing are the following:

1 EUR	=	1.6189	AUD	1 EUR	=	5.36595	BRL	1 EUR	=	1.4566	CAD
1 EUR	=	0.9297	CHF	1 EUR	=	964.67435	CLP	1 EUR	=	7.8658	CNH

1 EUR	=	1.10465	USD	1 EUR	=	20.2013	ZAR				

#### 2.5 - Combined financial statements

The various items appearing in the combined financial statements of the SICAV are equal to the sum of the corresponding items in the financial statements of each sub-fund and are drawn up in EUR.

Opening net assets are maintained at the closing exchange rate of the previous year. Exchange differences arising are included in the combined statement of operations and changes in net assets for the year under "Reevaluation of opening combined balance".

As at closing date, the total of cross sub-funds' investments amounts to EUR 41,429,308.39 and therefore total consolidated net asset value at the level of the SICAV at the end of the year without cross-investments would amount to EUR 15,137,318,197.08.

Sub-funds	Cross investment	Amount (in EUR)
UBAM - ABSOLUTE RETURN FIXED INCOME	UBAM - STRATEGIC INCOME ZC USD	8,196,999.56
UBAM - ABSOLUTE RETURN FIXED INCOME	UBAM - HYBRID BOND -Z- USD CAP	2,071,322.82

UBAM - GLOBAL CONVERTIBLE BOND	UBAM - EUROPEAN CONVERTIBLE BOND IC EUR	4,434,080.00
	<del>-</del>	41.429.308.39

#### Other notes to the financial statements

#### 2 - Principal accounting policies

#### 2.6 - Valuation of options

Premiums received on the sale of options are recognised as liabilities and premiums paid on the purchase of options are carried as assets. Option contracts outstanding at the closing date are valued at the last known price on the stock exchanges or regulated markets for that purpose.

OTC options are marked to market based upon prices obtained from third party pricing agents.

#### 2.7 - Valuation of forward foreign exchange contracts

Forward foreign exchange contracts that have not matured on the valuation date are valued on the basis of the forward rates applicable on that date. Resulting unrealised profit or loss is disclosed in the statement of net assets. Realised profits or losses and movement in net unrealised appreciation / (depreciation) are disclosed in the statement of operations and changes in net assets.

For the details of outstanding forward foreign exchange contracts, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.8 - Valuation of financial futures

Futures are posted off-balance sheet and valued at their last known price on the stock exchanges or regulated markets for that purpose. The unrealised profit or loss is disclosed in the statement of net assets. Realised profits or losses and changes in unrealised profits or losses are disclosed in the statement of operations and other changes in net assets.

For the details of outstanding futures contracts, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.9 - Valuation of swaps

Swap contracts are posted off-balance sheet and their values are determined each day on a reliable basis and verified by a competent professional appointed by the SICAV (the calculation is done through the system Kondor, fed by the data coming from the independent provider "ICAP"), in line with market practices. The unrealised profit or loss is disclosed in the statement of net assets. Net realised profits or losses and movement in net unrealised appreciation / (depreciation) are disclosed in the statement of operations and other changes in net assets.

Valuation of CDS (Credit Default Swaps) contracts is essentially depending on the issuer's credit risk, this being defined via a spread listed in basis points.

The interests to be received and to be paid on swap contracts are accrued for each net asset value calculation according to their rate, the coupon payments frequency and the maturity date of the contracts.

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on notional amount that serves as a computation basis which is usually not exchanged. Interest rate swaps are marked to market at each net asset value calculation date. The unrealised gain or loss is disclosed in the statement of net assets. Net realised profits or losses and movement in net unrealised appreciation / (depreciation) are disclosed in the statement of operations and other changes in net assets.

For the details of swaps, please refer to section "Notes to the financial statements - Schedule of derivative instruments".

#### 2.10 - Dividend and interest income

Dividends are accounted at the ex-date. Interests are accounted on a prorata temporis basis and include amortization on zero coupon bonds.

#### 2.11 - Interest paid

The caption "Interests paid on bank overdraft" includes negative interest charged on positive cash balances. This is due to current market conditions.

#### Other notes to the financial statements

### 2 - Principal accounting policies

#### 2.12 - Formation expenses

Expenses in connection with the incorporation of the SICAV are amortised on a straight line basis over five years.

#### 2.13 - Transaction fees

The transaction fees, i.e. fees charged by the brokers for securities transactions and similar transactions, are recorded separately in the statement of operations and other changes in net assets under the caption "Transaction fees".

#### 2.14 - Receivable / payable on treasury transactions

The caption "Receivable on treasury transactions" comprises time deposits matured and foreign exchange transactions not yet recorded under the caption "Cash at banks".

The caption "Payable on treasury transactions" comprises new time deposits, maturities of borrowings and foreign exchange transactions not yet recorded under the caption "Cash at banks".

For a sub-fund having "Receivable on treasury transactions" and "Payable on treasury transactions" at the closing date, only the net amount is disclosed in the statement of net assets.

#### 3 - Management fees

UBP Asset Management (Europe) S.A., the Management Company, is in charge of the investment management of the SICAV. In consideration of its services, the Management Company receives an annual management fee payable quarterly and based on the average net assets of each Type of Shares of the various sub-funds managed during the relevant quarter, in accordance with the table below: The Management fees disclosed only concern all share classes active as at 31st December 2023.

Sub-funds	Share class	ISIN	Management fee (effective rate)
UBAM - ABSOLUTE RETURN FIXED INCOME	A - Capitalisation shares	LU1315123684	0.75

UBAM - SELECT HORIZON	A - Capitalisation shares	LU2002006836	1.20
	IH - Capitalisation GBP shares	LU2002010788	0.70

No management fee is levied for Type Z shares.

When a sub-fund invests in shares of UCITS and/or other UCIs managed directly or indirectly by the SICAV or by a company with which it is affiliated through common management or control or by a direct or indirect stakeholding of more than 10% of the capital or voting rights, there will not be any duplication of management fees for the sub-fund and the UCITS or other UCIs concerned.

#### 4 - Performance fees

The fee is equivalent to a percentage of the highest net return of the sub-fund and, respectively, of the class with respect to a reference index or a fixed rate of return. If this difference is negative or equal to zero, no performance fee will be paid by the sub-fund.

The performance fee is payable annually in arrears at the end of each 12-month year (financial year), and is equivalent to a percentage of the net asset value earnings, when this is greater than the reference net asset value, the minimum return-rate, or the high-water mark of the benchmark index. The performance fee is calculated on the basis of the net asset value after all charges and management fees (but not the performance fee) have been deducted, and is modified to take into account subscriptions and redemptions. For Sub-Funds which were launched in the course of the financial year, the performance fee can only be crystallised at the end of the financial year, but not before at least 12 months after the launch. The High Water Mark must be reset every 5 years.

Sub-fund *	Performance percentage *	Benchmark index or Minimum return rate p.a (Hurdle) *	Benchmark administrator

<sup>\*</sup> Only applicable for share classes having a letter "P" in their denomination (AP, IP, UP, RP or MP).

<sup>\*\*</sup> For this sub-fund, instead of Euro Short Term Rate (€STR), the benchmark for the hedged non-EUR Share classes will be:

USD share Class	SOFR Overnight Rate Index	
GBP share Class	SONIA Overnight Rate Index	+2% for UBAM - ABSOLUTE RETURN FIXED INCOME
CHF share Class	SARON Overnight Rate Index	
SEK share Class	Swedish Krona Overnight Deposit Offered Rate	

#### 4 - Performance fees

In application of the ESMA Guidelines on performance fees (ESMA34-39-992) and Circular CSSF 20/764, the table below displays the actual amount of performance fees charged by each relevant Share Class and the percentage of these fees based on the Share Class Net Asset Value ("NAV"). Only the Share Classes for which performance fees have been charged are shown below.

During the year, performance fees accrued are the following:

Sub-funds	Share Class	ISIN Code	Sub-fund currency	Amount of performance fees as at 31/12/2023 (in Sub-fund currency)	Average NAV of the Share Class (in Sub-fund currency)	% in the Share Class average NAV
UBAM - EMERGING MARKETS FRONTIER BOND	UPH - Capitalisation SEK shares	LU2051729635	USD	345.86	25,617.46	1.35
			Total	345.86		
UBAM - BELL GLOBAL SMID CAP EQUITY	AP - Capitalisation shares IP - Capitalisation	LU2256764452	USD	132.52	202,206.09	0.07
	shares	LU2256770004		9 827.91	2,444,994.61	0.40
			Total	9 960.43	, ,	
UBAM - BIODIVERSITY RESTORATION	UP - Capitalisation EUR shares	LU2351035246	USD <b>Total</b>	25.51 <b>25.51</b>	5,420.35	0.47

No performance has been recorded for the other sub-funds subject to a performance fee.

#### 5 - Service fees

The Service fee is maximum 0.365 % per annum on the average NAV for each Sub-Fund payable monthly to the Management Company with a minimum of EUR 35,000 per annum.

This Service fee includes but is not limited to the fees for the Administrative, Registrar and Transfer Agent as well as the Depositary Bank. The Depositary Bank fee covers both the fees for custody and monitoring of the assets.

### 6 - General Distributor and Marketing fees

With the approval of the SICAV's Board of Directors, the Management Company delegated the general distribution functions to Union Bancaire Privée, UBP SA, Genève, in reference to the agreement initially dated 1st December 2003. A new 'General Distributor and Marketing Agent agreement' was signed on 19th April 2021.

General distributor fee is maximum 0.10% per annum. No General distributor fee is foreseen for the Types I, I+, F, M, V, Y and Z shares.

According to the General Distributor and Marketing Agent agreement dated 19th April 2021, Union Bancaire Privée, UBP SA, Genève, is appointed as Marketing Agent. Union Bancaire Privée, UBP SA is responsible for the marketing and the promotion of the SICAV throughout and beyond Europe, as well as the coordination of the marketing activities between the local distributors.

Marketing fee is maximum 0.10% per annum. No marketing fee is foreseen for the Types I, I+, F, M, V, Y and Z shares.

### 7 - Subscription tax ("Taxe d'abonnement")

The SICAV is subject in Luxembourg to an annual tax of 0.05%, for Types A, A+, U, U+, R, S, K and X shares, payable quarterly on the basis of the net assets of the SICAV as calculated at the end of the relevant quarter.

The Types I, I+, F, M, V, Y and Z shares benefit from a reduced "taxe d'abonnement" of 0.01% of the net asset value which is dedicated to that Type of shares.

The net assets invested in collective investment undertakings subject to the "taxe d'abonnement" stipulated by Article 175 (a) of the amended Law of 2010 are exempt from the "taxe d'abonnement".

# Other notes to the financial statements

## 8 - Dividend distributions

### 9 - Swing pricing

The sub-funds may suffer a reduction in value of the net asset value per share due to transaction costs incurred in the purchase and sale of their underlying investments and/or the spread between the buying and selling prices of such investments when underlying investments trades are undertaken by the Investment Managers to accommodate subscriptions, redemptions and/or switches in and out of the sub-fund.

In order to counter this and to protect shareholders' interests, the Management Company adopted a Swing Pricing Mechanism. The Swing Pricing Mechanism means that in certain circumstances, the Management Company will make adjustments in the calculation of the net asset value per share. The net asset value per share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively. The extent of the adjustments will be set by the Management Company to reflect the above mentioned transactions costs and/or spread when these are deemed to be significant. The maximum adjustment will not exceed 2% of the original net asset value per share.

The Swing Pricing Mechanism may be applied across all Bond sub-funds with the exception of UBAM - DYNAMIC EURO BOND, UBAM - DYNAMIC US DOLLAR BOND, UBAM - EURO BOND (merged), UBAM - EURO CORPORATE IG SOLUTION, UBAM - EURO HIGH YIELD SOLUTION (merged), UBAM - GLOBAL HIGH YIELD SOLUTION, UBAM - GLOBAL HIGH YIELD SOLUTION, UBAM - US DOLLAR BOND (merged) and UBAM - US HIGH YIELD SOLUTION (merged) and will be applied in an equitable manner to all shareholders of a same subfund on the same net asset value calculation date.

No Swing Pricing Mechanism will be applied for Convertible bond sub-funds and Equity sub-funds, Asset Allocation sub-funds, Fund of funds sub-funds and other sub-funds.

During the year, swing pricing has been applied in some net asset value calculations for the below sub-funds:

- UBAM CORPORATE EURO BOND (merged)
- UBAM EM INVESTMENT GRADE CORPORATE BOND
- UBAM ABSOLUTE RETURN FIXED INCOME
- UBAM ABSOLUTE RETURN LOW VOL FIXED INCOME (merged)
- UBAM CORPORATE GREEN BOND (dormant)

### Other notes to the financial statements

### 10 - Pledge of the assets

The assets of each sub-fund are pledged in favour of BNP Paribas S.A., Luxembourg Branch with effect as at 01st October 2022 in case of any potential bank overdraft.

#### 11 - Other liquid assets and liabilities

The amounts disclosed in the captions "Other liquid assets" and "Other liquid liabilities" are composed of collateral, VM cleared OTC, managed accounts held or paid and margin deposits in order to reduce exposure on OTC.

#### 12 - Related party

During the year ended 31st December 2023, some sub-funds of the SICAV invested in shares of UCITS and/or other UCIs managed directly or indirectly by the SICAV or by a company with which it is affiliated through common management or control or by a direct or indirect stakeholding of more than 10% of the capital or voting rates. No subscription or redemption fees were charged to the SICAV for investments in such UCITS or other UCIs.

The transactions occurred during the year ended 31st December 2023 on shares of UCITS and/or other UCIs affiliated to the SICAV as presented above have been made at fair market conditions.

At year end, the SICAV has investments in the following funds which are related parties: U ACCESS Ireland and U ACCESS.

### 13 - Portfolio valuation adjustment

The annual report has been prepared based on the latest available information for the valuation of the portfolio whereas the net asset value at 31st December 2023 was calculated based on the latest available information at the date of the net asset value calculation in accordance with the valuation principles of the latest prospectus, estimated with caution and in good faith by the Board of Directors of the Fund.

In the Sub-fund UBAM - EMERGING MARKET CORPORATE BOND SHORT DURATION, the security EVRAZ GROUP SA 5.375 (XS1533915721) has been valued with caution and in good faith by the Board of Directors.

On April 8, 2024, the Board of Directors of the Fund obtained the confirmation of the impossibility of settlement of the security. Following this information, the valuation committee of the Management Company and the Board of Directors of the Fund decided to value the security EVRAZ GROUP SA 5.375 at 0, and to write-off the accrued and pending interests.

Following the receipt of this information, the Board of the Directors of the Fund decided to amend these Financial Statements to reflect this information in the valuation of the security EVRAZ GROUP SA 5.375. The impact on the Net Asset Value of the Sub-Fund is USD 865'405, and represents 1.79% of the NAV of the Sub-fund as at 31st December 2023.

#### 14 - Changes in the composition of securities portfolio

Details of changes in the securities portfolio for the year referring to this report are available upon request - free of charge - at the SICAV's registered office, and at the office of the financial intermediaries as described in the Organisation and Administration chapter of this report.

By circular resolution dated 5th March 2024, the Board of Directors of the SICAV decided to appoint Mrs. Claire COLLET as a new member of the Board of Directors with effective date on 15th March 2024.

### Additional unaudited information

#### Remuneration policy

#### **UCITS V**

#### Remuneration

As of December 31, 2023, UBP Asset Management (Europe) S.A. (or "UBP AM") as a management company authorized under Chapter 15 of the amended Law of 17 December 2010, and Chapter 2 of the amended Law of 12 July 2013 and Law of 23 July 2016, manages three (3) Luxembourg UCITS, five (5) Luxembourg either Part II funds or specialized investment funds qualifying as AIFs and three (3) Reserved Alternative Investment Funds, which represent a total of EUR 19.59bn Assets Under Management ("AUMs").

This section relates to the remuneration paid by UBP Asset Management (Europe) S.A., acting as Management Company of UBAM, either to its staff, its senior management or its Board of Directors. Total staff is 21 people, out of which 7 are considered as Identified Staff under the meaning of the UCITS Directive (including senior management & control functions).

#### Remuneration principles

According to the remuneration policy, the global remuneration includes fixed and variable remuneration. As a general principle, fixed remuneration must represent a sufficiently high proportion of the total remuneration so that a fully flexible policy may be enacted as regards the variable component, including the option of not paying a variable component at all;

Variable remuneration is limited insofar as the remuneration of independent control functions is predominantly oriented towards adequate fixed remuneration and cannot, in principle, exceed 30% of the total fixed remuneration.

The variable part, in the form of a non-contractual and purely discretionary payment, is fixed considering the individual performance of the employee on the one hand and the economic situation of the UBP Group on the other hand. The employee's individual performance is assessed based on quantitative and qualitative criteria. The remuneration policy encourages the performance sustainability and long-term stability and aims to avoid excessive or inconsiderate risk-taking.

The variable remuneration is never linked to the AIF or UCITS performance nor to their risk profile and takes into account the potential conflicts of interest

The UBP AM Remuneration Policy also sets out the specific rules that will be applied to staff members considered as "Identified Staff", being categories of staff, including senior management, risk takers, control functions and any employee receiving a total remuneration that takes him/her into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profiles of UBP AM, of its delegates for portfolio management activities or of the funds it manages (including persons capable of entering into contracts, positions and taking decisions that materially affect the risk positions of the AIFs or management company).

The list of Identified Staff will be subject to regular review, being formally reviewed in the event of, but not limited to:

- Organizational changes
- New business initiatives
- Changes in role responsibilities
- Relevant changes in applicable regulatory framework

More information related to the remuneration policy content and implementation is available to the UBAM shareholders at the registered office of UBP Asset Management (Europe) S.A., 287-289, route d'Arlon, L-1150 Luxembourg.

#### Quantitative Remuneration Disclosure

UBP AM as appointed management company is required under the UCITS Directive to make quantitative disclosures of remuneration. These disclosures are made in line with UBP AM's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. In any case where market or regulatory practice will develop or change, UBP AM may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated or disclosed.

Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other UBP funds disclosures in that same year.

### Additional unaudited information

### Remuneration policy

UBAM	Headcount	Total Remuneration EUR		Remuneration attributal UBAM		
UBP Asset Management (Europe) S.A. staff	21	4 367 045		3 402 536		
of which						
Fixed remuneration		3 533 035		2 752 726		
Variable remuneration		834 010		649 810		
UBP Asset Management (Europe) S.A. "Identified S	Staff"					
of which		Fixed	Variable	Fixed	Variable	
Senior Management	7	1 664 130	550 000	1 296 589	428 527	
Other "Identified Staff"						
(for UBP AM and delegate portfolio managers)	49	17 956 587	13 736 160	8 403 282	7 007 781	
Total	56	19 620 717	14 286 160	9 699 871	7 436 308	

Disclosures are provided in relation to (a) the whole staff of UBP AM; (b) the senior managers – as specific category of material risk takers (MRTs); (c) other MRTs identified within UBP AM (including control functions) aggregated together with the MRTs identified by UBP AM's delegate portfolio managers as having the ability to materially affect the risk profile of the Fund.

All individuals considered for the calculation of the aggregated figures disclosed are remunerated in line with UBP Group remuneration policy for their responsibilities across the relevant UBP business area. As all individuals have different areas of responsibilities and several portfolios to manage, only the portion of remuneration for those individuals' services attributable to the Fund is included in the aggregate figures disclosed.

Staff members and senior management typically provide both UCITS and non-UCITS related functions and services in respect of several funds under management of UBP AM, and across the broader UBP group. Therefore, the figures disclosed are a sum of each individual's (staff, senior management and other MRTs) portion of remuneration - split into fixed and variable, and into different categories of members - and attributable to the Fund according to an objective apportionment methodology which takes into account the related assets under management of the Fund vis-àvis the whole assets managed either by UBP AM or by the portfolio manager. Those figures are based on the amount paid in respect of the previous fiscal year and calculated on an AUM pro-rata basis. Accordingly, the figures are not representative of any individual's actual remuneration payment or remuneration structure.

### **Information for Swiss investors**

### Total expense ratio ("TER")

The Total expense ratio ("TER") is calculated for the last 12 months preceding the closing date.

For Switzerland, the composite (synthetic) TER is calculated according to the AMAS guideline and is based on the TER of the target funds.

Transaction fees are not taken into account in the calculation of the TER.

If a performance-related fee is foreseen and has been calculated, the TER is disclosed including this fee. Moreover the performance fee ratio is calculated in percentage of the average net assets for the last 12 months preceding indicated reference date.

As at 31st December 2023, the TER calculated for each Class of Shares is as follows:

UBAM - ABSOLUTE RETURN FIXED INCOME	ISIN codes	Sub-Fund and Class of share	TER in %	Synthetic TER in %

#### SFDR (Sustainable Finance Disclosure Regulation)

In line with the SFDR, 29 active sub-funds of UBAM are classified as Article 8, promoting environmental and/or social characteristics, while 4 active sub-funds are classified as Article 9, having sustainable investment as their objective.

Other sub-funds of UBAM are classified as Article 6.

#### Article 6 sub-funds:

Article 6 sub-funds do not promote environmental or social characteristics, nor do they have sustainable investments as their objective. As a result, investments underlying these sub-funds did not take into account the EU criteria for environmentally sustainable economic activities.

#### SFDR SCHEDULE- Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - ABSOLUTE RETURN FIXED INCOME Legal entity identifier: 000000869\_00000102

#### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?						
● ● □ Yes	● ○ □ No					
☐ It made sustainable investments with an environmental objective: % ☐ in economic activities that qualify as	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.1% of sustainable investments					
environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy					
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>□ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>□ with a social objective</li> </ul>					
☐ It made sustainable investments with a social objective%	☐ It promoted E/S characteristics, but <b>did not make any sustainable investments</b>					

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicator used to assess the environmental characteristic promoted by this Sub-Fund is the percentage of corporate bond issuers in this Sub-Fund with a net zero emission plan.

The sustainability indicator used to assess the social characteristic is breach to United Nations Global Compact (UNGC). As shown in the following section, the share of companies with transparent policies towards net zero emission path was 28.6% at the reporting date, and the share of companies in breach of the UN Global Compact was 0.0%. Those indicators showed that the environmental and social characteristics promoted by this Sub-Fund were met.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### • How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund
Share of companies with policies towards net zero emission pat	28.6%
Share of companies in breach of UN Global Compact	0.0%

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG as of 29 December 2023

#### And compared to previous periods?

Sustainability indicator	Sub-Fund
Share of companies with policies towards net zero emission path	24.7%
Share of companies in breach of UN Global Compact	0.0%

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG as of 30 December 2022

The sustainability indicator – Share of companies with transparent policies toward Net Zero path – increased from 24.7% to 28.6%. This change reflects the implementation of the ESG process of the sub-fund, notably exclusions and integration of ESG factors when selecting companies for the portfolio.

The sustainability indicator – Share of companies in breach of the UN Global Compact – is unchanged at 0.0%.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held some taxonomy-aligned investments, whose objectives were primarily climate mitigation.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU Taxonomy regulation.

In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:
Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

#### What was the proportion of sustainability-related investments?

0.1%

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	69.30%	81.90%
#2 Other	31.70%	18.10%
#1A Sustainable	0.10%	0.10%
#1B Other E/S characteristics	69.20%	81.80%
Taxonomy-aligned	0.10%	0.10%
Other environmental	0.00%	0.00%
Social	0.00%	0.00%

Source: UBP, as of 29 December 2023

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- $\hbox{- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.}\\$
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

Sector	% Assets
Financials	45.54%
Other	29.17%
Cash	7.04%
Communication Services	4.58%
Utilities	3.63%
Consumer Staples	2.37%

Consumer Discretionary	0.50%
Total	100.00%

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, some of the companies in which the fund was invested have reported EU taxonomy aligned revenues, such as ENBW or Volvo. Taking into account the weight of these companies in the portfolio, this resulted in a revenue-based investment of 0.1% of total assets

The Investment Manager ensured that these companies did not significantly harm any other sustainable investment objectives by applying its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Did the financial product invest	in	fossil	gas	and/or	nuclear	energy	related	activities
complying with the EU Taxonomy	/?							

☐ YES
☐ In fossil gas ☐ in nuclear energy

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

☑ NO

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment data, Morningstar Sustainalytics, as of 29 December 2023
The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 62.5% of the total net assets.
The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.
Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear)
Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Transitional activities: 0% Enabling activities: 0.2%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Transitional activities: 0% Enabling activities: 0 %

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other accounted for 18.1%.

Investments in bonds with an MSCI ESG rating below BBB accounted for 6.2%. There were environmental or social safeguards to those investments to the extent that the selection of those bonds derive from the investment team's ESG process and internal ESG score.

The rest of "Other" consisted of non ESG-rated fund, cash, other net assets, cash equivalents and derivatives for liquidity management and efficient portfolio management. There were no minium environmental or social safeguards on those investments.

Source: UBP, as of 29 December 2023

sustainable investments with an environmen tal objective that do not take into account the criteria environmen tally sustainable economic activities under the EU Taxonomy.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the investment team engaged with:

- companies in the healthcare sector in relation to their pricing policy and opiod addiction risks
- companies in the real estate sector in relation to their governance and sustanability disclosure policies

The Sub-Funds UBAM - US DOLLAR BOND and UBAM - EURO BOND have been merged into the Sub-Fund UBAM - ABSOLUTE RETURN FIXED INCOME respectively on 24/08/2023 and 28/08/2023.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to

measure whether
the financial
product attains the
environmental or
social
characteristics that
they promote.

No reference benchmark.

How did the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

• How did this financial product perform compared with the reference benchmark?
N/A

• How did this financial product perform compared with the broad market index?
N/A

#### SFDR SCHEDULE- Annex IV

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the environmental and social characteristics promoted by the Sub-Fund were met, as explained below.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties

#### How did the sustainability indicators perform?

For Corporate Issuers (77.7% as of 29 Dec. 2023):

 The Sub-Fund promoted social characteristics by excluding companies in breach of the UN Global Compact.

For Sovereign Issuers (15 % as of 29 Dec. 2023):

- The indicator used to measure the attainment of the social characteristics discloses the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe (more than 100 countries) on the internal social score.
- The indicator used to measure the attainment of the environmental characteristics discloses the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe (more than 100 countries) on the internal environmental score.
- As shown in the following section, the share of countries in the bottom 10% of the internal E score was 0.0% at the reporting date, and the share of countries in the bottom 10% in the internal S score was 0%.
  - And compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As a	t 30/12,	/2022	As at 29/12/2023		2023	
Indicat or	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Planned actions
PAI 3	GHG intensity of investee companies (tCO2eq/EURm revenue)	161.7	76.0%	77.7%	166.9	86.4%	87.7%	GHG intensity of investee companies has been relatively stable over 2023.
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	2.3%	68.8%	77.7%	1.4%	82.8%	87.7%	This Sub-Fund excludes companies assessed by MSCI as in breach of UN Global Compact. In addition, it also seeks to limit exposure to companies assessed as being in violation of the UN Global Compact or of the OECD Guidelines for Multinational Enterprises according to the analyses of other external providers.  The 1.4% relates to two positions on Wells Fargo. The company has been actively enhancing its corporate governance and risk management controls. In response to the scandal involving the unauthorized opening of accounts, the company has taken several corrective steps to address its sales culture:  It has made considerable progress in strengthening its controls, such as installing independent monitors in its consumer banking divisions, exchanging its top management, including CEO, adding personnel to its risk management division, centralizing its operating structure  It improved its corporate governance standards and revised employee incentives, while eliminating sales goals.  It has done numerous settlements with the US regulators related to its sales practices (the lates one being in December 2022). Despite these settlements, it managed to remain profitable, highlighting its strong franchise in the US banking business. Its Q1 2024 profit has grown to 4.6 bn USD compared to 23.5 bn in Q4 2023  We expect Wells Fargo to remain focused on further strengthening of its governance and risk management practices. The progress of the company to address those concerns is being monitored.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	77.7%	77.7%	0%	87.7%	87.7%	The Sub-Fund continues to exclude companies exposed to controversial weapons
PAI 16	Investee Countries subject to social violations (%)	0%	14.6%	15.0%	0%	9.4%	11.0%	The Sub-Fund continues to exclude countries exposed to social violations

#### What was the proportion of sustainability-related investments?

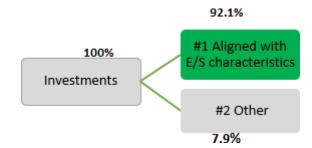

0%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	86.40%	92.10%
#2 Other	13.60%	7.90%

Source: UBP, as of 29 December 2023

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 7.9% "Other" investments that were neither aligned with the environmental or social characteristics of the sub-fund, nor qualified as sustainable investments were as follows:

- 3.4% in other UBAM sub-funds:
  - 2.6% in the UBAM Hybrid Bond Fund, providing the sub-fund with a diversified exposure to contingent convertible bonds issued by major banks
  - 0.8% in the UBAM Responsible Sovereign Bond Fund, providing the sub-fund with a diversified exposure to well-rated emerging market sovereign issuers. (There were environmental and social safeguards to the extent that both subfunds comply with Article 8 of SFDR)
- 3.1% in bonds from developed countries rated below BBB by MSCI on ESG.
- 2.7% in bonds from emerging countries rated below BB by MSCI on ESG
- The remaining was held in cash for the purposes of meeting margin requirements on foreign exchange and interest rate derivatives

In all cases, investment decisions related to bond investments met the environmental and social characteristics of the sub-fund. Our bond selection follows a disciplined investment process that combines a credit score and an ESG score. The ESG assessment ensures that the environmental and social characteristics are met.

In the case of of the emerging market bonds accounting for the 2.7% above, there are five issuers involved, three of which for whom our internal analysis shows a commitment to improving their ESG score, and two of which for whom we have no such evidence and that we are re-assessing for possible disposal.

Source: UBP, as of 29 December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

All investment decisions in the portfolio related to bond investments met the environmental and social characteristics promoted by the Sub-Fund. The bond selection abides to a disciplined investment process that combines a credit score and an ESG score. The ESG assessment ensures that the environmental and social characteristics are met.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU

Taxonomy.

This approach led the investment team to sell in September 2022 a position in an Indian company Green bond following worrying signs of governance at the group level in terms of over leverage and possible overvaluations.

In line with the environmental and social characteristics promoted by the Sub-Fund, in 2022 the investment team invested in the Colombia 2031 Sovereign Green Bond. Colombia's green bond framework was developed with the support of the World Bank, the IDB and the independent opinion of Vigeo Eiris of Moody's ESG Solutions. The portfolio includes 27 investment projects, classified in six categories: water management, use and sanitation, clean transportation, ecosystem services and biodiversity protection, non-conventional renewable energy sources, circular economy, and sustainable agricultural production adapted to climate change. These projects are well aligned with the environmental characteristics promoted by Sub-Fund and the bond issue also meets our requirement for transparency in the management of proceeds post-issuance.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. No reference benchmark.

How did the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

How did this financial product perform compared with the reference benchmark?

N/A

How did this financial product perform compared with the broad market index?

N/A

#### SFDR SCHEDULE- Annex IV

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of

Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - DYNAMIC EURO BOND Legal entity identifier: O00000869\_00000002

#### **Environmental and/or social characteristics**

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicator used to assess the environmental characteristic promoted by this Sub-Fund is the percentage of corporate bond issuers in this Sub-Fund with a net zero emission plan. The sustainability indicator used to assess the social characteristic is breach to United Nations Global Compact (UNGC).

As shown in the following section, the share of companies with transparent policies towards net zero emission path was 64.0% at the reporting date, and the share of companies in breach of the UN Global Compact was 0.0%. Those indicators showed that the environmental and social characteristics promoted by this Sub-Fund were met.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	64.0%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

#### And compared to previous periods?

The sustainability indicator – Share of companies with transparent policies toward Net Zero path – changed from 38.9% to 64.0%. This change reflects the implementation of the ESG process of the sub-fund, notably exclusions and integration of ESG factors when selecting companies for the portfolio.

The sustainability indicator – Share of companies in breach of the UN Global Compact – is unchanged at 0.0%.

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	38.9%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held some taxonomy-aligned investments, whose objectives were primarily climate mitigation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU Taxonomy regulation.

In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impact considerations for the Sub-Fund were implemeted from 29.12.2023.

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, the fund held use-of-proceeds bonds, compliant with EU Green Bond Standards, as well as some companies which had reported EU taxonomy aligned revenues, such as Volvo or ENBW. Taking into account the weight of these investments in the portfolio, this resulted in 2.38% of total assets.

The Investment Manager ensured that these companies did not significantly harm any other sustainable investment objectives by applying its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

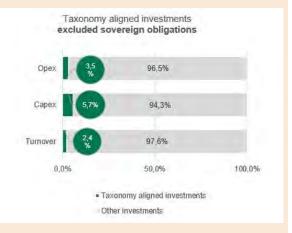

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES
☐ In fossil gas ☐ in nuclear energy
☐ NO

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets. The taxonomy-alignment of EU Green Bonds is accounted for as CAPEX.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

Taxonomyaligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments in transitional and enabling activities?

Information on the split between transitional and enabling activities is not always disclosed. Based on the partial information available, the fund held no investments in transitional activities and 1.2% in enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

0%

0%

What was the share of socially sustainable investments?

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other accounted for 1.5%.

Investments in bonds with an MSCI ESG rating below BBB accounted for 1.1%. There were environmental or social safeguards to those investments to the extent that the selection of those bonds derive from the investment team's ESG process and internal ESG score.

The rest of "Other" consisted of cash, other net assets, cash equivalents and derivatives for liquidity management and efficient portfolio management. There were no minium environmental or social safeguards on those investments.

Source: UBP, as of 29 December 2023

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the investment team engaged with:

- companies in the healthcare sector in relation to their pricing policy and opiod addiction risks
- companies in the real estate sector in relation to their governance and sustanability disclosure policies

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

How did this financial product perform compared to the reference benchmark?

No reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

#### SFDR SCHEDULE- Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - DYNAMIC US DOLLAR BOND Legal entity identifier: 000000869 00000001

#### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective? ● ■ Yes ⊠ No ☐ It made **sustainable investments** with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.4% of sustainable investments ☐ in economic activities that qualify as environmentally sustainable under ☑ with an environmental objective in economic the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic ☐ in economic activities that do not activities that do not qualify environmentally qualify as environmentally sustainable under the EU sustainable under the EU Taxonomy Taxonomy ☐ with a social objective ☐ It made **sustainable investments** It promoted E/S characteristics, but did not with a social objective% make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomv** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental

objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicator used to assess the environmental characteristic promoted by this Sub-Fund is the percentage of corporate bond issuers in this Sub-Fund with a net zero emission plan. The sustainability indicator used to assess the social characteristic is breach to United Nations Global Compact (UNGC).

As shown in the following section, the share of companies with transparent policies towards net zero emission path was 64.0% at the reporting date, and the share of companies in breach of the UN Global Compact was 0.0%. Those indicators showed that the environmental and social characteristics promoted by this Sub-Fund were met.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	64.0%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

#### And compared to previous periods?

The sustainability indicator – Share of companies with transparent policies toward Net Zero path – changed from 38.9% to 64.0%. This change reflects the implementation of the ESG process of the sub-fund, notably exclusions and integration of ESG factors when selecting companies for the portfolio.

The sustainability indicator – Share of companies in breach of the UN Global Compact – is unchanged at 0.0%.

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	38.9%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held 0.4% taxonomy-aligned investments, whose objectives were primarily climate mitigation.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU Taxonomy regulation.

In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

### How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impact considerations for the Sub-Fund were implemeted from 29.12.2023.

		As at	t 30/12/2	022	As at 29/12/2023			
Indicator	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Planned actions
PAI 1	Greenhouse gas emissions (tCO2eq)- scope 1	30708.9	90.2%	99.3%	13820.7	90.2%	100%	This Sub-Fund considers these PAIs when assessing the ESG profile of the
PAI 1	Greenhouse gas emissions (tCO2eq)- scope 2	8604.0	90.2%	99.3%	4971.3	90.2%	100%	corporate bond issuers in the portfolio. The assessment is forward-
PAI 1	Greenhouse gas emissions (tCO2eq)- scope 3	264280.3	86.9%	99.3%	316607	88.7%	100%	looking, independent and materiality-based at the sector level. A scoring
PAI 2	Carbon footprint (tCO2eq/EURm invested)- Scope 1+2	32.9	90.2%	99.3%	17.9	90.2%	100%	methodology is implemented by the Investment Manager to
PAI 3	GHG intensity of investee companies (tCO2eq/EURm revenue)- Scope 1+2	78.5	97.7%	99.3%	97.1	90.2%	100%	assess E characteristics.
PAI 9	Hazardous waste and radioactive waste ratio (t/EURm invested)	0.1	23.4%	99.3%	0.05	77.3%	100%	
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	3.05%	88.10%	99.3%	3.18%	85.6%	100%	This Sub-Fund excludes companies assessed by MSCI as in breach of UN Global Compact. In addition, it also seeks to limit exposure to companies assessed as being in violation of the UN Global Compact or of the OECD Guidelines for Multinational Enterprises according to the analyses of other external providers.  The sub-fund 3.2% exposure relates to OECD guidelines in the banking sector and in the consumer sector. In the banking sector, the theme relates to business ethics. The company made progress in strengthening its internal controls (e.g. independent monitoring, new addition staff to risk management), improved corporate governance standards. In the consumer sector, the theme relates to privacy concerns. The progress of the company to address those concerns is being monitored.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	99.3%	99.3%	0%	100%	100%	This Sub-Fund does not invest in companies that are involved in controversial weapons.

### What was the proportion of sustainability-related investments?

0.4%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	92.90%	93.60%
#2 Other	7.10%	6.40%
#1A Sustainable	0.00%	0.40%
#1B Other E/S characteristics	0.00%	93.2%
Taxonomy-aligned	0.00%	0.40%
Other environmental	0.00%	0.00%
Social	0.00%	0.00%

Source: UBP, as of 29 December 2023

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category ~#1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

### To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, two companies in which the Sub-Fund is invested have reported EU taxonomy aligned revenues, including for instance BMW, and ENEL. Taking into account the weight of these companies in the portfolio, and their compliance with our Do No Significant Harm and Minimum Safeguards criteria, this resulted in a revenue-based investment of 0.4% of total assets.

comp	lying with the EU Taxonomy	?		
☐ YES				
	☐ In fossil gas		in nuclear energy	
⊠ NO				

Did the financial product invest in fossil gas and/or nuclear energy related activities

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignmentMorningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

Taxonomyaligned activities are expressed as a share of:

- turnover
   reflecting the
   share of
   revenue from
   green activities
   of investee
   companies
- capital
  expenditure
  (CapEx)
  showing the
  green
  investments
  made by
  investee
  companies,
  e.g., for a
  transition to a
  green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments in transitional and enabling activities?

Transitional activities: 0% Enabling activities: 0.3%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Transitional activities: 0% Enabling activities: 0.3%

0%

What was the share of socially sustainable investments?

0%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other accounted for 6.4%.

Investments in bonds with an MSCI ESG rating below BBB accounted for 5.6%. There were environmental or social safeguards to those investments to the extent that the selection of those bonds derive from the investment team's ESG process and internal ESG score.

The rest of "Other" consisted of cash, net other assets, cash equivalents and derivatives for liquidity management and efficient portfolio management. There were no minium environmental or social safeguards on those investments.

#### SFDR SCHEDULE- Annex IV

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow

good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EM RESPONSIBLE CORPORATE BOND

Legal entity identifier: O00000869\_00000113

### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?						
● ● □ Yes	● ○ ⊠ No					
□ It made sustainable investments with an environmental objective: % □ in economic activities that qualify as environmentally sustainable under the EU Taxonomy □ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>☑ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.9% of sustainable investments</li> <li>☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>☑ with a social objective</li> </ul>					
☐ It made sustainable investments with a social objective%	☐ It promoted E/S characteristics, but <b>did not make any sustainable investments</b>					

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund aimed to exhibit superior environmental and social characteristics compared to the Emerging Market (EM) corporate bond universe, benchmarked against the JP Morgan Corporate EMBI Diversified index. Although this index serves as a standard reference for the EM Corporate Bond Universe, it does not align with the environmental and/or social characteristics the Sub-Fund promotes. Throughout the reporting period, the Sub-Fund successfully met its environmental and social goals, as detailed in subsequent sections. The assessment of the Sub-Fund's accomplishment of its promoted environmental and social characteristics was based on its performance relative to the benchmark, focusing on:

- Achieving a higher overall ESG quality score than the Index.
- Maintaining a lower Weighted Average Carbon Intensity (WACI) compared to the Index.
- Excluding companies violating UN Global Compact principles and other international norms, as indicated by an MSCI red overall controversy flag.

To ensure these objectives were met, specific exclusion criteria were implemented. The fund aimed to minimize its exposure to high-emitting entities by excluding companies deriving 20% or more of their revenues from thermal coal mining or linked to coal-based power generation. It also excluded companies with 10% or more revenues related to the unconventional oil and gas sector. Furthermore, companies failing to adhere to the UN Global Compact Principles, as flagged by MSCI, or those involved in controversial weapons, were also excluded.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	303.6	584.2
MSCI ESG Quality Score	6.31	5.28
Share of companies in breach of the UN Global Compact (MSCI)	0.0%	1.4%

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 29 December 2023

Over the course of the reporting period, the Sub-Fund successfully met its environmental and social objectives as follows:

MSCI ESG Quality Score: The portfolio's MSCI ESG Quality Score was 6.31, surpassing the Index's score of 5.28.

Weighted Average Carbon Intensity (WACI): The portfolio's WACI was 303.6 tCO2e per million dollars of revenues, significantly lower than the Index's 584.2 tCO2e/USD mn revenues, indicating a more carbon-efficient investment approach.

Share of companies in breach of UN Global Compact and other international norms: The portfolio had zero exposure to companies in breach of the UN Global Compact principles as indicated by the MSCI red overall controversy flag, in contrast to the benchmark, which had a share of 1.4%.

These achievements underscore the Sub-Fund's commitment to maintaining high environmental and social standards, differentiating it from the broader Index through better ESG quality scores, lower carbon intensity, and adherence to international norms.

And compared to previous periods?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. invested)	337.9	615.4
MSCI ESG Quality Score	7.5	5.5
Share of companies in breach of the UN Global Compact (MSCI)	0.0%	4.2%

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 29 December 2023

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*</sup>Index:JPM CEMBI Diversified

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund

<sup>\*</sup>Index:JPM CEMBI Diversified

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

Comparing the Sub-Fund's sustainability performance from the end of 2022 to 2023:

Weighted Average Carbon Intensity (WACI) dropped from 337.9 to 303.6 tCO2e/\$ million of revenues in the Sub-Fund, outperforming the Index's decrease from 615.4 to 584.2. The Sub-Fund continued to lead in carbon efficiency.

MSCI ESG Quality Score decreased slightly for the Sub-Fund from 7.5 to 6.31, but it still remained above the Index's drop from 5.5 to 5.28. Despite a small decline, the Sub-Fund kept its solid ESG standing.

Share of Companies in Breach of the UN Global Compact stayed at 0% for the Sub-Fund, showing unwavering adherence to ethical standards. The Index improved, reducing from 4.2% to 1.4%, indicating a market trend towards better compliance.

Overall, the Sub-Fund maintained its lead in ESG performance and carbon efficiency against the Index, demonstrating continuous commitment to sustainability, despite a slight decline in its ESG score.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As of December 29, 2023, this Sub-Fund had 16.9% of sustainable investments which contribute to the following objectives:

- environmental objectives (12%): such as, but not limited to, climate change mitigation, water and waste management, and energy efficiency.
- social objectives (4.9%): such as, but not limited to, small and medium-size enterprise financing/microfinancing, telecommunication in rural areas

Such sustainable investments included investments in bonds issued by corporate issuers who had a share of their revenues in activities contributing to environmental or social objectives (for instance renewable and alternative energies) as well as green/social or other types of sustainability bonds, provided that these issuers do no significant harm and are companies of good governance.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology. This methodology encompasses Principal Adverse Impacts, controversies, misalignment with SDGs, and ESG/governance quality checks. Based on our in-house methodology, we determined that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. To this end, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of controversies (social, environmental, governance, labor compliance), SDG alignment (activities strongly misaligned with environmental or social SDGs are not considered sustainable), overall ESG and governance quality, and the exclusion of certain harmful sectors.

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above. In addition, some PAIs were also taken into account through the Sub-Fund's objective of maintaining a lower Weighted Average Carbon Intensity than the Index.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund excludes companies assessed by MSCI as in breach of UN Global Compact and more generally in violation of international norms (Red controversy flagged). In addition, it also seeks to limit exposure to companies assessed as being in violation of the UN Global Compact or of the OECD Guidelines for Multinational Enterprises according to the analyses of other external providers.

Companies identified as violating norms by both MSCI and Sustainalytics are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

		As a	t 30/12/2	2022	As at	29/12/202	23	
Indicator	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Planned actions
PAI 3	GHG intensity of investee companies (tCO2eq/EURm revenue)	339.7	80.1%	88.3%	316,065	87,49%	96,10%	The fund reported a lower greenhouse gas intensity, indicating cleaner investments.
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	1.1%	78.8%	88.3%	0	91,29%	96,10%	Investments in companies violating UNGC or OECD guidelines dropped to zero, showing better compliance with global standards.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0.0%	88.3%	88.3%	0	96,10%	96,10%	companies with exposure to controversial weapons are excluded.

Source: UBP, Sustainalytics, MSCI ESG Research, as of 30 December 2022

From the end of 2022 to 2023, the Sub-Fund's sustainability indicators evolved significantly:

PAI 3 (GHG Intensity): The Sub-Fund reduced its greenhouse gas intensity, reflecting a shift towards cleaner investments and a broader scrutiny of climate risks. This aligns with its planned actions to maintain a lower WACI than the index by focusing on issuers' emissions and climate strategies. The notable exclusion of companies linked to thermal coal and unconventional oil and gas underscores this commitment.

PAI 10 (UNGC/OECD Violations): The drop to zero investments in companies violating UNGC or OECD guidelines by the end of 2023 demonstrates improved compliance with these critical global standards. This progress is particularly noteworthy considering the specific action taken against a company (Tencent) flagged for breaching UNGC principles, highlighting the fund's proactive engagement and divestment strategy when necessary.

PAI 14 (Controversial Weapons): The Sub-Fund maintained zero investment in controversial weapons. This consistency with planned actions to exclude such investments emphasizes the Sub-Fund's strict adherence to ethical criteria.

Overall, these changes reflect the Sub-Fund's enhanced sustainability focus and rigorous implementation of its investment process, particularly in addressing climate risks and ethical concerns, leading to stronger sustainability outcomes.

### What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: Calendar year 2023

Largest investments	Sector	Country	% Assets

Our approach relies on bottom-up research to assess companies' practices and commitments to ESG.

BANORTE has demonstrated a strong commitment to ESG practices. The company is recognised for, for its efforts in sustainability, social responsibility, and governance, resulting in an MSCI ESG rating of AA positioning it favorably among banks globally and within its industry group. The bank is committed to financing projects that have a beneficial impact on the environment and society.

MEDCO BELL PTE LTD, operating under the diversified financials industry group in Singapore, has a . MedcoEnergi, the parent company, highlights its commitment to sustainability and ESG principles through various initiatives. For instance, it has announced acquisitions aimed at enhancing its production capabilities while maintaining a focus on high-quality, cash-generative assets with growth potential. These acquisitions are expected to significantly contribute to the company's daily production and future reserves, reflecting a strategic approach to sustainable growth. MedcoEnergi emphasizes its strong ESG record and commitment to net zero, positioning itself to benefit from the rapid economic growth in Southeast Asia and the expanding demand for clean energy.

Both above mentioned examples reflect on the Investment Manager's bottom-up ESG assessment that consists in analyzing companies' ESG metrics, policies and targets case by case in order to support, through our investments, companies that are working and investing to improve in key metrics.

### What was the proportion of sustainability-related investments?

#### 16.9%

#### What was the asset allocation?

#### Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	86.40%	90.10%
#2 Other	13.60%	9.90%
#1A Sustainable	7.80%	16.90%
#1B Other E/S characteristics	78.60%	73.20%
Taxonomy-aligned	0.00%	0.10%
Other environmental	2.40%	11.90%
Social	5.40%	4.90%

Source: UBP, as of 29 December 2023

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

Sector	% Assets	
Financials		33.88%
Oil & Gas		12.62%

Cash		4.66%
Pulp & Paper		2.90%
Sovereign		2.46%
Real Estate		0.74%
Transport		0.56%
Total		100.00%

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

The use of different data sources and systems may result in limited variations across the various sections of the present report.

Investments were made in sectors such as industrial and commercial real estate, utilities, banks, consumer, and retail in Mexico; pulp & paper, sugar & ethanol, and protein in Brazil; and oil & gas and utilities in Colombia. These sectors were selected for their potential benefits from economic trends like nearshoring and global exports. By avoiding investments in sectors with high environmental risks, such as the oversupplied and demand-challenged Chinese residential real estate market, and focusing on sectors that can directly impact sustainability, such as utilities, these efforts indirectly contribute to environmental goals. Furthermore, investing in industries that support economic growth without worsening environmental degradation, as seen in the mentioned Latin American sectors, aligns with broader ESG objectives, including reducing the carbon footprint.

### To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

In the absence of reported information on taxonomy-aligned revenues by companies, the Investment Manager considers that this sub-fund had no taxonomy-aligned investments as at 29 December 2023.

		e financial pro ying with the EL	est in fossil gas and/ my?	or nuclear	energy related	activities
	YES					
		In fossil gas	in nuclear energy			
$\boxtimes$	NO					

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment, Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 98.5% of the total net assets. The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear)

Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Transitional activities :0% Enabling activities: 0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

11.9%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

This calculation is based on the share of companies' revenues associated with an environmental objective which do not report under the EU Taxonomy regulation or which target environmental objectives not covered by that regulation.

#### What was the share of socially sustainable investments?

4.9%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

This calculation is based on the share of companies' revenues associated with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund held 9.9% in other net assets. These include:

- primarily cash positions and other net assets for liquidity and risk management purposes. While there was no minimum environmental or social safeguards on these investments, this is not expected to have any impact on the sustainability objective of this Sub-Fund.
- bonds which were not ESG-rated by an external provider. These bonds, however, passed the Sub-Fund's exclusion criteria, which constitue minimum environmental and social safeguards. Source: UBP, as of 29 December 2023

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

At least 90.1% of the net assets of this Sub-Fund were kept aligned with the environmental and social characteristics promoted by the strategy.

The Investment Manager strictly adhered to the sustainability processes and safeguards described in the prospectus, which included evaluating all investments against sustainability criteria with hard thresholds that had to be met for inclusion. This also involved applying various exclusions and ongoing monitoring of the portfolio. During the reporting period, the Sub-Fund applied and adhered to exclusion rules to further reduce exposure to carbon-intensive sectors and companies reported to be in violation of international standards. The exclusion criteria included:

- companies with an MSCI ESG Research rating below BB;
- companies in breach of the UN Global Compact or other international norms as flagged by the Red Overall Controversy Flag from MSCI ESG Research;

are sustainable investment s with an environmen tal objective that do not take into account the criteria for environmen

tally

sustainable economic activities

under the

Taxonomy.

- companies involved in controversial or nuclear weapons, with exposure to unconventional oil & gas revenues (revenue threshold: 10%), to thermal coal extraction (20%), or with revenues from coal-powered utilities (20%);
- companies involved in tobacco production or with revenues derived from other tobacco-related activities (5%).

As part of the investment process, most companies held in the portfolio were ESG-assessed. Additionally, the Investment Manager engaged with some of the investee companies when it was deemed necessary. For instance, in 2023, several ESG questionnaires were sent to companies, and meetings were arranged to engage directly with the investee companies and follow up on specific issues or to discuss broader E, S, and G strategy questions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark.

How did the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
  N/A
- How did this financial product perform compared with the broad market index?
   N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### SFDR SCHEDULE- Annex IV

Sustainable
investment means
an investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and

that the investee

companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EM RESPONSIBLE LOCAL BOND

Legal entity identifier: O00000869\_00000145

### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?							
● ● □ Yes	● ○ 図 No						
☐ It made sustainable investments with an environmental objective: %  ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy  ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>☑ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.6% of sustainable investments</li> <li>☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>☑ with a social objective</li> </ul>						
☐ It made sustainable investments with a social objective%	☐ It promoted E/S characteristics, but <b>did not make any sustainable investments</b>						

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

As of December 29, 2023, 94.5% of the investments in the financial product were utilized to achieve the environmental and social characteristics. The remaining 5.5% of the portfolio was held in cash.

The PAI used to measure the promotion of social characteristics was the number of investee countries subject to social violations, identifying 18 countries without violations.

The Investment Manager strictly adhered to the sustainability processes/safeguards described in the prospectus. This included evaluating all investments against sustainability criteria with hard thresholds that needed to be met for inclusion, applying various exclusions, and ongoing monitoring of the portfolio.

This Sub-Fund achieved its performance by investing primarily in bonds issued by emerging market (EM) sovereign and supranational issuers denominated in local currencies. It offered a higher overall Environmental, Social, and Governance (ESG) quality than the EM sovereign local bond universe, as measured by the JP Morgan ESG GBI-EM Global Diversified Index. The analysis considered the extent to which a sovereign has developed robust ESG policies and demonstrated a strong track record in managing its specific ESG risks or opportunities. The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*
ESG Quality Score	5.7	4.8
Number of Investee Countries subject to social violations (Sustainalytics PAI)	0	0

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

\*Index: JPM ESG GBI EM Global Diversified

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

#### And compared to previous periods?

Sustainability indicator	Sub-fund	Index*
ESG Quality Score	6.4	4.7
Number of Investee Countries subject to social violations (Sustainalytics PAI)	0	0

At the end of 2022, the Sub-fund's ESG Quality Score was 6.4, with the Index at 4.7.

By the end of 2023, the Sub-fund's ESG Quality Score had slightly decreased to 5.7, while the Index's score had slightly increased to 4.8. This change indicates a slight decrease in the Sub-fund's ESG performance over the year, contrasting with a minor improvement in the Index's score. Last year presented challenges amid evolving market dynamics, such as fluctuations in the economic stability of investee countries or changes in their social policies, which could have contributed to the slight dip in its ESG score.

Throughout both the end of 2022 and the end of 2023, there were zero investee countries subject to social violations for both the Sub-fund and the Index, according to Sustainalytics PAI indicators. This consistency demonstrates a continuous approach to avoiding social risks within the investment portfolio.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Sub-Fund, as of 29<sup>th</sup> December, 2023, were primarily focused on financing projects that have a positive impact on the environment and society. These investments were made through green, social, and sustainability bonds issued by Emerging Market (EM) sovereign and supranational entities. Each type of bond supported specific sustainable development objectives, contributing significantly to broader sustainability goals. For instance:

The green bonds helped finance, among others, the following objectives:

- Climate Change Adaptation
- Energy Efficiency,

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Renewable Energy projects
- Green Building Construction
- Clean Transportation
- Sustainable Water/Watewater management

The social bonds helped finance the following objectives:

- Access to Essential Services
- Alleviate Unemployment

SDG bonds also helped to direct capital to a range of Sustainable Development Goals (e.g. SDG 4: Quality Education, SDG 7: Affordable and Clean Energy or SDG 13: Climate Action).

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology covering Principal Adverse Impacts, controversies, misalignment with SDGs, and ESG/governance quality checks. Based on our in-house methodology, we consider these sustainable investments did not cause significant harm to any environmental or social sustainability objective. To ascertain this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of controversies (social, environmental, governance, labour compliance), SDG alignment (activities strongly misaligned with environmental or social SDGs are not deemed sustainable), overall ESG, and governance quality, as well as the exclusion of some harmful sectors.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

		As at 30/12/2022		022	As at 29/12/2023			
Indicato r	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Planned actions
PAI 16	Number of Investee Countries subject to social violations	0	75.8%	98.8%	0	75.8%	98.8%	The investment manager continues to seek to limit exposure to sovereign issuers subject to social violation through its research and investment process
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0%	0.0%	0.0%	0%	1,14%	1,14%	The sub-fund continues to formally exclude investments in companies in breach of UN Global Compact and to limit any investment in company violating the OECD Guidelines for Multinational Enterprises.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	0.0%	0.0%	0%	1,14%	1,14%	Investments in companies involved in controversial weapons are banned

Source: UBP, Sustainalytics, as of 29 December 2023

PAI 16: Eligible sovereign and supranationals bonds – Covered: Sovereign bonds

PAI 10, 14: Eligible corporate bonds - Covered: corporate bonds

The fund considers PAI 16, and had no investments in bonds issued by sovereign issuers subject to social violations.

The fund also considers PAI 10 (share of investee companies involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%) and PAI 14 (share of investee companies involved in the manufacturing or selling of controversial weapons), which are both managed through exclusions. At the end of 2023, the fund had no investments in corporate bonds.

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

### To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the fund did not commit to hold sustainable investments with an environmental objective aligned with the EU Taxonomy, it held one green bond, issued by the European Investment Bank, which was aligned with the EU Green Bond standards and the EU Taxonomy and accounted for 2.9% of the funds' assets. This bond helps finance climate mitigation through projects in renewable energy, energy efficiency, or electric rail infrastructure.

Did the financial product invest in fossil gas and/or nuclear energy related activ complying with the EU Taxonomy?								
	YES							
		In fossil gas		in nuclear energy				
$\boxtimes$	NO							

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from

green activities of

investee
companies
capital
expenditure
(CapEx) showing
the green
investments made
by investee
companies, e.g.,

for a transition to a

green economy.

- operational
expenditure
(OpEx) reflecting
green operational
activities of
investee
companies.

Taxonomy aligned investments included sovereign obligations

Opex 0,0% 100,0%

Capex 2,9% 97,1%

Tumover 97,1%

50,0% 100,0%

\*Taxonomy aligned investments
Other investments

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: estimated Taxonomy-alignment, Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 25% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

10.7%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

These investments included green bonds issued by sovereign and supranational issuers, as well as some sustainability/SDG bonds which contributed to environmental objectives but were not issued as EU Green Bonds, nor reporting any taxonomy alignment.

sustainable investment s with an environme ntal obiective that **do not** take into account the criteria environme ntally sustainable economic activities under the

EU Taxonomy.

### What was the share of socially sustainable investments?

7%

These investments included social bonds issued by sovereign and supranational issuers, as well as some sustainability bonds which contributed to social objectives.

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29December 2023

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

5.5%

Source: UBP, as of 29 December 2023

Other investments included cash and other net assets for liquidity management. There were no minimum environmetal or social safeguards on those holdings, however, it is not expected to have any impact on the sustainability objective of this Sub-Fund.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This Sub-Fund invested over 94.5% of its assets in bonds from sovereign and supranational issuers aligned with the environmental or social characteristics promoted by the Sub-Fund. This included, but was not limited to, sustainable investments (over 20%) in the form of green, social, or sustainability bonds assessed as causing no harm.

The Investment Manager strictly adhered to the sustainability processes and safeguards described in its prospectus. This adherence included evaluating all investments against sustainability criteria with hard thresholds that needed to be met for inclusion, applying various exclusions, and continuously monitoring the portfolio. In particular, the Investment Manager focused on investing in green, social, or sustainability bonds from sovereign and supranational issuers, contributing to helping emerging countries finance their sustainable development in the future.

How did this financial product perform compared to the reference benchmark?

No reference benchmark.

### SFDR SCHEDULE- Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EM RESPONSIBLE SOVEREIGN BOND

Legal entity identifier: O00000869\_00000112

### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?							
● ● □ Yes	•	⊠ No					
☐ It made sustainable investments with an environmental objective: % ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 14.3% of sustainable investments  ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  ☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  ☑ with a social objective					
☐ It made sustainable investments with a social objective%		It promoted E/S characteristics, but <b>did not</b> make any sustainable investments					

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

As of December 29, 2023, 91.3% of the financial product's investments were directed towards achieving the environmental and social characteristics. The remaining 8.7% of the portfolio was allocated to other investments.

The main PAI used to measure the promotion of social characteristics was based on the number of investee countries subject to social violations, with 15 countries having no violations.

The Investment Manager strictly adhered to the sustainability processes/ safeguards described in the prospectus, including evaluating all investments against sustainability criteria with hard thresholds required to be met for inclusion, applying various exclusions and on-going monitoring of the portfolio.

This Sub-Fund delivered performance by investing in bonds issued primarily by emerging market (EM) sovereign issuers that offered a greater overall Environmental, Social and Governance (ESG) quality than the EM sovereign bond universe, as measured by the JP Morgan EMBI Global Diversified Index. The analysis takes into account the extent to which a sovereign has developed robust ESG policies and demonstrated a strong track record of performance in managing its specific level of ESG risks or opportunities.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*
ESG Quality Score	4.4	3.9
Number of Investee Countries subject to social violations (Sustainalytics PAI)	2	3

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 29 December 2023

\*Index: JPM EMBI Global Diversified

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

The fund's ESG credentials, as measured by the MSCI ESG Quality Score, are better than those of its investment universe, as measured by the index.

The fund held investments in 2 countries subject to social violations (Ukraine and Ecuador) compared to 3 in the index, as estimated by Sustainalytics. The investment team maintains investments in Ecuador, encouraged by the country's economic reforms, such as the VAT increase and tax adjustments. These reforms aim to stabilize the economy, reduce deficits, and secure support from the IMF. Ecuador focused on several key social improvements. Organizations emphasized enhancing ethics and integrity. There's been a push towards greater transparency and the implementation of robust ESG metrics. Despite political challenges and the need for further fiscal discipline, Ecuador's strategic actions make it an appealing investment option. Regarding Ukraine, the team believes the country is making efforts to restructure its foreign debt before deadlines, demonstrating proactive steps to stabilize its economy and sending a positive signal to the market. Ukraine made also social advancements by focusing on enhancing supply chain security, resilience, and transparency, alongside transitioning its workforce to support clean energy initiatives and improving waste management regulations

#### Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

### And compared to previous periods?

Sustainability indicator	Sub-fund	Index*
ESG Quality Score	4.2	3.1
Number of Investee Countries subject to social violations (Sustainalytics PAI)	1	2

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

\*Index: JPM EMBI Global Diversified The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

Data is as of 30 December 2022 reports an ESG Quality Score of 4.2 for the Sub-fund and 3.1 for the Index, compared to a higher score of 4.4 for the Sub-fund and 3.9 for the Index at the end of 2023. This change indicates an improvement in the ESG Quality Score for both the Sub-fund and the Index.In the previous period, the fund is associated with one country (Ukraine), compared to the index's two countries. At the end of 2023, it shows an increase to two countries (Ukraine and Ecuador) for the fund, versus the index's three countries. This shift suggests a broader scope of investee countries with social violations in the latter scenario but still fewer than those in the Index. These changes and updates indicate an evolving investment landscape and a

dynamic approach to assessing and addressing sustainability within the fund's portfolio over time.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As of December 29, 2023, the sustainable investments made by the Sub-Fund aimed to achieve several key objectives through the allocation of capital to green, social, and sustainability bonds of emerging market (EM) sovereign and supranational issuers. These investments supported projects with significant positive impacts on both the environment and society. For instance:

The green bonds helped finance, among others:

- Climate Change Adaptation
- Energy Efficiency,
- Renewable Energy projects
- Clean Transportation
- Sustainable Water/Watewater management
- Sustainable Management of Living Resources

#### The social bonds helped finance:

- Access to Essential Services
- Alleviate Unemployment

The Sustainability bonds, also helped to direct capital to a range of environmental or social activities (e.g. preventive healthcare, food security and sustainable food systems or affordable basic infrastructure).

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology, which covers Principal Adverse Impacts, controversies, misalignment with SDGs, and ESG/governance quality checks. Based on our inhouse methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. To this end, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of controversies (social, environmental, governance, labour compliance), SDG alignment (activities strongly misaligned with environmental or social SDGs are not deemed sustainable), overall ESG and governance quality, as well as the exclusion of some harmful sectors.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through investment research, the application of an exclusion list, and norms-based screening. In particular, we tested compliance with mandatory PAIs for sustainable investments, both directly and indirectly, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

	As at 30/12/2022		As at 29/12/2023					
Indicator	Metrics	Value	Covere d assets	Eligible Assets	Value	Covere d assets	Eligible Assets	Planned actions
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0%	2.9%	2.9%	0%	12.2%	13.1%	The fund excludes investments in companies in breach of UN Global Compact and will also continue to monitor and limit any investments in companies in breach of the OECD guidelines for Multinational Entreprises.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	2.9%	2.9%	0%	13.1%	13.1%	No new investments. Indicates a consistent application of exclusion criteria related to controversial weapons.
PAI 16	Number of Investee Countries subject to social violations	1	95.0%	95.0%	2	70.7%	79.1%	The increase of number of investee countries subject to social violations reflect a conviction from the investment team with regards to the improvement of social aspect for those countries.

Source : UBP, Sustainalytics, as of 29 December 2023

PAI 10-14: Eligible assets: corporate bonds

PAI 16: Eligible sovereign and supranationals bonds - Covered: Sovereign bonds

Regarding PAI 10, the share of investments involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises has remained stable at 0%. The planned actions include excluding investments in companies that breach the UN Global Compact and continuing to monitor and limit investments in companies that violate the OECD guidelines.

For the stance on controversial weapons (PAI 14), both periods converge on the Sub-Fund's ongoing policy to exclude investments in companies associated with controversial weapons. This consistency underscores a steadfast commitment to ethical investment principles.

When it comes to handling social violations in investee countries (PAI 16), the previous period highlights a strategy of cautious investment, with a focus on limiting exposure to countries with social violations through the use of a sovereign scoring model. At the end of 2023, however, the investment manager decided to enhance its analysis to take into account whether a country was actually showing signs of potential social improvements in order to rewards positive changes.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: Calendar year 2023

# M

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund held some green bonds issued by sovereign or supranational issuers, none of which were issued under the EU Green Bond standards. In the absence of enough information on the potential taxonomy-alignment of the financed projects, the Investment Manager considers that this subfund had no taxonomy-aligned investments as at 29 December 2023.

Did the financial product invest in fossil gas and/or nuclear energy related activities
complying with the EU Taxonomy?

YES		
	In fossil gas	in nuclear energy
NO		

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: estimated Taxonomy-alignment, Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets. The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear)

Other investments mean Non Taxonomy-aligned

N/A

- What was the share of investments in transitional and enabling activities?
- How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

No change. The fund did not hold any investments in companies with taxonomy-aligned revenues in previous periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

10%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

These investments included green bonds issued by sovereign and supranational, not issued under the EU Green Bond standards, as well as sustainability bonds which contributed to an environmental objective.

Taxonomyaligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting

### What was the share of socially sustainable investments?

4.3%

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under the EU

Taxonomy.

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023 These investments included social bonds issued by sovereign issuers, as well as sustainability bonds which contributed to a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

10.1%

Source: UBP, as of 29 December 2023

Other investments primarily included cash and other net assets for liquidity management, as well as foreign exchange (FX) for hedging or exposure, and derivatives for credit or duration management. There were no minimum environmental or social safeguards applied to these investments.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This Sub-Fund invested over 91.3% of its assets in bonds from emerging market issuers that were aligned with the environmental or social characteristics promoted by the Sub-Fund, including but not limited to sustainable investments in the form of green, social or sustainability bonds which were assessed as causing no harm.

The Investment Manager strictly adhered to the sustainability processes/ safeguards described in its prospectus, including evaluating all investments against sustainability criteria with hard thresholds required to be met for inclusion, applying various exclusions and on-going monitoring of the portfolio.

In particular, the Investment Manager paid particular attention to investing in green, social or sustainability bonds from sovereign and supranational issuers, which contributed to help emerging countries finance their future sustainable development.

#### SFDR SCHEDULE- Annex IV

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and

that the investee companies follow

good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of

Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - EMERGING MARKET CORPORATE BOND SHORT DURATION Legal entity identifier: 000000869\_0000084

# **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? ● ■ Yes ⊠ No ☐ It made sustainable investments ☐ It promoted Environmental/Social (E/S) with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments ☐ with an environmental objective in economic ☐ in economic activities that qualify as activities that qualify as environmentally environmentally sustainable under sustainable under the EU Taxonomy the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as in economic activities that do not environmentally sustainable under the EU as environmentally Taxonomy sustainable under the EU Taxonomy ☐ with a social objective ☐ It made sustainable investments ☑ It promoted E/S characteristics, but did not with a social objective% make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Sub-Fund aims to promote better environmental and social characteristics than those of the Emerging Market (EM) corporate bond universe, as measured by the JP Morgan Corporate EMBI Diversified Index. Although this index is a standard reference representing the EM Corporate Bond Universe, it does not align with the environmental and/or social characteristics advocated by this Sub-Fund. These characteristics include superior ESG practices, lower carbon intensity, and greater adherence to international norms such as the UN Global Compact, compared to the Index.

The sub-fund succeeded in attaining each of the environmental and social characteristics promoted as indicated in the table below:

- it achieved a higher overall ESG quality score than the Index.
- it presented a lower Weighted Average Carbon Intensity (WACI) than the Index.
- it had no investments incompanies in breach of UN Global Compact and other international norms, as measured by the MSCI Red Overall Controversy Flag.

Certain exclusion criteria are applied to ensure that the objectives are met. The fund seeks to limit its exposure to high-emitting companies, for example, by excluding companies where 20% or more of revenues are derived from thermal coal mining or are linked to coal-based power generation. Additionally, the fund excludes companies where revenues are 10% or more related to the unconventional oil and gas sector. Companies that do not comply with the UN Global Compact Principles as flagged by MSCI or companies exposed to controversial weapons are also excluded.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### • How did the sustainability indicators perform?

Sustainabiliy indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	483.6	584.2
MSCI ESG Quality Score	5.5	5.3
Share of companies in breach of the UN Global Compact	0.00%	1.38%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

\*Index: JPM CEMBI Diversified

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

During the reporting period, the Sub-Fund successfully met its environmental and social objectives:

- MSCI ESG Quality Score: The portfolio achieved an MSCI ESG Quality Score of 5.5, which surpassed the Index score of 5.3.
- Weighted Average Carbon Intensity (WACI): The portfolio's WACI of 483.6 tCO2e per million dollars of revenues was lower than the Index's 584.2 tCO2e/mn revenues, demonstrating better carbon efficiency.
- Compliance with UN Global Compact: The portfolio had no exposure to companies in breach of UN Global Compact and other international norms, as measured by the MSCI Red Overall Controversy Flag, whereas the benchmark showed a share of 1.38%.

#### • And compared to previous periods?

Sustainabiliy indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	533.8	615.4
MSCI ESG Quality Score	6.3	5.5
Share of companies in breach of the UN Global Compact	0.0%	4.2%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

\*Index: JPM CEMBI Diversified

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Overall, while the Sub-Fund experienced a slight decrease in its ESG Quality Score from the end of 2022 to 2023, it continued to outperform the Index in all sustainability indicators. This includes achieving lower carbon intensity and upholding strict compliance with global norms, highlighting its ongoing dedication to environmental and social responsibilities.

- MSCI ESG Quality Score: at the end of 2022, the portfolio's MSCI ESG Quality Score stood at 6.3, surpassing the Index's score of 5.5. By the end of 2023, there was a noticeable decline in the portfolio's score to 5.5; however, it continued to remain above the Index, which also decreased slightly to 5.3. Despite the reduction, the portfolio consistently maintained a higher ESG quality than the Index.
- Weighted Average Carbon Intensity (WACI): In terms of carbon intensity, the Sub-Fund demonstrated significant improvement. At the end of 2022, the WACI for the portfolio was recorded at 533.8 tCO2e/USD million revenues, which was lower than the Index's 615.4 tCO2e. By the end of 2023, the portfolio further reduced its carbon intensity to 483.6 tCO2e per million dollars of revenues, in contrast to the Index, which also saw a reduction but to a higher 584.2 tCO2e/USD mn revenues. This indicates ongoing progress in reducing the portfolio's carbon footprint relative to the Index.
- Compliance with UN Global Compact: Regarding compliance with international norms, the portfolio had no exposure to companies in breach of the UN Global Compact and other international norms at the end of both 2022 and 2023. This was a consistent performance, underscoring the Sub-Fund's commitment to high ethical standards. In comparison, the Index improved from having 4.2% of its companies in breach at the end of 2022 to 1.38% at the end of 2023.
  - What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As at 30/12/2022		As at 29	As at 29/12/2023			
Indica tor	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Planned actions

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

Our approach relies on bottom-up research to assess companies' practices and commitments to ESG.

GEOPARK, an independent E&P company established in 2002 and listed on the NYSE among other exchanges, operates primarily in Colombia but is expanding into Brazil and Ecuador. The company manages significant oil reserves and is recognized for its strong management, liquidity, and low operational costs. GeoPark is considered a compelling investment due to its stable financial metrics, manageable leverage, and its ability to remain profitable even when Brent crude is below \$30 per barrel. Its public, transparent status boosts credibility, and the potential for significant free cash flow, estimated between \$50-100 million, promises robust returns through dividends and stock repurchases. Additionally, GeoPark's strategy to develop and diversify assets outside Colombia reduces regional risks and aligns with its commitment to expand its reserve life. Enhancements to its ESG initiatives, particularly climate-science-based targets aiming for a 35-40% reduction in GHG intensity by 2025 and 40-60% by 2030, with a goal of net zero by 2050, bolster its sustainability profile, making it attractive to socially conscious investors. These factors collectively justify GeoPark's premium in the market and highlight its growth prospects amid challenging regulatory environments.

The above mentioned example reflect on the Investment Manager's bottom-up ESG assessment that consists in analyzing companies' ESG metrics, policies and targets case by case in order to support, through our investments, companies that are working and investing to improve in key metrics especially in the controversial sectors such as O&G and mining where transition to a significant reduction in carbon footprint is most needed, as it will have the greatest impact on the reduction of global greenhouse gas emissions.

### What was the proportion of sustainability-related investments?

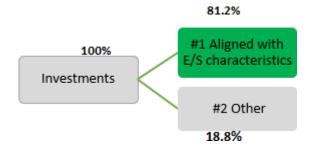

0%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	97.90%	81.20%

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

As mentioned above, investments were primarily allocated to the following sectors: Sovereign, Industrial, Technology, Media, and Telecommunications (TMT), Oil & Gas, and Consumer. These sectors were chosen based on a strategy that includes balancing stable returns with growth opportunities and diversifying risks. The investments in Oil & Gas, despite its environmental scrutiny, and other sectors are aimed at companies committed to reducing their carbon footprint, reflecting an awareness of sustainable investment practices.

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment, Sustainalytics, as of 29 December 2023
The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 77.6% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

NA

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund held 18.8% in other net assets, including cash positions for liquidity and risk management purposes for which there was no minimum environmental or social safeguards on these investments. The fund also held some issuers with no ESG rating from external provider, but which passed all relevant exclusion screens based on internal research which provided some E and S safeguards

Overall, this share of "other" investments is not expected to have any material impact on the sustainability objective of this Sub-Fund.

Source: UBP, as of 29 December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager strictly adhered to the sustainability processes and safeguards described in the prospectus, which included evaluating all investments against sustainability criteria with hard thresholds that had to be met for inclusion. This also involved applying various exclusions and ongoing monitoring of the portfolio. During the reporting period, the Sub-Fund applied and adhered to exclusion rules to further reduce exposure to carbon-intensive sectors and companies reported to be in violation of international standards. The exclusion criteria included:

- companies with an MSCI ESG Research rating below BB;
- companies in breach of the UN Global Compact or other international norms as flagged by the Red Overall Controversy Flag from MSCI ESG Research;
- companies involved in controversial or nuclear weapons, with exposure to unconventional oil & gas revenues (10%), to thermal coal extraction (20%), or with revenues from coal-powered utilities (20%);
- companies involved in tobacco production.

As part of the investment process, most companies held in the portfolio were ESG-assessed. Additionally, the Investment Manager engaged with some of the investee companies when it was deemed necessary. For instance, in 2023, several ESG questionnaires were sent to companies, and meetings were arranged to engage directly with the investee companies and follow up on specific issues or to discuss broader E, S, and G strategy questions.

### SFDR SCHEDULE- Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name: UBAM - EURO CORPORATE IG SOLUTION** 

Legal entity identifier: O00000869\_00000116

## **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective? ● ■ Yes ⊠ No ☐ It made sustainable investments with an environmental objective: characteristics and while it did not have as % its objective a sustainable investment, it had a proportion of 40% of sustainable investments ☐ in economic activities that qualify as ☐ with an environmental objective in economic environmentally sustainable under the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☑ with an environmental objective in economic ☐ in economic activities that do not activities that do not qualify as environmentally as environmentally sustainable under the EU sustainable under the EU Taxonomy **Taxonomy** with a social objective ☐ It made **sustainable investments** It promoted E/S characteristics, but **did not** with a social objective% make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable

investments with an

environmental objective might be

aligned with the

Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope) are based on internal environmental and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics discloses the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score.

The indicator used to measure the attainment of the environmental characteristics discloses the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries.

As shown in the following section, the share of countries in the bottom 10% for the investment team's Sovereign E score was 0.0% at the reporting date, and the share of countries in the bottom 10% for the investment team's Sovereign S score was 0.0%. E/S characteristics promoted were met based on the selected indicators

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### • How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund

Source: UBP, as of 30 December 2022 - only bond investments are considered - not derivatives

The sustainability indicators are unchanged at 0.0%. It highlights environmental and/or social characteristics promoted by this financial product are met.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Sub-Fund intends to invest a minimum of 10% of its investment in green bonds or sustainability bonds with environmental objectives ("Green Bonds"). Green bonds enable capital-raising and investment for new and existing projects with environmental benefits.

As at 29.12.2023, the allocation to green bonds in the portfolio was 35.6%, considered environmentally sustainable investments, as they passed UBP's Do No Significant Harm (DNSH) and Minimum Safeguards (MS) criteria. These helped finance projects in Clean Transportation, Natural Resources and Land Use, Energy Efficiency, and Renewable Energy, among others.

The fund also held 4.5% in social bonds, financing socioeconomic advancement and access to essential services in particular. While the fund has no commitment to hold socially sustainable investments at all times, these bonds also passed UBP's DNSH and MS criteria and are thus considered as "socially sustainable investments."

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

This Sub-Fund only considers PAIs for investments in sovereigns. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market is not incorporated in the consideration of PAIs on sustainability factors.

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES		
	☐ In fossil gas	in nuclear energy

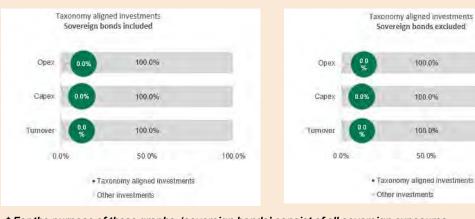

☑ NO

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g.,
  for a transition to
  a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

100.0%

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

#### What was the share of investments in transitional and enabling activities?

We do not have reported information on the split between enabling and transitional activities at the time of writing.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

We have not reported information on the split between enabling and transitional activities in previous reference periods.

sustainable investments with an

environment

al objective that **do not** 

account the criteria for environment

Taxonomy.

take into

ally sustainable economic activities under the FU What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

35.6%.

Source: UBP, as of 29 December 2023

None of the use-of-proceeds bonds held in the fund were EU Green Bonds and, while several bonds financed climate mitigation and adaptation projects, none of them had reported any taxonomy alignment at the time of writing this report. Thus the share of sustainable investments with an environmental objective that were not aligned with EU Taxonomy was 35.6%.

What was the share of socially sustainable investments?

4.5%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"Other" accounted for 5.1%. It consisted of cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. There were no minimum environmental or social safeguards to those investments."

Source: UBP, as of 29 December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment process that is the fundation of the promotion of the environment or social characteriscs by the financial product was implemented: The ESG investment strategy is based on several pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy
  (available on <a href="https://www.ubp.com/en/investment-expertise/responsible-investment">https://www.ubp.com/en/investment-expertise/responsible-investment</a>). In
  addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN
  sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk
  countries", while any investment in FATF "jurisdictions under increased monitoring" are subject
  to due diligence and approval.
- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

 External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer. o A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

No shareholder engagement relating to the environmental or social characteristics promoted by the financial product were taken during the reporting period.

The Sub-Fund UBAM - CORPORATE EURO BOND has been merged into the Sub-Fund UBAM - EURO CORPORATE IG SOLUTION on 13/09/2023.

To comply with the EU taxonomy, the criteria for **fossil** gas

Include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES		
	☐ In fossil gas	in nuclear energy
⊠ NO		

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomyaligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Source: Reported Taxonomy-alignment data, Morningstar Sustainalytics, as of 29 December 2023
The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 17.8%% of the total net assets.
The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?
NA

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?  $\ensuremath{\mathsf{N/A}}$ 

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other accounted for 5.9%. It consisted of cash, cash equivalents and derivatives for liquidity management and efficient portfolio management. There were no minium environmental or social safeguards to those investments

Source: UBP, as of 29December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment process that is the fundation of the promotion of the environment or social characteriscs by the financial product was implemented: The ESG investment strategy is based on several pillars that are bidding elements in the investment strategy with regards to the promotion of E/S characteristics. The below only apply to sovereign bonds. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market falls out of the scope of the ESG strategy.

- Exclusions applicable to this Sub-Fund, according to the UBP Responsible Investment policy (available on <a href="https://www.ubp.com/en/investment-expertise/responsible-investment">https://www.ubp.com/en/investment-expertise/responsible-investment</a>). In addition, in line with UBP's Group policy, securities under EU, HK, OFAC, Swiss, UK and UN sanctions are also excluded from this Sub-Fund, as well as investments in FATF "high-risk countries", while any investment in FATF "jurisdictions under increased monitoring" are subject to due diligence and approval.
- ESG integration.

ESG integration is implemented on sovereign issuers through a two-step process:

- External data sources provide information to an internal model to build a quantitative scoring system for each sovereign issuer.
- o A qualitative check follows this, where adjustments to the score are possible.

Sovereign issuers deemed to have severe ESG deficiencies, based on this approach, are excluded from the investment universe. ESG and financial views are combined to select the issuers. At least 80% of the Sub-Fund allocation to bonds is covered by the extra-financial analysis.

No shareholder engagement relating to the environmental or social characteristics promoted by the financial product were taken during the reporting period.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under the EU Taxonomy.

How did this financial product perform compared to the reference benchmark?

No reference benchmark.

Reference benchmarks are indexes to

the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicators used to assess social and environmental characteristics via investments in sovereign bonds (derivatives are out of scope) are based on internal environmental and social scores built using data from an external provider. The external provider incorporates data relevant to all 17 UN's Sustainable Development Goals.

The indicator used to measure the attainment of the social characteristics discloses the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal social score

The indicator used to measure the attainment of the environmental characteristics discloses the percentage of countries in this Sub-Fund that are in the bottom 10% of the considered universe on the internal environmental score.

The considered universe is currently made of more than 100 countries. As shown in the following section, the share of countries in the bottom 10% for the investment team's Sovereign E score was 0.0% at the reporting date, and the share of countries in the bottom 10% for the investment team's Sovereign S score was 0%. E/S characteristics promoted were met based on the selected indicators.

# Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee

companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does

socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The sustainability indicators are unchanged at 0.0%. It highlights environmental and/or social characteristics promoted by this financial product are met.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impact considerations for the Sub-Fund were implemeted from 29.12.2023.

This Sub-Fund only considers PAIs for investments in sovereigns. The derivative exposure in this Sub-Fund implemented to gain exposure to the high-yield market is not incorporated in the consideration of PAIs on sustainability factors.

		As at 30/12/2022 As at 29/12/		<b>/2023</b>

## SFDR SCHEDULE- Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - HYBRID BOND Legal entity identifier: 000000869\_0000121

## **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective? ● □ Yes ⊠ No ☐ It made **sustainable investments** ☑ It promoted Environmental/Social (E/S) with an environmental objective: characteristics and while it did not have as % its objective a sustainable investment, it had a proportion of 0.4% of sustainable investments ☐ in economic activities that ☑ with an environmental objective in qualify as environmentally economic activities that qualify as under the sustainable environmentally sustainable under the Taxonomy **EU Taxonomy** ☐ with an environmental objective in ☐ in economic activities that do not economic activities that do not qualify environmentally qualify as environmentally sustainable under sustainable under the EU the EU Taxonomy Taxonomy ☐ with a social objective ☐ It made **sustainable investments** It promoted E/S characteristics, but did with a social objective% not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicator used to assess the environmental characteristic promoted by this Sub-Fund is the percentage of corporate bond issuers in this Sub-Fund with a net zero emission plan.

The sustainability indicator used to assess the social characteristic is breach to United Nations Global Compact (UNGC). As shown in the following section, the share of companies with transparent policies towards net zero emission path was 55.0% at the reporting date, and the share of companies in breach of the UN Global Compact was 0.0%. Those indicators showed that the environmental and social characteristics promoted by this Sub-Fund were met.

Not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

## How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund
Share of companies with policies towards net zero emission path	55.0%
Share of companies in breach of UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research as of 29 December 2023

## And compared to previous periods?

The sustainability indicator – Share of companies with transparent policies toward Net Zero path – increased from 34.3% to 55.0%. This change reflects the implementation of the ESG process of the Sub-Fund, notably business involvement exclusions and integration of ESG factors when selecting companies for the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The sustainability indicator – Share of companies in breach of the UN Global Compact – is unchanged at 0.0%.

Sustainability indicator	Sub-Fund
Share of companies with policies towards net zero emission path	34.3%
Share of companies in breach of UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held 0.4% taxonomy-aligned investments, whose objectives were primarily climate mitigation.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU Taxonomy regulation.

In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

## The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

Sector	% Assets
Financials	90.23%

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, four companies in which the Sub-Fund is invested have reported EU taxonomy aligned revenues (ENBW, ENEL, Grand City Properties, Veolia). Taking into account the weight of these companies in the portfolio, this resulted in a revenue-based investment of 0.4% of total assets.

The Investment Manager ensured that these companies did not significantly harm any other sustainable investment objectives by applying its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES
☐ In fossil gas ☐ in nuclear energy

☑ NO

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy obj—ctive - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 202"/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy aligned investments

Taxonomy aligned investments

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital
  expenditure
  (CapEx) showing
  the green
  investments made
  by investee
  companies, e.g.,
  for a transition to
  a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments in transitional and enabling activities?

We do not have reported information on the split between enabling and transitional activities at the time of writing.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

0%

What was the share of socially sustainable investments?

0%

#### SFDR SCHEDULE- Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - MEDIUM TERM US CORPORATE BOND

Legal entity identifier: O00000869\_00000040

## **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? ● ■ Yes ☐ It made sustainable investments with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.5% of sustainable investments ☐ in economic activities that qualify as environmentally sustainable under ☑ with an environmental objective in economic the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic ☐ in economic activities that do not activities that do not qualify as as environmentally environmentally sustainable under the EU sustainable under the EU Taxonomy **Taxonomy** ☐ with a social objective ☐ It made sustainable investments It promoted E/S characteristics, but **did not** with a social objective% make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicator used to assess the environmental characteristic promoted by this Sub-Fund is the percentage of corporate bond issuers in this Sub-Fund with a net zero emission plan. The sustainability indicator used to assess the social characteristic is breach to United Nations Global Compact (UNGC).

As shown in the following section, the share of companies with transparent policies towards net zero emission path was 44.7% at the reporting date, and the share of companies in breach of the UN Global Compact was 0.0%. Those indicators showed that the environmental and social characteristics promoted by this Sub-Fund were met. The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

## How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	44.7%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

#### And compared to previous periods?

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	31.7%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

The sustainability indicator – Share of companies with transparent policies toward Net Zero path – changed from 31.7% to 44.7%. This change reflects the implementation of the ESG process of the sub-fund, notably exclusions and integration of ESG factors when selecting companies for the portfolio.

The sustainability indicator – Share of companies in breach of the UN Global Compact – is unchanged at 0.0%.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?
- The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held some taxonomy-aligned investments, whose objectives were primarily climate mitigation. How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU

Taxonomy regulation. In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

- How were the indicators for adverse impacts on sustainability factors taken into account?
- Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors. Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impact considerations for the Sub-Fund were implemeted from 29.12.2023

		As at 30/12/2022		2022	As at 29/12/2023		<b>2023</b>		
Indicato r	Metrics	Value	Covere d assets	Eligible Assets	Value	Covere d assets	Eligible Assets	Planned actions	
PAI 1	Greenhouse gas emissions (tCO2eq)- scope 1	14908.9	89.2%	97.0%	11948.5	92.0%	99.2%		
PAI 1	Greenhouse gas emissions (tCO2eq)- scope 2	2802.4	89.2%	97.0%	3273.1	92.0%	99.2%		
PAI 1	Greenhouse gas emissions (tCO2eq)- scope 3	120155. 1	83.9%	97.0%	110780.0	86.9%	99.2%	This Sub-Fund considers these PAIs when assessing the ESG profile of the corporate bond issuers in the portfolio. The	
PAI 2	Carbon footprint (tCO2eq/EURm invested)- Scope 1+2	55.9	89.2%	97.0%	37.9	92.0%	99.2%	assessment is forward-looking, independent and materiality-based at the sector level. A scoring methodology is implemented by the Investment Manager	
PAI 3	GHG intensity of investee companies (tCO2eq/EURm revenue)- Scope 1+2	169.3	95.9%	97.0%	150.5	98.4%	99.2%	to assess E characteristics.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, several companies in which the Sub-Fund is invested have reported EU taxonomy aligned revenues, including for instance ENEL, or National Grid PLC. Taking into account the weight of these companies in the portfolio, and their compliance with our Do No Significant Harm and Minimum Safeguards criteria, this resulted in a revenue-based investment of 0.5% of total assets.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES		
	☐ In fossil gas	in nuclear energy
⊠ NO		

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. Product name: UBAM - STRATEGIC INCOME Legal entity identifier: 000000869\_00000150

## **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? ● ■ Yes ☐ It made sustainable investments with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 1.5% of sustainable investments ☐ in economic activities that qualify as environmentally sustainable under ☑ with an environmental objective in economic the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic ☐ in economic activities that do not activities that do not qualify as as environmentally environmentally sustainable under the EU sustainable under the EU Taxonomy **Taxonomy** ☐ with a social objective ☐ It made sustainable investments It promoted E/S characteristics, but **did not** with a social objective% make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sustainability indicator used to assess the environmental characteristic promoted by this Sub-Fund is the percentage of corporate bond issuers in this Sub-Fund with a net zero emission plan.

The sustainability indicator used to assess the social characteristic is breach to United Nations Global Compact (UNGC). As shown in the following section, the share of companies with transparent policies towards net zero emission path was 58.0% at the reporting date, and the share of companies in breach of the UN Global Compact was 0.0%. Those indicators showed that the environmental and social characteristics promoted by this Sub-Fund were met. The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

#### How did the sustainability indicators perform?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	58.0%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

#### And compared to previous periods?

The sustainability indicator – Share of companies with transparent policies toward Net Zero path – increased from 30.6% to 58.0%. This change reflects the implementation of the ESG process of the Sub-Fund, notably business involvement exclusions and integration of ESG factors when selecting companies for the portfolio.

The sustainability indicator – Share of companies in breach of the UN Global Compact – is unchanged at 0.0%.

Sustainability indicator	Sub-Fund
Share of companies with transparent policies towards NZ path	30.6%
Share of companies in breach of the UN Global Compact	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held 1.5% taxonomy-aligned investments, whose objectives were primarily climate mitigation.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU Taxonomy regulation.

In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, the fund held use-of-proceeds bonds, compliant with EU Green Bond Standards, as well as some companies which had reported EU taxonomy aligned revenues, such as ENEL or Veolia. Taking into account the weight of these investments in the portfolio, this resulted in 1.5% of total assets.

The Investment Manager ensured that these companies did not significantly harm any other sustainable investment objectives by applying its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

	he financial product inve lying with the EU Taxonol	st in fossil gas and/or nuclear energy related activit ny?	ies
☐ YES			
	☐ In fossil gas	☐ in nuclear energy	
⊠ NO			

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 87.7% of the total net assets

The taxonomy-alignment of EU Green Bonds is accounted for as CAPEX.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

- What was the share of investments in transitional and enabling activities?
  - Information on the split between transitional and enabling activities is not always available. Based on the partial information available, the fund held no investments in transitional activities and 0.4% in enabling activities.

Sustainable
investment means
an investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomv** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of

Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM – European Convertible Bond Legal entity identifier: 000000869\_00000070

## **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?							
● ● □ Yes	● ○ 図 No						
☐ It made sustainable investments with an environmental objective: % ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>☑ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.9% of sustainable investments</li> <li>☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> </ul>						
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>□ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>□ with a social objective</li> </ul>						
☐ It made sustainable investments with a social objective%	☐ It promoted E/S characteristics, but <b>did not make any sustainable investments</b>						

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Sub-Fund met the environmental (E) and social (S) characteristics in 2023 promoted by obtaining

- 1. a weighted average Industry-Adjusted ESG score of 7.62 which is higher than that of the Refinitiv Europe Hedged Convertible Bond Index (EUR) at 7.38
- 2. a lower carbon footprint (as measured by the weighted average carbon intensity) of 104.9 vs. 110.95 for its index.

The benchmark Refinitiv Convertible Europe Hedged (EUR) is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenue)	104.9	110.95
Average Industry-adjusted ESG Score	7.62	7.38

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

#### And compared to previous periods?

The commitment to meet environmental (E) and social (S) objectives came into effect late 2022. Since then the investment team has been following its investment framework in order to ensure the Sub-fund reach its objectives. As a reminder the investment framework is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

Our investment process starts with the application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy.

Therefore, during the reporting period the Sub-Fund has applied exclusion rules, which, among other aspects, reduce the exposure to carbon-intensive sectors.

Over 2023, convertible bond primary market has been very active and among issuers we had several companies from the Energy and Materials sectors. Companies from these two sectors tend to be much more carbon-intensive when compared to other sectors. We initiated positions in some of these new issues while complying to our investment framework to make sure we meet the environmental (E) and social (S) objectives promoted by this Sub-fund. These companies demonstrate a reduced carbon intensity compared to their industry counterparts and have made commitments to achieve net zero emissions with well-defined decarbonization objectives. The investment team also qualitatively assessed their climate strategy aiming at evaluating the inclusion of climate change with short- and long-term roadmap. This assessment involves analyzing greenhouse gas emissions in absolute and relative terms compared to peers, exposure to regulation risk, climate policy framework and data integrity. Additionally, we increased our exposure to the aviation sector, favoring airlines with clearly defined climate targets validated by the Science Based Targets Initiative (SBTi) to guide these companies towards decarbonization.

- Sub-fund's average Industry-adjusted ESG Score decreased by 0.4 when compared to end of 2022. Despite this reduction, the Sub-fund's average Industry-adjusted ESG Score is 0.24 point higher than the one of the Refinitiv Convertible Europe Hedged (EUR) index as at the end of 2023.
- Sub-fund's weighted Average Carbon Intensity (tCO2e/\$ mi. revenue) increased over 2023. It moved higher by 40 tCO2e/\$ mi. revenue to 104.9 when compared to the end of 2022. However, despite this increase, Sub-fund's weighted Average Carbon

<sup>\*</sup>Index:Refinitiv Convertible Europe Hedged (EUR)

Intensity is lower than the one of the Refinitiv Convertible Europe Hedged (EUR) index, which stands at 110.95 tCO2e/\$ mi. revenue as at the end of 2023

Sustainability indicator	Sub-fund	Index*

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held some taxonomy-aligned investments, whose objectives were primarily climate mitigation.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU Taxonomy regulation.

In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors.

### Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

		As	at 30/12	/2022	As a	As at 29/12/2023		
Indicat or	Metrics	Valu e	Covered assets	Eligible Assets	Valu e	Covere d assets	Eligible Assets	Planned actions
PAI 3	GHG intensity of investee companies (tCO2eq/EURm revenue)	60.3	100%	99.1%	95.5	99.5%	99.5%	Over 2023, convertible bond primary market has been very active; and we had exposure to several companies from the Energy and Materials sectors. Companies from these two sectors tend to be much more carbonintensive when compared to other sectors. We initiated positions in some of these new issues while complying to our investment framework to make sure we meet the environmental (E) and social (S) objectives promoted by this Sub-fund. These companies demonstrate a reduced carbon intensity compared to their industry counterparts and have made commitments to achieve net zero emissions with well-defined decarbonization objectives. The investment team also qualitatively assessed their climate strategy aiming at evaluating the inclusion of climate change with short- and long-term roadmap. This assessment involves analysing greenhouse gas emissions in absolute and relative terms compared to peers, exposure to regulation risk, climate policy framework and data integrity. Furthermore, we expanded our investment in the aviation sector, prioritizing airlines with well-defined climate targets endorsed by the Science Based Targets Initiative (SBTi). This approach serves as our action plan for the future, ensuring that the companies in our portfolio are committed to decarbonization.  Sub-fund's weighted Average Carbon Intensity (tCO2eq/EURm revenue) increased over 2023. It moved higher by 35.2 tCO2eq/EURm revenue when compared to the end of 2022. With Sub-fund's weighted Average Carbon Intensity at 95.5 tCO2eq/EURm revenue, it is lower than that of the Refinitiv Convertible Europe Hedged (EUR) index, which stands at 101.0

								tCO2eq/EURm revenue as at the end of 2023
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0%	100%	99.1%	0%	99.5%	99.5%	Similar to the previous period, the Sub- Fund excludes companies in breach of the UNGC. Over the year the sub-fund has not been in any company that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
PAI 13	Board gender diversity (%)	43.5 %	100%	99.1%	43.6 %	99.5%	99.5%	Over the year, the overall board gender diversity of the invested companies has been relatively stable from 43.5% at 30.12.2022 to 43.6% as at the end of 29.12.2023. This percentage has been above 40% over the entire year.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	99.1%	99.1%	0%	99.5%	99.5%	Companies exposed to controversial weapons are still excluded

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

The use of different data sources and systems may result in limited variations accross the various sections of the preent report.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, a few companies in which the Sub-Fund invested in have reported EU taxonomy aligned revenues, including for instance Prysmian SPA , or Veolia Environnement. Considering the weight of these companies in the portfolio, and their compliance with our Do No Significant Harm and Minimum Safeguards criteria, this resulted in a revenue-based investment of 3.9% of total assets

The Investment Manager ensured that these companies did not significantly harm any other sustainable investment objectives by applying its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

To comply with the EU taxonomy, the criteria for fossil gas

☑ NO

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES
☐ In fossil gas ☐ in nuclear energy

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment, based on company reports, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investments in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear)
Other investments mean Non Taxonomy-aligned

are sustainable investments with an environmental objective that do not take into account the criteria for environmental ly sustainable economic activities under the EU Taxonomy.

#### What was the share of investments in transitional and enabling activities?

Based on reported data, taxonomy-aligned investments included primarily enabling activities (2.7%) as well as some transitional activities (0.4%).

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

While the Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy, the percentage of investments aligned with the EU Taxonomy slightly increased over 2023. It moved from 0.8% to 3.9%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "Other" consisted of 0.5% in cash, other net assets and derivatives. There was no minimum environmental or social safeguards.

Source: UBP, as of 29 December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Throughout the year the investment team has been following its investment framework in order to ensure the Sub-fund reach its objectives. As a reminder the investment framework is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

Our investment process starts with the application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy.

Therefore, during the reporting period the Sub-Fund has applied exclusion rules, which, among other aspects, reduce the exposure to carbon-intensive sectors

Over 2023, the investment team initiated positions exposed to the Energy Transition theme by investing in companies specialising in electrical and HVAC engineering, electrification, GHG and energetic performance measurement. The investment team

had direct dialogue with several Utility companies in order to have a better understanding and assessment of their strategies to reduce climate impact, to promote TCFD recommendations and to define ojectives in line with Paris Agreement. These discussions reinforced the investment team's opinion.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they

promote.

No reference benchmark. The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

How did the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

• How did this financial product perform compared with the reference benchmark?

N/A

• How did this financial product perform compared with the broad market index?

N/A

#### elloSFDR SCHEDULE-Annex IV

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and

that the investee companies follow

good governance practices.

The **EU Taxonomv** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of

Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM – Global Convertible Bond Legal entity identifier: O00000869\_0000086

## **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? ● □ Yes ⊠ No ☐ It made **sustainable investments** with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had proportion of 1.1% of sustainable investments ☐ in economic activities that qualify as ☑ with an environmental objective in economic environmentally sustainable under the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic ☐ in economic activities that do not activities that do not qualify as as environmentally environmentally sustainable under the EU sustainable under the EU Taxonomy Taxonomy ☐ with a social objective It promoted E/S characteristics, but **did not** ☐ It made **sustainable investments** make any sustainable investments with a social objective%

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Sub-Fund met the environmental (E) and social (S) characteristics in 2023 promoted by obtaining

- 1. a weighted average Industry-Adjusted ESG score of 6.8 which is higher than that of the Refinitiv Global Hedged Convertible Bond Index (EUR) at 6.05
- 2. a lower carbon footprint (as measured by the weighted average carbon intensity) of 159.6 vs. 250 for its index.

The benchmark Global Hedged Convertible Bond (EUR) is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenue)	159.6	250
Average Industry-adjusted ESG Score	6.80	6.05

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

#### • And compared to previous periods?

The commitment to meet environmental (E) and social (S) objectives came into effect late 2022. Since then the investment team has been following its investment framework in order to ensure the Sub-fund reach its objectives. As a reminder the investment framework is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

Our investment process starts with the application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy.

Therefore, during the reporting period the Sub-Fund has applied exclusion rules, which, among other aspects, reduce the exposure to carbon-intensive sectors.

Over 2023, convertible bond primary market has been very active with nearly \$79bn worth of convertible debt issued last year. Among 2023 issuers approximately 17% were companies from the "Utilities" sector and 11% from the "Industrials" sector. When considering new issuances from companies in the "Energy," "Materials," and "Transportation" sectors, carbonintensive sectors collectively accounted for approximately 40% of new issues.. We strategically initiated positions in some of these new issues while complying to our investment framework to make sure we meet the environmental (E) and social (S) objectives promoted by this Sub-fund as follows:

- Sub-fund's average Industry-adjusted ESG Score increased by 0.3 when compared to end of 2022. As at the end of 2023 the Sub-fund's average Industry-adjusted ESG Score is 0.75 point higher than the one of the Refinitiv Global Hedged Convertible Bond (EUR) index.
- Sub-fund's weighted Average Carbon Intensity (tCO2e/\$ mi. revenue) increased over 2023. It moved higher by 87 tCO2e/\$ mi. revenue when compared to the end of 2022. However, despite this increase, Sub-fund's weighted Average Carbon Intensity is lower than the one of the Refinitiv Global Hedged Convertible Bond (EUR) index, which stands at 250 tCO2e/\$ mi. revenue as at the end of 2023.

<sup>\*</sup>Index:Refinitiv Global Hedged Convertible Bond (EUR)

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. Revenue)	71.8	250
Average Industry-adjusted ESG Score	6.5	5.8

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022 \*Index:Refinitiv Global Hedged Convertible Bond (EUR)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held some taxonomy-aligned investments, whose objectives were primarily climate mitigation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU Taxonomy regulation.

In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As a	t 30/12	/2022	As at	29/12/	2023	
Indicat or	Metrics	Valu e	Covere d assets	Eligible Assets	Value	Covere d assets	Eligible Assets	Past and Planned actions
PAI 3	GHG intensity of investee companies (tCO2eq/EUR m revenue)	67	100%	89.82%	145.3	92.8%	92.8%	Over 2023, convertible bond primary market has been very active with close to nearly \$79bn worth of convertible debt issued last year. Among 2023 issuers approximately 17% were companies from the "Utilities" sector and 11% from the "Industrials" sector. When considering new issuances from companies in the "Energy," "Materials," and "Transportation" sectors, carbon-intensive sectors collectively accounted for approximately 40% of new issues. We initiated positions in some of these new issues in the Energy, Utilities and Materials sectors while complying to our investment framework to make sure we meet the environmental (E) and social (S) objectives promoted by this Sub-fund.  These companies demonstrate a reduced carbon intensity compared to their industry counterparts and have made commitments to achieve net zero emissions with well-defined decarbonization objectives. The investment team also qualitatively assessed their climate strategy aiming at evaluating the inclusion of climate change with shortand long-term roadmap. This assessment involves analysing greenhouse gas emissions in absolute and relative terms compared to

								peers, exposure to regulation risk, climate policy framework and data integrity.  Sub-fund's weighted Average Carbon Intensity (tCO2eq/EURm revenue) increased over 2023. It moved higher by 78.3 tCO2eq/EURm revenue when compared to the end of 2022. With Sub-fund's weighted Average Carbon Intensity at 145.3 tCO2eq/EURm revenue, it is lower than that of the Refinitiv Global Hedged Convertible Bond (EUR) index, which stands at 227.1 tCO2eq/EURm revenue as at the end of 2023.  The Sub-Fund continues to aim to maintain a weighted average carbon intensity lower than the benchmark by continuing to pay attention to issuer's GHG emissions and climate strategy.
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0%	100%	89.82%	0%	91.7%	92.8%	Continuing from the previous period, the Sub-Fund excludes companies in breach of the UNGC. Over the year the sub-fund has not been invested in any company that has been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
PAI 13	Board gender diversity (%)	33.5 %	100%	89.82%	32.9%	91.3%	92.8%	Over the year, the overall board gender diversity of the invested companies has slightly decreased from 33.5% at 30.12.2022 to 32.9% as at the end of 29.12.2023. This percentage has been above 30% over the entire year.  The Sub-Fund continues to consider and monitor the overall board gender diversity.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	100%	89.82%	0%	92.8%	92.8%	The Sub-Fund continues to exclude companies exposed to controversial weapons are still excluded

#### What was the proportion of sustainability-related investments?

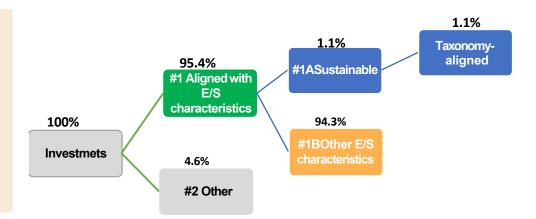

1.1%

#### Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	89.80%	93.80%
#2 Other	10.20%	6.20%
#1A Sustainable	0.30%	1.10%
#1B Other E/S characteristics	89.50%	92.70%
Taxonomy-aligned	0.30%	1.10%
Other environmental	0.00%	0.00%
Social	0.00%	0.00%

Source: UBP, as of 29 December 2023

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made

To comply with the EU taxonomy, the criteria for **fossil gas** 

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear** energy, the criteria include comprehensi ve safety and waste management rules.

## Enabling activities

directly
enable other
activities to
make a
substantial
contribution
to an
environment
al objective.

**Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels correspondin g to the best performance.

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, a few companies in which the Sub-Fund is invested in have reported EU taxonomy aligned revenues, including for instance Prysmian SPA or Veolia Environnement. Considering the weight of these companies in the portfolio, and their compliance with our Do No Significant Harm and Minimum Safeguards criteria, this resulted in a revenue-based investment of 1.1% of total assets.

The Investment Manager ensured that these companies did not significantly harm any other sustainable investment objectives by applying its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

☐ In fossil gas

in nuclear energy

☑ NO

☐ YES

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The Sub-Fund had no investments in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

are sustainable investments with an environmental objective that do not take into account the criteria for environmental ly sustainable economic

activities under the EU Taxonomy. Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

- What was the share of investments in transitional and enabling activities?
   Taxonomy-aligned investments were essentially made in enabling activities (1.0%).
- How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

While the Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy, the percentage of investments aligned with the EU Taxonomy slightly increased over 2023. It moved from 0.3% to 1.1%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "2 Other" consisted of 2.4% in fund, 2.0% in cash and 0.2% in derivative. There were no minimum environmental or social safeguards.

Source: UBP, as of 29 December 2023

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Throughout the year the investment team has been following its investment framework in order to ensure the Sub-Fund reach its objectives. As a reminder the investment framework is intended to to be holistic as ESG and sustainability factors are fully integrated across the investment process. Our investment process starts with the application of negative screening (exclusion criteria) in line with UBP's exclusions for Article 8 funds as described in UBP's Responsible Investment Policy.

Therefore, during the reporting period the Sub-Fund has applied exclusion rules, which, among other aspects, reduce the exposure to carbon-intensive sectors

Over 2023, the investment team initiated positions exposed to the Energy Transition theme by investing in companies specialising in electrical and HVAC engineering, electrification, GHG and energetic performance measurement. The investment team had direct dialogue with several Utility companies in order to have a better understanding and assessment of their strategies to reduce climate impact, to promote TCFD recommendations and to define ojectives in line with Paris Agreement. These discussions reinforced the investment team's opinion.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark. The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the environmental and social characteristics promoted by this Sub-Fund.

How did the reference benchmark differ from a broad market index?

N/A

  N/A

#### SFDR SCHEDULE- Annex IV

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or

social objective and

that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of

Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - 30 EUROPEAN LEADERS EQUITY

Legal entity identifier: O00000869\_00000152

## **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? ● ■ Yes ☐ It made sustainable investments with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 7.7% of sustainable investments ☐ in economic activities that qualify as environmentally sustainable under ☑ with an environmental objective in economic the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not with an environmental objective in economic environmentally activities that do not qualify as sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy ☐ It made **sustainable investments** It promoted E/S characteristics, but did not with a social objective% make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark MSCI Europe Equity Net Return was met at all times, the latest performance is shown in the following section. By targeting a lower carbon intensity than its benchmark, the environmental characteristics promoted by this product have positively contributed to climate change mitigation.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### • How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	64.4	94.2

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

To measure the achievement of the environmental characteristics promoted by the Sub-Fund, the Sub-Fund's performance relative to its benchmark based on the following indicators were considered:

- The Weighted Average Carbon Intensity of the companies in which the portfolio is invested; The WACI of the portfolio (64.4 tCO2e/\$ mi. sales) was 32% lower than the benchmark (94.2 tCO2e/\$ mi. sales).
  - And compared to previous periods?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	N/A	N/A

N/A, the Sub-Fund was launched in September 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the Sub-Fund had 7.7% of sustainable investments, which contributed to the following objectives that the Sub-Fund partially made:

- environmental (2.1%) such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources.
- social (5.6%) such as major disease treatment: for example, through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world;
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*</sup>Index: MSCI Europe Equity NR

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors.

## How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

In addition, some PAIs were also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As at 30/12/2022			As at 29/12/2023			
Indicator	Metrics	Value	Cover ed assets	Eligibl e Assets	Valu e	Cover ed assets	Eligibl e Assets	Past and planned actions

## What was the proportion of sustainability-related investments?

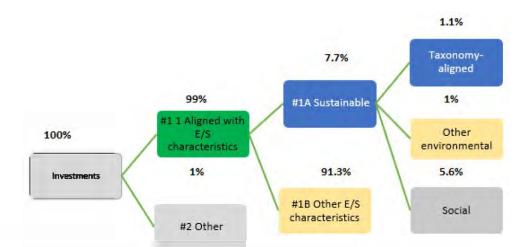

7.7%

## What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as

	2022	2023
Investments	N/A	100%
#1 Aligned with E/S characteristics	N/A	99%
#2 Other	N/A	1%
#1A Sustainable	N/A	7.7%
#1B Other E/S characteristics	N/A	91.3%
Taxonomy-aligned	N/A	1.1%
Other environmental	N/A	1%
Social	N/A	5.6%

Source: UBP, as of 29 December 2023

Figures may not add up to totals because of rounding

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Sector	% Assets
Health Care	17.19%
Industrials	16.22%

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

At the end of 2023, the Sub-Fund was invested in a few companies which had reported their taxonomy-aligned revenues at the time of writing, including one in the Industrials sector. These companies also passed our DNSH and Minimum Safeguards criteria, resulting in an allocation of 1.1% (revenue-based) sustainable investments with an environmental objective aligned with the EU Taxonomy at portfolio level.

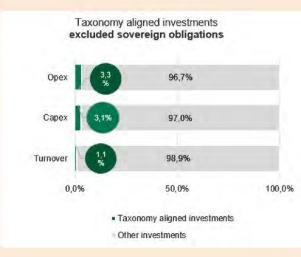

- Did the financial product invest in fossil gas and/or nuclear energy related activities
- complying with the EU Taxonomy?

	YES		
		In fossil gas	in nuclear energy
$\boxtimes$	NO		

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows t Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the seco graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

<sup>\*</sup> For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets. The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Reported share of investments in transitional activities 0%
Reported share of investments in enabling activities 1.1%
Source:Reported data, Morningstar Sustainalytics, as of 29 December 2023

All taxonomy-aligned investments were in enabling activities (1.1%)

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

NA, the Sub-Fund was launched in September 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

1.0%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023 In the absence of taxonomy reported data, this includes 0.1% of additional investments that are estimated by Morningstar Sustainalytics to be aligned with the EU Taxonomy climate mitigation and adaptation objectives, as well as other investments with other environmental objectives either not related to climate or not covered by the Taxonomy.

are sustainable investments with an environmen tal objective that do not take into account the criteria for environmen tally sustainable economic activities under the EU Taxonomy.

## What was the share of socially sustainable investments?

5.6%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "other", what was their purpose and were there any minim environmental or social safeguards?

1.0% representing P&L from derivatives for FX hedging share classes and the cash position of the Sub-Fund for flows management purposes, which is

considered as investments not aligned with the environmental and social characteristics promoted. There is no minimum E/S safeguards on this bucket.

Source: UBP, as of 29 December 2023

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment framework is not intended to focus on a company's ESG credentials at the expense of its financial performance potential. Indeed, the approach is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

During the reporting period the Sub-Fund has applied exclusion rules, which, among other a spects, reduce the exposure to carbon-intensive sectors. These rules include the exclusion of companies with certain exposure to conventional oil & gas revenues (10%), certain exposure to revenues from unconventional oil and gas extraction (10%), exposure to other revenues associated to unconventional oil and gas (10%) and certain exposure to thermal coal extraction and sale to external parties (10%) as well as certain revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas (10%, 30% and 30% respectively). In addition, anycompany in breach of global norms, if flagged by both MSCI ESG Research and Morningstar Sustainalytics, is excluded as well.

In 2023, the team engaged with several portfolio holdings on topics such as Biodiversity or ESG disclosure, including on EU-Taxonomy reporting.

This Sub-Fund generally avoided biodervisity laggards to the extent possible and engaged with companies with any potential impact on biodiversity. The Investment Team namely engaged with a company in the Consumer Staples sector on issues related to palm oil production and deforestation allegations as well as plastic pollution. The company provided a constructive feedback on the current status and their action plan.

Furthermore, the Investment Manager continued to perform its duty as a responsible shareholder through proxy voting. Institutional Shareholder Service (ISS-Sustainability package) votes on behalf of the Sub-Fund. ISS recommendations for voting do not necessarily have to be followed and UBP may prefer to vote independently based on the team's understanding and discussions with company management. In practice, portfolio managers

can instruct ISS to vote on their behalf as per their recommendations. Portfolio managers can consult ISS recommendations and make their own decisions, under the supervision (involving a veto and a final decision right) of the relevant Management Company / Fund's arbitration body, or according to client requirements. Exceptions are documented a nd agreed upon by the relevant ManCo Conducting Officer.

### SFDR SCHEDULE- Annex IV

paragraphs 1, 2 and 2a, of

Sustainable
investment means
an investment in an
economic activity

paragraphs 1, 2 and 2a, of

Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - 30 GLOBAL LEADERS EQUITY Legal entity identifier: O00000869\_00000057

## **Environmental and/or social characteristics**

Template periodic disclosure for the financial products referred to in Article 8,

#### Did this financial product have a sustainable investment objective? ● ■ Yes ☐ It made sustainable investments with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.2% of sustainable investments ☐ in economic activities that qualify as environmentally sustainable under ☑ with an environmental objective in economic the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not with an environmental objective in economic environmentally activities that do as not qualify sustainable under the EU Taxonomy environmentally sustainable under the EU Taxonomy ☐ It made **sustainable investments** It promoted E/S characteristics, but did not with a social objective% make any sustainable investments

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark the MSCI AC World Net Return USD was met at all times, the latest performance is shown in the following section. By targeting a lower carbon intensity than its benchmark, the environmental characteristics promoted by this product have positively contributed to climate change mitigation. Through the strict exclusion of companies in breach of the United Nations Global Compact norms, the social objective of the product of having better corporate sustainability, measured by the share of companies in breach of the UN Global Compact, than its benchmark has also been met at all times. The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

## How did the sustainability indicators perform?

Sustainabiliy indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	58.4	128.9
Share of companies in breach of the UN Global Compact	0.0%	0.7%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

To measure the achievement of the environmental and social characteristics promoted by the Sub-Fund, the Sub-Fund's performance relative to its benchmark based on the following indicators were considered:

- The Weighted Average Carbon Intensity of the companies in which the portfolio is invested: the WACI of the portfolio (58.4 (tCO2e/\$ mi. sales)) was 120% lower than the benchmark (128.9 (tCO2e/\$ mi. sales)).
- The share of companies in breach of UN Global Compact: the portfolio did not have any exposure to companies that do not comply with the UN Global Compact principles during the reference period, whereas the benchmark had a share of 0.7%.

## And compared to previous periods?

Sustainabiliy indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	71.5	161.0
Share of companies in breach of the UN Global Compact	0.0%	0.8%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Following positions changes in the portfolio and the organic reduction of their own carbon intensity by some portfolio holdings, the weighted average carbon intensity (WACI) of the Sub-Fund decreased in absolute terms between end of 2022 and end of 2023. Companies in breach of UN Global Compact continue to be excluded from the portfolio and the share of companies in breach of the UN Global Compact remained at 0.0%. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the Sub-Fund had 10.2% of sustainable investments, which contributed to the following objectives that the Sub-Fund partially made:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*</sup>Index: MSCI AC World Net Return USD

<sup>\*</sup>Index: MSCI AC World Net Return USD

- environmental (4.9%) such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources.
- social (5.3%) such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world;
  - How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

In addition, some PAIs were also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe as well as the objective to have a better corporate sustainability than its benchmark through the exclusions of companies in breach of the United Nations Global Compact (UNGC).

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

		As a	As at 30/12/2022		As at 29/12/2023			
Indicator	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Past and Planned actions
PAI 3	GHG intensity of investee companies (tCO2eq/EU Rm revenue)- Scope 1+2	65.8	96.5%	96.5%	62.1	98.5%	98.5%	The investment team continues to consider PAI 3 by paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy and continue to integrate ESG consideration, including climate change, in companies' financial modelling.
PAI 10	Share of investment s that have been involved in violations of the UNGC principles or OECD Guidelines for Multination al Enterprises (%)	0%	96.5%	96.5%	0%	98.5%	98.5%	The investment team continues to consider PAI 10 by excluding companies involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.
PAI 14	Share of investment s involved in the manufactur e or selling of controversi al weapons (%)	0%	96.5%	96.5%	0%	98.5%	98.5%	The investment team continues to consider PAI 14 by excluding companies involved in the manufacture or selling of controversial weapons.

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

## To what minimum extent are sustainable investments with an environmental objective

## aligned with the EU Taxonomy?

At the end of 2023, the Sub-Fund was invested in a couple of companies which had reported their taxonomy-aligned revenues at the time of writing, including one in the Industrial sector. These companies also passed our DNSH and Minimum Safeguards criteria, resulting in an allocation of 0.9% (revenue-based) sustainable investments with an environmental objective aligned with the EU Taxonomy at portfolio level.

	Did the financial product invest in fossil gas and/or nuclear energy related activities				
	complying with the EU Taxonomy?				
	YES				
		In fossil gas		in nuclear energy	
$\boxtimes$	NO				

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy aligned investments included sovereign obligations

Opex 97,8%

Capex 1,7% 98,3%

Turnover 99,1%

0,0% 50,0% 100,0%

• Taxonomy aligned investments

• Other investments

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Source: Reported data, Morningstar Sustainalytics as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

## What was the share of investments in transitional and enabling activities?

Reported share of investments in transitional activities 0% Reported share of investments in enabling activities 0.9%

Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023

All companies reporting taxonomy-aligned revenues were involved in enabling activities.

 How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments aligned with the EU Taxonomy increased from 0% at the end of 2022 to 0.9% at the end of 2023 as companies under the EU regulation incrementally started to report on their Taxonomy-aligned activities. Moreover, the team engaged with companies and data providers to correct mismatches in their assessment of Taxonomy-aligned revenues. For example, a portfolio holding in the Industrials sector has been an early-adopter of transparent disclosures on sustainable revenues, reporting already in 2022 (FY 2021), 28% EU Taxonomy-eligible economic activities (climate change mitigation). This was reflected by data providers in 2023.

What was the share of sustainable investments with an environmental objective that were not

aligned with the EU Taxonomy?

4.0%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

In the absence of taxonomy reported data, this included 1.4% of additional investments that are estimated by Morningstar Sustainalytics to be aligned with the EU Taxonomy climate mitigation and adaptation objectives, as well as other investments with environmental objectives either not related to climate or not yet covered by the Taxonomy.

What was the share of socially sustainable investments?

5.3%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.6% representing P&L from derivatives for FX hedging share classes and the cash position of the Sub-Fund for flows management purposes, which is considered as investments not aligned with the environmental and social characteristics promoted. There is no minimum E/S safeguards on this bucket.

Source: UBP, as of 29 December 2023

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment framework is not intended to focus on a company's ESG credentials at the expense of its financial performance potential. Indeed, the approach is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

During the reporting period the Sub-Fund has applied exclusion rules, which, among other aspects, reduce the exposure to carbon-intensive sectors. These rules include the exclusion of companies with certain exposure to conventional oil & gas revenues (5%), any exposure to revenues from unconventional oil and gas extraction, exposure to other revenues associated to unconventional oil and gas (5%) and any exposure to thermal coal extraction and sale to external parties as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas. In addition, any company in breach of global norms, if flagged by both MSCI ESG Research and Morningstar Sustainalytics, is excluded as well.

In 2023, the team engaged with several portfolio holdings on topics such as Biodiversity or ESG disclosure, including on EU-Taxonomy reporting as detailed above.

This Sub-Fund generally avoided biodervisity laggards to the extent possible and engaged with companies with any potential impact on biodiversity. The Investment Team namely engaged with a company in the Consumer Staples sector on issues related to palm oil production and deforestation allegations as well as plastic pollution. The company provided a constructive feedback on the current status and their action plan.

Furthermore, the Investment Manger continued to perform its duty as a responsible shareholder through proxy voting. Institutional Shareholder Service (ISS-Sustainability package) votes on behalf of the Sub-Fund. ISS recommendations for voting do not necessarily have to be followed and UBP may prefer to vote independently based on the team's understanding and discussions with company management. In practice, portfolio managers can instruct ISS to vote on their behalf as per their recommendations. Portfolio managers can consult ISS recommendations and make their own decisions, under the supervision (involving a veto and a final decision right) of the relevant Management Company / Fund's arbitration body, or according to client requirements. Exceptions are documented and agreed upon by the relevant ManCo Conducting Officer. Several cases of such overrides have been recorded in 2023.

Finally, during 2023, the team sold its position in a Consumer Discrection company due to deteriorating `CFROI® and ESG profiles. The company was downgraded to BBB by MSCI ESG Research following its reassessment of the company exposure to reputational risks tied to alleged unethical sourcing, and potential weaknesses in corporate governance practices.

### SFDR SCHEDULE- Annex IV

Sustainable
investment means
an investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or

social objective and

that the investee companies follow

good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

**Product name UBAM - ANGEL JAPAN SMALL CAP EQUITY** 

Legal entity identifier: O00000869 00000061

## **Environmental and/or social characteristics**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark was met at all times, as shown in the following section.

Moreover, through the exclusion of companies in breach of the United Nations Global Compact, the social objective of the product of having better corporate sustainability than its benchmark MSCI Japan Small Cap Net Total Return has also been met.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

## How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	58.30	135.78
Share of companies in breach of the UN Global Compact	0.0%	0.0%

Past performance is not a guide for current or future returns.

## And compared to previous periods?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	61.1	142.3
Share of companies in breach of the UN Global Compact	0.0%	0.0%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

m

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES		
	☐ In fossil gas	in nuclear energy
⊠ NO		

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy aligned investments included sovereign obligations

Opex 0,0% 100,0%

Capex 0,0% 100,0%

Turnover 0,0 100,0%

0,0% 50,0% 100,0%

\*Taxonomy aligned investments
Other investments

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomyaligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

 $Source: Reported\ Taxonomy-alignment,\ Morningstar\ Sustainal ytics,\ as\ of\ 29\ December\ 2023$ 

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear)
Other investments mean Non Taxonomy-aligned

- What was the share of investments in transitional and enabling activities?
  N/A
- How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund held 0.6% in other net assets (primarily cash, other net assets plus derivatives used for share class hedging) at the end of the year. While there was no minimum environmental or social safeguards on these investments, this is not expected to have any impact on the sustainability objective of this Sub-Fund.

Source: UBP, as of 29 December 2023

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of the ESG process, the Investment Manager managed an ESG check list with 7 items per pillar (21 in total), and a two point scale (1 or 0) during the reporting period. The list was updated through quarterly interviews.

The Investment Manager continuously checked each item on its proprietary checklist during the quarterly research interviews. All companies with insufficient initiatives and disclosures were challenged on the fact it is one of an important element which contributes to sustainable growth of corporate value as well as gaining investors' understanding and trust.

Some companies have started to add ESG pages on their websites a likely result of those activities and initiatives.

The Sub-Fund invested only in companies with high ESG proprietary scores, ensuring the portfolio consistently had a high ESG score overall. Lower score stocks were not eligible for investment

The investment manager worked to improve company initiatives and maintain a portfolio with high overall quality in terms of E, S and G by monitoring corporate scandals, holding dialogue with companies, and removing names from the investable universe when necessary.

Finally, the Investment Manager reviewed the items and criteria at the end of the year under review to make them stricter and changed to a five-point scale check list from the beginning 2023 (1 to 5). From 2023, the criteria for each of the three main items (which has been increased from 7 to 9 in total) must be assessed at 4 or higher to invest.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. No reference benchmark.

How did the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
  N/A
- How did this financial product perform compared with the broad market index?
  N/A

### SFDR SCHEDULE- Annex IV

Product name: UBAM - BELL GLOBAL SMID CAP EQUITY Legal entity identifier: 000000869 00000140

## **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? ● ■ Yes **⊠** No ☐ It made **sustainable investments** with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.1 % of sustainable investments ☐ in economic activities that qualify as environmentally sustainable under ☑ with an environmental objective in economic the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic ☐ in economic activities that do not environmentally activities that do not qualify qualify as environmentally sustainable under the EU sustainable under the EU Taxonomy Taxonomy ☐ with a social objective It promoted E/S characteristics, but did not ☐ It made **sustainable investments** make any sustainable investments with a social objective%

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has achieved its objective to always attain an ESG quality score superior to that of the index (MSCI World SMID Cap Index). As of end Dec 2023, the ESG quality score of the Sub-Fund stood at 7.79 which is 21.1% higher than its index (at 6.43). The Sub-Fund scores higher versus its index in all three segments: Environmental (+22.6%), Social (+9.8%) and Governance (+4.4%).

The Sub-Fund has also met the objective having a lower carbon intensity score than its index. As of end December 2023, the Weighted Average Carbon Intensity (tCO2e/\$M sales) stood at 20.66, significantly lower (-87.0%) versus its index standing at 158.86.

Not subject to an assurance provided by one or more auditors/third parties

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	20.66	158.86
MSCI ESG Quality Score	7.79	6.43

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

## And compared to previous periods?

Sustainability indicator	Sub-fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	21.5	198.2
MSCI ESG Quality Score	8.7	7.7

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

We are pleased that the UBAM Global SMID Cap Equity Sub-Fund achieved a relatively better ESG quality score than the benchmark and we will endeavour to continue improving its relative lead over the benchmark. The reason why this absolute score changed between 2022 and 2023 is due to changes in the MSCI scoring methodology, leading to both the index and portfolio scores falling year on year, but the percentage premium of UBAM Global SMID Cap Equity Sub-Fund still improving versus the index.

While our weighted average carbon intensity is less than last year, we would note that this is consistent with the benchmark. The benchmark's carbon intensity score fell significantly over the past year from 198.2 to 158.9, representing a decline of 20%. The Sub-Fund's weighted average carbon intensity is still well below the benchmark and we will endeavour to continue improving its relative lead.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund had no commitment to invest in sustainable investments. However, based on reported data it held 0.1% taxonomy-aligned investments, whose objectives were primarily climate mitigation. How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sub-fund had no commitment to invest in sustainable investments. However, it held some taxonomy-aligned investments which were reported by companies. These were thus compliant with Do No Significant Harm (DNSH) criteria required by the EU

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*</sup>Index: MSCI World SMID Cap Net Return

<sup>\*</sup>Index: MSCI World SMID Cap Net Return

Taxonomy regulation. In addition, all taxonomy-aligned investments disclosed here also passed all DNSH and Minimum Safeguards criteria set by our internal methodology, in line with the SFDR regulation. This methodology covers Principal Adverse Impacts, controversies, misalignment with SDGs, exclusion of harmful sectors and ESG/governance quality checks.

## How were the indicators for adverse impacts on sustainability factors taken into account?

Our in-house methodology referred above allowed us to test compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as through the exclusion of some harmful sectors. Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

Yes. All sustainable investments that the sub-fund made were compliant with the UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinationals Enterprises, according to the analysis of external data providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

		As at	30/12/	2022	As a	t 29/12/	/2023	
Indicator	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Past and planned actions
PAI 3	GHG intensity of investee companies scope 1+2+3 (tCO2eq/EURm revenue)	20.3	96.1%	98.8%	21.2	93.0%	97.5%	In portfolio construction, several ESG specific portfolio analytical tools from external providers are utilised in order to maintain our GHG intensity target.  With regards to our proxy voting policy, we generally support proposals regarding the environment, in particular, those seeking improved sustainability reporting and disclosure about company practices which impact the environment.  • We will support all shareholder proposals regarding increasing and/or improving carbon emissions disclosure.  • We support recommendations provided by the Task Force on Climate-related Financial Disclosures (TCFD), which include topics such as climate change scenario analysis, carbon emission metrics and carbon reduction targets.  The investment team also directly engages with companies regarding GHG emissions and reduction plans. The investment team will continue to implement a threshold: the sub-fund will maintain its weighted average carbon intensity at least 25% below that of its reference index.
PAI 4	Exposure to companies active in the fossil fuel sector (%)	3.2%	98.8%	98.8%	8.8%	97.5%	97.5%	The investment team continues to implement a threshold of max 10% of revenues coming from thermal coal extraction to limit the exposure to companies active in the fossil fuel sector.
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0.0%	98.8%	98.8%	0.0%	97.5%	97.5%	The investment team continues to implement an exclusion criteria of 0% breach of UN global compact.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0.0%	98.8%	98.8%	0.0%	97.5%	97.5%	The investment team continues to implement an exclusion criteria of 0% exposure to controversial weapons

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, one company in which the Sub-Fund is invested reported EU taxonomy aligned revenues. Taking into account the weight of this company in the portfolio, and their compliance with our Do No Significant Harm and Minimum Safeguards criteria, this resulted in a revenue-based investment of 0.1% of total assets. Note that a few more companies reported some taxonomy-aligned CAPEX and OPEX.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?							
☐ YES							
	☐ In fossil gas		in nuclear energy				
⊠ NO							

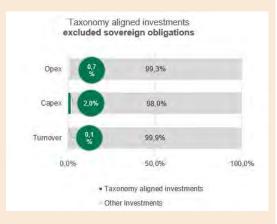

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Transitional activities: 0.0%

Enabling activities: 0.1%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund held 7.1% in other net assets. These include:

- cash positions and other net assets for liquidity and risk management purposes. While there was no minimum environmental or social safeguards on these investments, this is not expected to have any impact on the environmental and social objective of this Sub-Fund
- A couple of positions that were not covered by the MSCI ESG Score. These positions, however, passed the Sub-Fund's exclusion criteria, which constitute minimum environmental and social safeguards. In addition to passing the exclusion criteria, they have also passed the investment manager's ESG Materiality Assessment.

Source: UBP, as of 29 December 2023

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

BAM's screening criteria was enhanced during the period. The tobacco criteria was broadened to also exclude nicotine alternatives and tobacco-based products, plus the nuclear weapons screen was enhanced to have full exclusion of nuclear weapons from a 10% revenue threshold. Current actions are as follows:

We conduct the following Environmental negative screens:

- Limit exposure to unconventional oil and gas extraction to 5% revenue threshold
- Exclude all coal companies (as a primary business) as per GICS sub-industry. Also a 10% revenue limit on any other exposure to coal via mining, power generation (utilities) or transportation (excludes met coal)

We conduct the following Social negative screens:

- Exclude all companies that fail UN Global Compact compliance and exclude companies listed of various monitored sanction lists
- Limit exposure to gambling operators to 10% revenue threshold
- Exclude all adult entertainment producers. Secondary exposure (distribution or retailing) limited to 5% revenue threshold
- Exclude all tobacco, nicotine alternatives and tobacco-based producers. Secondary exposure (distribution, licensing, retailing or supplying / packaging) limited to a 10% revenue threshold

- Exclude all companies with ties to controversial weapons
- Exclude all companies that have an industry tie to nuclear weapons
- Limit exposure to conventional weapons to 10% revenue threshold
- Limit exposure to small arms or civilian firearms (and ammunition) production and retailing to 10% revenue threshold

We engage with all portfolio companies on a regular basis and have voted all proxy reports where possible. An example of this is our recent engagement with Advanced Drainage Systems (ADS), where we wanted to attain further understanding of how the company was managing their environmental risks.

ADS is the largest manufacturer of high-performance plastic-based pipes, onsite septic treatment systems, and water storage and treatment for storm and wastewater systems in North America. ADS entered our investment universe in March 2022 and after several engagements with management and financial analysis on the company, our initial investment in ADS was in February 2023.

After engaging with management, we began to appreciate ADS' long-term strategy to continue taking market share from the inferior incumbent product, primarily being concrete pipes and tanks and corrugated steel.

At the heart of ADS' mission is the creation of sustainable water management solutions that keep waterways free of pollution and prevent unnecessary stormwater runoff and erosion. With the increasing frequency and intensity of storms due to global warming, management of this precious resource will continue to be a focus for infrastructure improvements. At the beginning of 2022, ADS published their 10-year sustainability goals.

By setting these ambitious 10-year targets, we are able to track and engage directly with the company's progress. We will continue to engage with management on various ESG topics such as their carbon emission reduction goals, which have yet to be certified by SBTi.

We also have an engagement escalation policy in place which includes divesting a investment if our engagement is ultimately unsuccessful and the company is unwilling to implement ESG improvements. All engagements and escalation cases are tracked and published annually in the ESG engagement report.

From an environmental perspective our carbon intensity target keeps us on-track to minimise our carbon footprint relative to the benchmark.

any environmental or social objective and

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark the MSCI AC World Net Return USD was met at all times, the latest performance is shown in the following section. By targeting a lower carbon intensity than its benchmark, the environmental characteristics promoted by this product have positively contributed to climate change mitigation.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are

attained.

### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	14.4	128.9

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023.

\*Index: MSCI AC World Net Return USD

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

To measure the achievement of the environmental promoted by the Sub-Fund, the Sub-Fund's performance relative to its benchmark based on the following indicators were considered:

The Weighted Average Carbon Intensity of the companies in which the portfolio is invested; The WACI of the portfolio (14.4 tCO2e/\$ mi. sales) was significantly lower than the benchmark (128.9 tCO2e/\$ mi. sales).

#### And compared to previous periods?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	36.5	161.0

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022.

Following positions changes in the portfolio and the organic reduction of their own carbon intensity by some portfolio holdings, the weighted average carbon intensity (WACI) of the Sub-Fund decreased in absolute and relative terms between end of 2022 and end of 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the Sub-Fund had 12.3% of sustainable investments, which contributed to the following objectives that the Sub-Fund partially made:

- environmental (7.3%) such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources.
- social (5.0%) such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*</sup>Index: MSCI AC World Net Return USD

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above. In addition, some PAIs were also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As a	at 30/12/2	022	As at 29/12/2023			
Indicator	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Past and fPlanned actions
PAI 3	GHG intensity of investee companies (tCO2eq/EURm revenue)	30.1	95.8%	95.8%	13.8	99.9%	99.9%	The investment team continues to consider PAI 3 by paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy and continue to integrate ESG consideration, including climate change, in companies' financial modelling.
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0%	95.8%	95.8%	0%	99.9%	99.9%	The investment team continues to consider PAI 10 by excluding companies involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	95.8%	95.8%	0%	99.9%	99.9%	The investment team continues to consider PAI 14 by excluding companies involved in the manufacture or selling of controversial weapons.

### What was the proportion of sustainability-related investments?

### 12.3%

# Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	95.80%	99.80%
#2 Other	4.20%	0.20%
#1A Sustainable	8.50%	12.30%
#1B Other E/S characteristics	87.30%	87.50%
Taxonomy-aligned	0.00%	0.80%
Other environmental	4.00%	6.50%
Social	4.50%	5.00%

Source: UBP, as of 29 December 2023

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Figures may not fully add up to total due to rounding.

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?

Sector	% Assets
Financials	23.22%
Information Technology	22.05%
Industrials	16.94%
Health Care	15.05%
Consumer Discretionary	7.66%
Consumer Staples	6.72%
Communication Services	6.09%
Energy	1.68%
Cash	0.59%
Total	100.00%

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

### To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

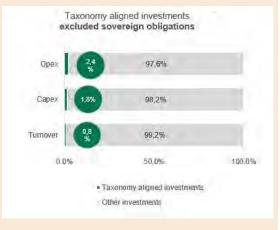

At the end of 2023, the Sub- Fund was invested in a few companies which had reported their taxonomy-aligned revenues at the time of writing, including among others one in the Industrials sector. These companies also passed our DNSH and Minimum Safeguards criteria, resulting in an allocation of 0.8% (revenue-based) sustainable investments with an environmental objective aligned with the EU Taxonomy at portfolio level.

•		e financial prod ying with the E	est in fossil gas and/or nuclear energy related activities comy?
	YES		
		In fossil gas	in nuclear energy
⊠	NO		

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy

aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Reported share of investments in transitional activities 0%
Reported share of investments in enabling activities 0.8%
Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023

All taxonomy-aligned investments were in enabling activities (0.8% revenue-based).

 How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments aligned with the EU Taxonomy increased from 0% at the end of 2022 to 0.8% at the end of 2023 as companies under the EU regulation incrementally started to report on their Taxonomy-aligned activities. Moreover, the team engaged with companies and data providers to correct mismatches in their assessment of Taxonomy-aligned revenues. For example, a portfolio holding in the Industrials sector has been an early-adopter of transparent disclosures on sustainable revenues, reporting already in 2022 (FY 2021), 28% EU Taxonomy-eligible economic activities (climate change mitigation). This was reflected by data providers in 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

6.5%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

In the absence of taxonomy reported data, this includes 2.9% of additional investments that are estimated by Morningstar Sustainalytics to be aligned with the EU Taxonomy climate mitigation and adaptation objectives, as well as other investments with other environmental objectives either not related to climate or not covered by the Taxonomy.

### What was the share of socially sustainable investments?

5%

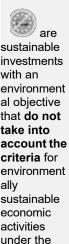

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.2% representing holdings that are not covered by MSCI ESG Research, P&L from derivatives for FX hedging share classes and the cash position of the Sub-Fund for flows management purposes, which is considered as investments not aligned with the environmental and social characteristics promoted. There is no minimum E/S safeguards on this bucket.

Source: UBP, as of 29 December 2023

ΕU

Taxonomy.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment framework is not intended to focus only on a company's ESG credentials at the expense of its financial performance potential. Indeed, the approach is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

During the reporting period the Sub-Fund has applied exclusion rules, which reduce the exposure to carbon-intensive sectors and companies reported to be in breach of any UN Global Compact principles. These rules include the exclusion of companies with certain exposure to conventional oil & gas revenues (10%), exposure to revenues from unconventional oil and gas extraction (10%) and exposure to other revenues associated to unconventional oil and gas (10%) and exposure to thermal coal extraction (10%) as well as revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas (10%, 30% and 30% respectively). Any company in breach of global norms, as flagged by both MSCI ESG Research and Morningstar Sustainalytics, is excluded as well.

In 2023, the team engaged with a portfolio holding on ESG disclosure namely on EU-Taxonomy reporting as also detailed above.

Furthermore, the Investment Manger continued to perform its duty as a responsible shareholder through proxy voting. Institutional Shareholder Service (ISS-Sustainability package) votes on behalf of the Sub-Fund. ISS recommendations for voting do not necessarily have to be followed and UBP may prefer to vote independently based on the team's understanding and discussions with company management. In practice, portfolio managers can instruct ISS to vote on their behalf as per their recommendations. Portfolio managers can consult ISS recommendations and make their own decisions, under the supervision (involving a veto and a final decision right) of the relevant Management Company / Fund's arbitration body, or according to client requirements. Exceptions are documented and agreed upon by the relevant ManCo Conducting Officer. Several cases of such overrides have been recorded in 2023.

#### SFDR SCHEDULE- Annex IV

Sustainable
investment means
an investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or

social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

regulation (EO) 2019/2088 and Article 6, inst paragraph, or regulation (EO) 2020

Product name: UBAM - GLOBAL FINTECH EQUITY Legal entity identifier: O00000869\_00000128

### **Environmental and/or social characteristics**

Did this financial product have a susta	inable investment objective?
● ● □ Yes	● ○ 図 No
☐ It made sustainable investments with an environmental objective: % ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
☐ It made sustainable investments with a social objective%	☑ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark MSCI AC World NR USD was met at all times, the latest performance is shown in the following section. By targeting a lower carbon intensity than its benchmark, the environmental characteristics promoted by this product have positively contributed to climate change mitigation.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	5.8	128.9

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

To measure the achievement of the environmental characteristics promoted by the Sub-Fund, the Sub-Fund's performance relative to its benchmark based on the following indicators were considered:

- The Weighted Average Carbon Intensity of the companies in which the portfolio is invested; The WACI of the portfolio (5.8 tCO2e/\$ mi. sales) was significantly lower than the benchmark (128.9 tCO2e/\$ mi. sales).

### And compared to previous periods?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	6.3	161.0

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

Following positions changes in the portfolio and the organic reduction of their own carbon intensity by some portfolio holdings, the weighted average carbon intensity (WACI) of the Sub-Fund decreased in absolute terms between end of 2022 and end of 2023.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

### **Environmental and/or social characteristics**

#### Did this financial product have a sustainable investment objective? ● □ Yes ⊠ No ☐ It made **sustainable investments** with an environmental objective: characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12.5% of sustainable investments ☐ in economic activities that qualify as environmentally sustainable under ☐ with an environmental objective in economic the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic ☐ in economic activities that do not activities that do not qualify as as environmentally environmentally sustainable under the EU sustainable under the EU Taxonomy Taxonomy It promoted E/S characteristics, but did not ☐ It made **sustainable investments** make any sustainable investments with a social objective%

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's objective of maintaining an average portfolio's ESG score above the median score of the investment universe was met, as shown in the following section.

Moreover, the environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark was met at all times.

Finally, through the exclusion of companies in breach of the United Nations Global Compact, the social objective of the product of having better corporate sustainability than its benchmark TOPIX TR Index has also been met.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund	Index*/Investable universe**
Average ESG Score – Proprietary model	184	144
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	56.44	94.58
Share of companies in breach of the UN Global Compact	0.00%	0.2%

Past performance is not a guide for current or future returns.

Source: UBP, SNAM, MSCI ESG Research, as of 29 December 2023

\*Index: TOPIX TR Index

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

### And compared to previous periods?

Sustainability indicator	Sub-fund	Index*/Investable universe**
Average ESG Score – Proprietary model	183	146
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	55.7	94.4
Share of companies in breach of the UN Global Compact	0.0%	0.2%

\*Index: TOPIX TR Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reporting period, the Sub-Fund had 12.5% of sustainable investments, which contributed to the following objectives that the Sub-Fund partially made:

- environmental (7.1%) with investments in companies whose solutions promote, among other things, energy efficiency, alternative energy and pollution prevention.
- social (5.4%) with investments in companies whose solutions promote, among other things, major disease treatment, nutrition and sanitation.
- How did the sustainable investments not cause significant harm to any sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*\*</sup>The investable universe is comprised of the best 300 stocks with an ESG rating (Proprietary model) out of a list of 3600 listed stocks in Japan

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors).

### How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Taxonomy aligned investments

Other investments

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Sustainalytics - Reported Taxonomy-alignment, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

N/A

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

7.1%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

This includes primarily companies that do not have to report under the EU Taxonomy regulation, but which have activities that are estimated to contribute to environmental objectives, such as West Japan Railway Company or Meidensha.

Taxonomy-aligned activities are expressed as a share of:
- turnover

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of socially sustainable investments?

5.4%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.8%

The Sub-Fund held 2.8% in other net assets (primarily cash, other net assets, and cash equivalents held for liquidity purposes). While there was no minimum environmental or social safeguards on these investments, this is not expected to have any impact on the sustainability objective of this Sub-Fund.

Source: UBP, as of 29 December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- Using the methodology described in the Sub-Fund's prospectus, the Investment Manager removed companies involved in certain sectors or business areas from the investment universe.
- The Sub-Fund invested only in companies with high ESG scores, ensuring the portfolio consistently had a high ESG score overall.
- Through the exercise of voting rights and engagement activities, the Sub-Fund has been working to facilitate improvements to companies' environmental and social initiatives. The Investment Manager engaged with companies that do not disclose their greenhouse gas (GHG) emissions or medium/long term emissions reduction targets to help facilitate the achievement of net zero by 2050.

As lead manager under the collective engagement initiative CA100+, the Investment Manager held several meetings with a leading Japanese energy company to encourage it to accelerate its decarbonisation strategy.

The Investment Manager is also assistant to the lead manager for engagement with a logistics services company, with whom engagement was conducted regarding managing directors independence.

For companies that were not disclosing their GHG emissions, we participated in an effort that resulted in three companies releasing medium-term greenhouse gas emissions targets

• The Investment Manager worked to improve company initiatives and maintain a portfolio with high overall quality in terms of E, S and G by monitoring corporate scandals, holding dialogue with companies, and removing names from the investable universe when necessary.

How did this financial product perform compared to the reference benchmark? No reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they

promote.

The **EU Taxonomy** 

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark the Swiss Performance Index was met at all times, the latest performance is shown in the following section. By targeting a lower carbon intensity than its benchmark, the environmental characteristics promoted by this product have positively contributed to climate change mitigation.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	23.5	83.3

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

\*Index: Swiss Performance Index

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

To measure the achievement of the environmental characteristics promoted by the Sub-Fund, the Sub-Fund's performance relative to its benchmark based on the following indicators were considered:

- The Weighted Average Carbon Intensity of the companies in which the portfolio is invested; the WACI of the portfolio (23.5 (tCO2e/\$ mi. sales)) was 70% lower than the benchmark (83.3 (tCO2e/\$ mi. sales)).

### And compared to previous periods?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	35.1	109.0

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

\*Index: Swiss Performance Index

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

Following the organic reduction of their own carbon intensity by some portfolio holdings, the weighted average carbon intensity (WACI) of the Sub-Fund decreased in absolute terms between end of 2022 and end of 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

objectives?

During the reporting period, the Sub-Fund had 9.7% of sustainable investments, which contributed to the following objectives that the Sub-Fund partially made:

- environmental (3.8%) such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources.
- social (5.9%) such as major disease treatment: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

At the end of 2023, the Sub-Fund was invested in one company which had reported its taxonomy-aligned revenues at the time of writing, knowing that most Swiss companies do not fall under the EU regulations. This company also passed our DNSH and Minimum Safeguards criteria, resulting in an allocation of 0.6% (revenue-based) sustainable investments with an environmental objective aligned with the EU Taxonomy at portfolio level.

Did the financial product invest in fossil gas and/or nuclear energy related activities complewith the EU Taxonomy?						
	YES					
		In fossil gas		in nuclear energy		
⊠	NO					

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. a green economy.

Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

### What was the share of investments in transitional and enabling activities?

Reported share of investments in transitional activities 0%
Reported share of investments in enabling activities 0.6%

Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023

All taxonomy-aligned revenues were in enabling activities (0.6% revenue-based).

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The Sub- Fund had no allocation to taxonomy-aligned investments last year, knowing that most Swiss companies do not fall under the EU regulations. The percentage of investments aligned with the EU Taxonomy increased in 2023 due to one Swiss company in the Industrials sector, also listed on the European stock market, that started reporting its taxonomy related activities.

# What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

3.1%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

This includes an additional 2.4% (revenue-based) investments that are estimated by Morningstar Sustainalytics to be aligned with the EU Taxonomy climate mitigation and adaptation objectives, as well as 0.7% other investments with an environmental objective, either not related to climate or not covered by the Taxonomy.

### What was the share of socially sustainable investments?

5.9%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.5% representing holdings that are not covered by MSCI ESG Research, P&L from derivatives for FX hedging share classes and the cash position of the Sub-Fund for flows management purposes, which is considered as investments not aligned with the environmental and social characteristics promoted. There is no minimum E/S safeguards on this bucket.

Source: UBP, as of 29 December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment framework is not intended to focus only on a company's ESG credentials at the expense of its financial performance potential. Indeed, the approach is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

During the reporting period the Sub-Fund has applied exclusion rules, which reduce the exposure to carbon-intensive sectors and companies reported to be in breach of any UN Global Compact principles. These rules include the exclusion of companies with certain exposure to conventional oil & gas revenues (5%), any exposure to revenues from unconventional oil and gas extraction, exposure to other revenues associated to unconventional oil and gas (5%) and any exposure to thermal coal extraction and sale to external parties as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas. Any company in breach of global norms, as flagged by both MSCI ESG Research and Morningstar Sustainalytics, is excluded as well.

In 2023, the team engaged with several portfolio holdings on topics such as Biodiversity, ESG disclosure or governance, including board diversity.

This Sub-Fund generally avoided biodervisity laggards to the extent possible and engaged with companies with any potential impact on biodiversity. The Investment Team namely engaged with a company in the Consumer Staples sector on issues related to palm oil production and deforestation allegations as well as plastic pollution. The company provided a constructive feedback on the current status and their action plan.

Furthermore, the Investment Manager continued to perform its duty as a responsible shareholder through proxy voting. Institutional Shareholder Service (ISS-Sustainability package) votes on behalf of the Sub-Fund. ISS recommendations for voting do not necessarily have to be followed and UBP may prefer to vote independently based on the team's understanding and discussions with company management. In practice, portfolio managers can instruct ISS to vote on their behalf as per their recommendations. Portfolio managers can consult ISS recommendations and make their own decisions, under the supervision (involving a veto and a final decision right) of the relevant Management Company / Fund's arbitration body, or according to client requirements. Exceptions are documented and agreed upon by the relevant ManCo Conducting Officer. Several cases of such overrides have been recorded in 2023.

In line with the Minder Initiative, the team held dedicated meetings with Swiss companies ahead of their AGMs in 2023, discussing mostly compensation related topics, enabling them to vote on AGM items in an informed way instead of just taking the recommendations of our proxy voting provider.

• How did this financial product perform compared with the reference benchmark?

N/A

How did this financial product perform compared with the broad market index?

N/A

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective. provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lav down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### **SFDR SCHEDULE- Annex IV**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - SWISS SMALL AND MID CAP EQUITY

Legal entity identifier: O00000869\_00000097

# **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?			
● ● □ Yes	● ○ 図 No		
☐ It made sustainable investments with an environmental objective: % ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>☑ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.2% of sustainable investments</li> <li>☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>☑ with a social objective</li> </ul>		
☐ It made sustainable investments with a social objective%	☐ It promoted E/S characteristics, but <b>did not</b> make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's environmental objective of having a Weighted Average Carbon Intensity lower that that of its benchmark the SPI Extra was met at all times, the latest performance is shown in the following section. By targeting a lower carbon intensity than its benchmark, the environmental characteristics promoted by this product have positively contributed to climate change mitigation.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

Sustainabiliy indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	28.9	34.1

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

To measure the achievement of the environmental characteristics promoted by the Sub-Fund, the Sub-Fund's performance relative to its benchmark based on the following indicators were considered:

The Weighted Average Carbon Intensity of the companies in which the portfolio is invested; the WACI of the portfolio (28.9 tCO2e/\$ mi. sales)) was 15% lower than the benchmark (34.1 tCO2e/\$ mi. sales)).

### • And compared to previous periods?

Sustainabiliy indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	26.9	36.3

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

Following portfolio changes and despite the organic reduction of their own carbon intensity by some portfolio holdings, the weighted average carbon intensity (WACI) of the Sub-Fund slightly increased in absolute and relative terms between end of 2022 and end of 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reporting period, the Sub-Fund had 10.2% of sustainable investments, which contributed to the following objectives that the Sub-Fund partially made:

- environmental (6.6%) such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources.
- social (3.6%) such as major disease treatment or nutrition: for example through investments in companies with revenues from products for the treatment or diagnosis of major diseases of the world or with revenues from basic food products.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*</sup>Index: SPI Extra

<sup>\*</sup>Index: SPI Extra

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As at	30/12/	2022	As	at 29/12/2	2023	
Indicator	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Past and Planned actions
PAI 3	GHG intensity of investee companies (tCO2eq/EURm revenue)	28.0	90.9%	99.7%	27.9	93.4%	99.0%	The investment team continues to consider PAI 3 by paying attention to issuers' activities, greenhouse gas (GHG) emissions and climate strategy and continue to integrate ESG consideration, including climate change, in companies' financial modelling.
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0%	96.5%	99.7%	0%	91.6%	99.0%	The investment team continues to consider PAI 10 by excluding companies involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	99.7%	99.7%	0%	99.0%	99.0%	The investment team continues to consider PAI 14 by excluding companies involved in the manufacture or selling of controversial weapons.

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

10.2%

What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	99.80%	91.20%
#2 Other	0.20%	8.80%
#1A Sustainable	7.80%	10.20%
#1B Other E/S characteristics	92.00%	81.00%
Taxonomy-aligned	0.00%	0.00%
Other environmental	5.60%	6.60%
Social	2.10%	3.60%

Source: UBP, as of 29 December 2023

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#### In which economic sectors were the investments made?

Sector	% Assets
Industrials	31.42%
Health Care	20.23%
Financials	15.73%
Consumer Staples	13.71%
Information Technology	7.77%
Materials	5.80%
Consumer Discretionary	3.25%
Cash	1.47%
Real Estate	0.60%
Total	100.00%

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

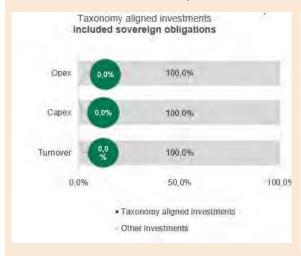

In the absence of reported information on taxonomy-alignment by companies, knowing that most Swiss companies do not fall under the EU regulations, the Investment Manager considers that this Sub-Fund had no taxonomy-aligned investments as at 29 December 2023.

•		e financial prod lying with the E	est in fossil gas and/or nuclear energy related activities comy?
	YES		
		In fossil gas	in nuclear energy
$\boxtimes$	NO		

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory

note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported data, Morningstar Sustainalytics, as of 29 December 2023
The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Transitional activities: 0% Enabling activities: 0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

6.6%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

In the absence of taxonomy reported data, this includes 6.4% in investments that are estimated by Morningstar Sustainalytics to be aligned with the current EU Taxonomy climate mitigation and adaptation objectives, as well as other investments with other environmental objectives, either not related to climate or not yet covered by the Taxonomy.

economic activities

under the EU Taxonomy.

What was the share of socially sustainable investments?

3.6%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

8.8% representing holdings that are not covered by MSCI ESG Research, P&L from derivatives for FX hedging share classes and the cash position of the Sub-Fund for flows management purposes, which is considered as investments not aligned with the environmental and social characteristics promoted. There is no minimum E/S safeguards on this bucket.

Source: UBP, as of 29 December 2023

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment framework is not intended to focus only on a company's ESG credentials at the expense of its financial performance potential. Indeed, the approach is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process.

During the reporting period the Sub-Fund has applied exclusion rules, which reduce the exposure to carbon-intensive sectors and companies reported to be in breach of any UN Global Compact principles. These rules include the exclusion of companies with certain exposure to conventional oil & gas revenues (5%), any exposure to revenues from unconventional oil and gas extraction, exposure to other revenues associated to unconventional oil and gas (5%) and any exposure to thermal coal extraction and sale to external parties as well as no revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas. Any company in breach of global norms, as flagged by both MSCI ESG Research and Morningstar Sustainalytics, is excluded as well.

In 2023, the team engaged with several portfolio holdings on topics such as climate change strategy, ESG disclosure or governance, including board diversity.

Furthermore, the Investment Manager continued to perform its duty as a responsible shareholder through proxy voting. Institutional Shareholder Service (ISS-Sustainability package) votes on behalf of the Sub-Fund. ISS recommendations for voting do not necessarily have to be followed and UBP may prefer to vote independently based on the team's understanding and discussions with company management. In practice, portfolio managers can instruct ISS to vote on their behalf as per their recommendations. Portfolio managers can consult ISS recommendations and make their own decisions, under the supervision (involving a veto and a final decision right) of the relevant Management Company / Fund's arbitration body, or according to client requirements. Exceptions are documented and agreed upon by the relevant ManCo Conducting Officer. Several cases of such overrides have been recorded in 2023.

In line with the Minder Initiative, the team held dedicated meetings with Swiss companies ahead of their AGMs in 2023, discussing mostly compensation related topics, enabling them to vote on AGM items in an informed way instead of just taking the recommendations of our proxy voting provider.

How did this financial product perform compared to the reference benchmark?

No reference benchmark.

Reference henchmarks are

indexes to
measure whether
the financial
product attains the
environmental or
social
characteristics that
they promote.

How did the reference benchmark differ from a broad market index?

N/A

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
	☐ with a social objective
☐ It made sustainable investments with a social objective%	☐ It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Over the course of the reporting period, the Sub-Fund's environmental objective of having a Weighted Average Carbon Intensity lower than that of its benchmark MSCI AC World NR USD was met at all times, the latest performance is shown in the following section. By targeting a lower carbon intensity than its benchmark, the environmental characteristics promoted by this product have positively contributed to climate change mitigation.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	10.7	128.9

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

To measure the achievement of the environmental characteristics promoted by the Sub-Fund, the Sub-Fund's performance relative to its benchmark based on the following indicators were considered:

The Weighted Average Carbon Intensity of the companies in which the portfolio is invested; The WACI of the portfolio (10.7 tCO2e/\$ mi. sales) was significantly lower than the benchmark (128.9 tCO2e/\$ mi. sales).

#### - And compared to previous periods?

Sustainability indicator	Sub-Fund	Index*
Weighted Average Carbon Intensity (tCO2e/\$ mi. sales)	13.2	161.0

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

Following positions changes in the portfolio and the organic reduction of their own carbon intensity by some portfolio holdings, the weighted average carbon intensity (WACI) of the Sub-Fund decreased in absolute terms between end of 2022 and end of 2023.

 What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reporting period, the Sub-Fund had 8.3% of sustainable investments, which contributed to the following objectives that the Sub-Fund partially made:

- environmental (8.3%) such as climate change mitigation through resource efficiency: for example through investments in companies with revenues from products or services that help reduce the consumption of energy, raw materials, and other resources.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

<sup>\*</sup>Index: MSCI AC World NR USD

<sup>\*</sup>Index: MSCI AC World NR USD

Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors.

# - How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

In addition, some PAIs were also taken into account via the Sub-Fund's objective of maintaining a weighted average carbon intensity lower than that of the investment universe.

# Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As at 30/12/2022		As at 29/12/2023		2023

# M

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

In the absence of reported information on taxonomy-alignment by companies, the Investment Manager considers that this Sub-Fund had no taxonomy-aligned investments as at 29 December 2023.

		e financial prod ying with the EU	est in fossil gas and/or nuclear energy related activities my?
	YES		
		In fossil gas	in nuclear energy
$\boxtimes$	NO		

<sup>&</sup>quot;1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment data, Morningstar Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Transitional activities: 0% Enabling activities:0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

8.3%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

In the absence of taxonomy reported data, this includes 4.4% of the investments that are estimated to be aligned by Morningstar Sustainalytics with the EU Taxonomy climate mitigation objective, as well as 3.9% with an environmental objective not covered by the climate objectives of the Taxonomy.

Taxonomyaligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

### What was the share of socially sustainable investments?

0%

Source: UBP, Morningstar Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.3% representing the P&L from derivatives for FX hedging share classes and the cash position of the Sub-Fund for flows management purposesfor flows management purposes, which is considered as investments not aligned with the environmental and social characteristics promoted. There is no minimum E/S safeguards on this bucket.

Source: UBP, as of 29 December 2023

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment framework is not intended to focus only on a company's ESG credentials at the expense of its financial performance potential. Indeed, the approach is intended to be holistic as ESG and sustainability factors are fully integrated across the investment process

During the reporting period, the Sub-Fund has applied exclusion rules, which reduce the exposure to carbon-intensive sectors, and to companies reported to be in breach of any UN Global Compact principles. These rules include the exclusion of companies with certain exposure to conventional oil & gas revenues (10%), exposure to revenues from unconventional oil and gas extraction (10%), exposure to other revenues associated to unconventional oil and gas (10%) and exposure to thermal coal extraction and sale to external parties (10%) as well as revenues or installed capacities in power generation derived from coal, nuclear sources or oil & gas (10%, 30% and 30% respectively). Any company in breach of global norms, as flagged by both MSCI ESG Research and Morningstar Sustainalytics, is excluded as well.

Furthermore, the Investment Manger continued to perform its duty as a responsible shareholder through proxy voting. Institutional Shareholder Service (ISS-Sustainability package) votes on behalf of the Sub-Fund. ISS recommendations for voting do not necessarily have to be followed and UBP may prefer to vote independently based on the team's understanding and discussions with company management. In practice, portfolio managers can instruct ISS to vote on their behalf as per their recommendations. Portfolio managers can consult ISS recommendations and make their own decisions, under the supervision (involving a veto and a final decision right) of the relevant Management Company / Fund's arbitration body, or according to client requirements. Exceptions are documented and agreed upon by the relevant ManCo Conducting Officer.

Reference benchmarks are indexes to

#### SFDR SCHEDULE- Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - MULTIFUNDS ALLOCATION RESPONSIBLE

Legal entity identifier: O00000869\_0000093

# **Environmental and/or social characteristics**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by this Sub-Fund were achieved by investing 76.4% in Art. 8 and 16.0% in Art. 9 funds which promoted environmental and/or social characteristics or had sustainable investment as their objective, as shown in the table below.

We held funds that contributed notably to climate mitigation and better water treatment.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective. provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852. establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

Sustainability indicator	Sub-fund
Share of investment in Art. 8 funds	76.4%
Share of investment in Art. 9 funds	16%

Past performance is not a guide for current or future returns. Source: UBP, Morningstar, as of 29 December 2023

### And compared to previous periods?

Sustainabiliy indicator	Sub-fund
Share of investment in Art. 8 funds	76.3%
Share of investment in Art. 9 funds	16.6%

Past performance is not a guide for current or future returns. Source: UBP, Morningstar, as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reporting period, the Sub-Fund had 47.6% sustainable investments. The sustainable investments this Sub-Fund had contributed to the following objectives:

- Environmental (27.8%) mainly through investments in dedicated climate change mitigation funds such as Nordea Global Climate & Environment and Schroder Global Energy Transition
- Social (19.8%) mainly through investment in dedicated thematic funds such as Natixis Thematic Water Fund which notably finances access to clean water, and Robeco New World Financials

Our investment process/approach is focused on the identification of "true" sustainable players and thematics, to blend them and to offer an optimized and diversified investment vehicule. In other words we aim to avoid investing in controversial sustainable players.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors).

# How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund monitors and aim to minimise the exposure of the underlying funds to breaches of the UN Global Compact. In case of breach, the Investment Manager engages with the concerned asset manager.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As	at 30/12,	/2022	As at 29/12/2023			
Indicator	Metrics	Value	Covered assets	Eligible Assets	Value	Covered assets	Eligible Assets	Planned actions
PAI 10	Share of investments that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (%)	0.1%	52.2%	56.9%	0.3%	86.4%	99.45%	The investment manager selects funds which take into account potential breaches of UN Global Compact and OECD guidelines to ensure that exposure to violating companies is limited.  Over the period, the sub-fund held:  Sparinvest Ethical Global Value has a position into Philips which is flagging on MSCI due to faulty artificial respirators . Through their research, however, Sparinvest believes however that Philips is a company that conduct business responsibly with strengths in climate.  Amundi Global Aggregate had a position in Pemex which they recognized that it takes time to engage with. The PM decided to remove the position by the end of the year 2023 due to the lack of advance in terms of engagement.
PAI 14	Share of investments involved in the manufacture or selling of controversial weapons (%)	0%	52.2%	56.9%	0%	86.2%	99.45%	The investment manager monitors the investee funds' policy to ensure they exclude controversial weapons

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

At the time of writing this report and based on look-through analysis or on funds' EET reported or committed information as available, the fund held 1.1% in Taxonomy-aligned investments (revenue-based) that also passed our "do no significant harm" and "minimum safeguards" criteria.

•		ial product invest in the EU Taxonomy?	fossil gas	and/or nuclear	energy related	activities
	YES					
		In fossil gas		in nuclear energy		
$\boxtimes$	NO					

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

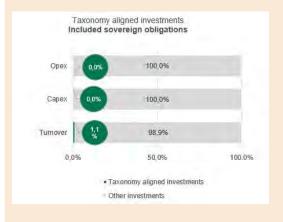

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: reported Taxonomy-alignment, Sustainalytics or Funds' EET reported or committed taxonomy alignment – as available, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

What was the share of investments in transitional and enabling activities?

Transitional activities: 0%

Enabling activities: 0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

26.7%

Source: UBP, as of 29 December 2023 - based on look-through analysis or on funds' EET reported or committed information as available

What was the share of socially sustainable investments?

19.8%

Source: UBP, as of 29 December 2023 - based on look-through analysis or on funds' EET reported or committed information as available

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

7.6%, representing cash, other net assets and cash equivalent, as well as holdings in funds classifed as Article 6 according to SFDR.

There were no environmental or social safeguards on this bucket.

Source: UBP, as of 29 December 2023

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We remained focused on actively managing our underlying asset managers and making sure they are not in breach with our responsible investment policy. Each time a position is/was identified as breaching our policy we start(ed) to engage with the managers by documenting each case. Dialogue with asset managers were constructive, and positive, with all managers having either sold controversial positions and/or strongly argumentated in favour of maintaining the positions. These controversial stocks were essentially companies flagging the PAI10 related to UN Global Compact norms.

How did this financial product perform compared to the reference benchmark?

No reference benchmark.

How did the reference benchmark differ from a broad market index?

# To what minimum extent are sustainable investments with an environmental objective

### aligned with the EU Taxonomy?

At the time of writing this report and based on look-through analysis or on funds' EET reported or committed information as available, the fund held 0.9% in Taxonomy-aligned investments (revenue-based) that also passed our "do no significant harm" and "minimum safeguards" criteria.

- Did the financial product invest in fossil gas and/or nuclear energy related activities
- complying with the EU Taxonomy?

YES	

In fossil gas		in nuclear energ
 	<del></del>	

⊠ NO

#### To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling
activities directly
enable other
activities to make
a substantial
contribution to an
environmental
objective.

# Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

- "1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate
- change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the

left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

9.9% representing cash and cash equivalent, as well as holdings in funds classifed as Article 6 according to SFDR.

There were no environmental or social safeguards on this bucket.

Source: UBP, as of 29 December 2023

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We remained focused on actively managing our underlying asset managers and making sure they are not in breach with our responsible investment policy. Each time a position is/was identified as breaching our policy we start(ed) to engage with the managers by documenting each case. Dialogue with asset managers were constructive, and positive, with all managers having either sold controversial positions and/or strongly argumentated in favour of maintaining the positions. These controversial stocks were essentially companies flagging the PAI10 related to UN Global Compact norms.

## **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?					
● ● □ Yes	•	⊠ No			
☐ It made sustainable investments with an environmental objective: % ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy		It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.3%* of sustainable investments  We with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy			
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		<ul> <li>☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>☑ with a social objective</li> </ul>			
☐ It made sustainable investments with a social objective%		It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by this Sub-Fund were achieved by investing 61.5% in Art. 8 and 37.7% in Art. 9 funds which promoted environmental and/or social characteristics or had sustainable investment as their objective, as shown in the table below.

We held funds that principally contributed to climate mitigation and better water treatment..

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

<sup>\*</sup> Please note that due to a lack of reported data at the time of writing this report, the level of sustainable investments indicated is based on the level of commitments of the underlying sub-funds.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

#### How did the sustainability indicators perform?

Sustainabiliy indicator	Sub-fund
Share of investment in Art. 8 funds	61.5%
Share of investment in Art. 9 funds	37.7%

Past performance is not a guide for current or future returns. Source: UBP, Morningstar, as of 29 December 2023

#### • And compared to previous periods?

Sustainabiliy indicator	Sub-fund
Share of investment in Art. 8 funds	64.1%
Share of investment in Art. 9 funds	33.5%

Past performance is not a guide for current or future returns. Source: UBP, Morningstar, as of 30 December 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reporting period, the Sub-Fund had 62.3% sustainable investments. The sustainable investments this Sub-Fund had contributed to the following objectives:

- Environmental (35.8%) notably through investments in *thematic funds such as BNP Global Environment, Thematic Water and Schroder Global Energy Transition.*
- Social (26.5%) notably through investment in an ETF focused on Health Care and Sparinvest Ethical Global Value.

Our investment process/approach is focused on the identification of "true" sustainable players and thematics, to blend them and to offer an optimized and diversified investment vehicule.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors).

# How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

Were sustainable investments aligned with the OECD Guidelines for Multinational and the UN Guiding Principles on Business and Human Rights? Details:

The Sub-Fund monitors and aim to minimise the exposure of the underlying funds to breaches of the UN Global Compact. In case of breach, the Investment Manager engages with the concerned asset manager.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

		As	at 30/12,	/2022	As	As at 29/12/2023

### What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

62.3%

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

	2022	2023
Investments	100%	100%
#1 Aligned with E/S characteristics	97.50%	99.20%
#2 Other	2.50%	0.80%
#1A Sustainable	34.70%	62.30%
#1B Other E/S characteristics	62.80%	36.90%
Taxonomy-aligned	0.00%	1.60%
Other environmental	0.00%	34.20%
Social	0.00%	26.50%

Source: UBP, as of 29 December 2023

Please note that the level of sustainable investments indicated is based on either UBP's sustainable investment methodology when look-through is available, or investee funds' reported or committed sustainable investment allocation, as available.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#20ther** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

### Sustainable investment objective

Did this financial product have a sustainable investment objective?								
● ● ☑ Yes	● ○ □ No							
<ul> <li>It made sustainable investments with an environmental objective: 96.1%</li> <li>☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> </ul>	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy							
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li>with a social objective</li> </ul>							
☐ It made sustainable investments with a social objective: %	☐ It promoted E/S characteristics, but <b>did not make any sustainable investments</b>							

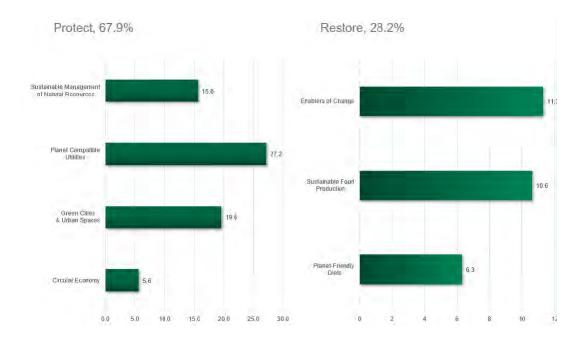

# To what extent was the sustainable investment objective of this financial product met?

This financial product has the following sustainable objectives: Climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, protection and restoration of biodiversity and ecosystems.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

The sustainable investments contributed to the sustainable investment objectives as:

 This Sub-Fund is committed to hold a minimum of 80% in sustainable investments. At the end of Dec, the Sub-Fund held 96.1% in sustainable investments, of which 2.3% in reported taxonomy aligned investments. These sustainable investments include at all times a mix of environmentally sustainable investments, including, but not limited to, the objectives mentioned in the previous paragraph.

 The Investment Manager has engaged with companies, both directly and collaboratively, on a variety of issues including, but not limited to, their GHG emissions and climate strategy or their biodiversity-related practices. Engagement examples are provided in UBP's annual impact report.

#### How did the sustainability indicators perform?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Sustainability indicator	Sub-fund	Index*
IMAP** Score	14.8	-
Weighted Average Carbon Intensity*** (tCO2e/\$ mi. revenues)	166.9	128.9
Share of companies in breach of the UN Global Compact	0.0%	0.7%
Share of companies in under watch of UNGC	0.0%	-

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

At the end of 2023, the Sub-Fund's WACI was 30% higher than the benchmark. This can be explained by several factors :

- Sectorial bias of the opportunity set: By function, biodiversity protection/restoration
  enablers and solution providers tend to be more carbon intensive than average
  (industrial companies, machinery, utilities....). This is therefore inherent to the
  defined universe and not created by selection or sizing. In fact, a high proportion of
  names that constitute the fund's investible universe have a carbon intensity value
  above that of the index.
  - For example, utility companies such as recyclers or water treatment companies run high energy intensity processes. However, these enable significant positive impacts down the value chain by enabling a more circular economy. The benefit of these companies is unfortunately not captured by scope 1 and 2 data, but they represent an important area in the context of biodiversity protection.
- Conversely, the index WACI benefits from low carbon sectors (at least on scopes 1+2), such as Information Technology and Financials. These sectors have large representations in the index and therefore contribute positively to its carbon value, but most of the companies are not eligible to a biodiversity restoration strategy.
- 3. That being said, the fund's carbon intensity is managed as much as possible by closely monitoring individual contributions and ensuring the number of very high emitter names is limited. Moreover, higher emission intensity of companies today does not mean they do not have carbon strategies and science-based reduction targets (c60% of portfolio has SBTi).
- 4. Overall, the portfolio managers balance the carbon intensity metric with the other side of the mandate namely protecting/restoring biodiversity and generating financial returns for investors.

<sup>\*</sup>Index: MSCI AC World Net Return

<sup>\*\*</sup> The intensity of the biodiversity contribution (IMAP) is measured through the Investment Manager's proprietary scoring system, with a minimum scoring requirement of 12/20 for inclusion in the Sub-Fund.

<sup>\*\*\*</sup>The WACI is defined as the market-weighted average of total carbon emissions in tons of CO2 divided by total revenues. It should be noted that only Scope 1 and 2 emissions are taken into account, as Scope 3 data is additive across companies and may result in double counting.

#### And compared to previous periods?

Sustainability indicator	Sub-fund	Index*
IMAP** Score	14.7	-
Weighted Average Carbon Intensity*** (tCO2e/\$ mi. revenues)	186.4	162.2
Share of companies in breach of the UN Global Compact	0%	0.6%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

The IMAP score is in line with 2022 data and we still do not have a company in breach of the UN Global Compact. Concerning the evolution of the WACI, please refer to the previous comment.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that these sustainable investments did not cause significant harm to any environmental or social sustainable objective. For this, we tested their compliance with mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors).

# How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the adverse impacts on sustainability factors primarily through the investment research, the application of an exclusion list and the norms-based screening. In particular, we tested compliance with mandatory PAIs both directly or indirectly for sustainable investments, as explained above.

<sup>\*</sup>Index: MSCI AC World Net Return

### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

#### How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

### To what minimum extent are sustainable investments with an environmental objective aligned

#### with the EU Taxonomy?

At the time of writing this report, several companies in which the fund is invested have reported EU taxonomy aligned revenues, including among others, Befesa and Veolia Environnement. Taking into account the weight of these companies in the portfolio, this resulted in a revenue-based investment of 2.3% of total assets.

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

☐ YES	
☐ In fossil gas	in nuclear energy
⊠ NO	

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: Reported Taxonomy-alignment, Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets. The sub-fund had no investments in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear)

Other investments mean Non Taxonomy-aligned

Taxonomyaligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the areen investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#### What was the share of investments in transitional and enabling activities?

Estimated share of investments in transitional activities 0.3% Estimated share of investments in enabling activities 0.9% Source: based on company reports, as of 29 December 2023

Information on the split between transitional and enabling activities is not always available. Based on the partial information available, the fund held 0.3% investments in transitional activities and 0.9% in enabling activities (weighted aligned revenues).

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference peeriods?

The percentage of investments aligned with the EU Taxonomy increased from 1.2% in 2022 to 2.3% in 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

93.8%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

#### This includes:

- 9.9% invested in companies having a share of their revenues estimated by Sustainalytics to be taxonomy aligned, but for which reported data was not available at the time of writing (revenue-adjusted)
- Other investments with an environmental objective that is not covered by the current EU Taxonomy (which only covers climate change mitigation and adaptation)

What was the share of socially sustainable investments?

N/A

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

3.9%

The Sub-Fund held 3.9% in other net assets (primarily cash plus derivatives used for share class hedging) at the end of the year. While there was no minimum environmental or social safeguards on these investments, this is not expected to have any impact on the sustainability objective of this Sub-Fund.

Source: UBP, as of 29 December 2023

environment al objective that do not take into account the criteria for environment ally sustainable economic activities under

# What actions have been taken to attain the sustainable investment objective during the reference period?

On the investment side, every invested company has been assessed through an internally-designed methodology which includes but is not limited to:

- principal adverse impact indicators review
- controversies monitoring
- overall ESG/governance quality assessments,
- an exclusion list,
- materiality estimates in the IMAP score: the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

The Investment Manager exercises its voting rights, in line with the voting policy which follows sustainablitly principles.

Engagement with investee companies is conducted directly by the investment team as well as, on an ad-hoc basis, collaboratively.

The Investment manager participates in collaborative engagement to promote climate disclosures and ambitious climate strategies, notably via the CDP.

Engagement examples are provided in the annual impact report.

# How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark.

- How did the reference benchmark differ from a broad market index?
  N/A
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

N/A

- How did this financial product perform compared with the reference benchmark?
  N/A
- How did this financial product perform compared with benchmark?
  N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

#### SFDR SCHEDULE- Annex V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name: UBAM - Positive Impact Emerging Equity** 

Legal entity identifier: O00000869\_00000139

### Sustainable investment objective

#### Did this financial product have a sustainable investment objective? Yes ☐ No ☑ It made sustainable investments with an promoted Environmental/Social (E/S) environmental objective:36.6% % characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments ☐ with an environmental objective in economic in economic activities that qualify as activities that qualify as environmentally environmentally sustainable under the sustainable under the EU Taxonomy **EU Taxonomy** ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify ■ with a social objective as environmentally sustainable under the EU Taxonomy ☑ It made sustainable investments with a It promoted E/S characteristics, but did not social objective: 58.8%% make any sustainable investments

# To what extent was the sustainable investment objective of this financial product met?

This Sub-Fund addresses the UN's Sustainable Developments Goals through six themes, three environmental (healthy ecosystems, climate stability, sustainable communities) and three societal (basic needs, health & wellbeing, inclusive & fair economies). The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the United Nations Sustainable Development Goals, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

The sustainable investments contributed to the sustainable investment objectives as:

This Sub-Fund is committed to hold a minimum of 80% in sustainable investments. At
the end of Dec, the Sub-Fund held 95.4%% in sustainable investments, of which 1.3%
in reported taxonomy aligned investments. These sustainable investments include at
all times a mix of environmentally sustainable investments, including, but not limited
to, the objectives mentioned in the previous paragraph, and socially sustainable
investments.

Source: UBP as at 29/12/23— due to rounding and the difference in data sources on holdings, the total share of E and S disclosed in the above chart may vary slightly from that disclosed in the allocation table available below

The Investment Manager has engaged with companies, both directly and collaboratively, on a variety of issues including, but not limited to, their GHG emissions and climate strategy or their biodiversity-related practices. Engagement examples are provided in UBP's annual impact report.

#### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund	Index*
IMAP** Score	15.2	-
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues)	98.55	327.55
Share of companies in breach of the UN Global Compact	0.00%	4.68%
Companies with sustainability linkage to pay	10.5%	10.5%
Companies that measure employee satisfaction	37%	28%

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund

### • And compared to previous periods?

Sustainability indicator	Sub-Fund	Index*
IMAP** Score	14.3	-
Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues	112.6	320.9
Share of companies in breach of the UN Global Compact	0%	4.8%
Companies with sustainability linkage to pay	10.5%	10.5%
Companies that measure employee satisfaction	37%	28%
Sustainability indicator	Sub-Fund	Index*
IMAP** Score	14.3	-

<sup>\*</sup>Index: MSCI Emerging Markets Net TR USD

<sup>\*\*</sup>The intensity of impact (IMAP) is measured through the Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in the Sub-Fund.

<sup>\*\*\*</sup>The WACI is defined as the market-weighted average of total carbon emissions in tons of CO2 divided by total revenues. It should be noted that only Scope 1 and 2 emissions are taken into account, as Scope 3 data is additive across companies and may result in double counting.

Weighted Average Carbon Intensity (tCO2e/\$ mi. revenues	112.6	320.9
Share of companies in breach of the UN Global Compact	0%	4.8%
Companies with sustainability linkage to pay	10.5%	10.5%
Companies that measure employee satisfaction	37%	28%

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 30 December 2022

As in the previous year, the Weighted Average Carbon Intensity of the companies in which the portfolio is invested is well below the benchmark and the portfolio continues to have no exposure to companies in breach of the UN Global Compact

NB: If the WACI increased at the fund level from 2022 to 2023 we need a coment on this

<sup>\*</sup>Index: MSCI Emerging Markets Net TR USD

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks. Based on our inhouse methodology, we consider that investments in the fund do no harm. For this, we tested mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality, as well as the exclusion of some harmful sectors.

# How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the principal adverse impacts from Table 1 Annex 1 on the sustainable investments primarily through the investment research, the application of an exclusion list and the norms-based screening.

The principal adverse impacts on sustainability factors are considered at different stages of the investment process:

- through an/ our exclusion list
- in the context of its Investment Committee, the Investment Manager reviews all of the indicators available for the stocks in the portfolio
- in the Investment Manager's engagement with companies, both of individual and collective nature (including, but not limited to, GHG emissions, Activities negatively affecting biodiversity sensitive areas, Investing in companies without carbon emission reduction initiatives, Board gender diversity etc.)
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

		30/12/2022		L	29/12/2023			
Indicator	Metric	Value	Cover assets	Eligible assets	Value	Covered assets	Eligible assets	Planned actions
PAI 1	Greenhouse gas emissions (tCO2eq)- scope 1	6958.6	92.4%	94.5%	8072.6	90.9%	95.4%	Monitor overall portfolio footprint

To comply with the EU taxonomy, the criteria for fossil gas

Include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Source: Fund administration data with average calculation of the 4 quarter ends in 2023

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund invests in companies outside of the EU, hence reported data on their potential taxonomy alignment is not currently available.

That said, the Sub-Fund is invested in a number of companies which enable climate change mitigation, such as Samsung SDI, a producer of electronic components, whose activities in the manufacturing of batteries and other low carbon technologies are eligible. Based on Sustainalytics estimates, the company has 32.6% of its revenues aligned with the EU Taxonomy, taking into account the EU taxonomy minimum safeguards and DNSH tests as applied by Sustainalytics. In addition, the company also complies with UBP's strict sustainable investment DNSH and Minimum safeguards tests, including consideration of PAI, any potential controversies or any potential misalignement with environmental SDGs.

As a result, based on our analysis, we believe that this estimated level of revenue (32.6%) contributing to climate change mitigation is equivalent to taxonomy alignment.

Given the weight of Samsung SDI in the portfolio, this translates in an investment of 1.3%.

As a prudent approach, other investments with estimated taxonomy alignment revenues according to Sustainalytics are accounted for in other environmentally sustainable investments described below.

Did the financial product inve with the EU Taxonomy?	st in fossil gas and/or nuclear energy related activities complying
□ YES	
☐ In fossil gas	☐ in nuclear energy
⊠ NO	

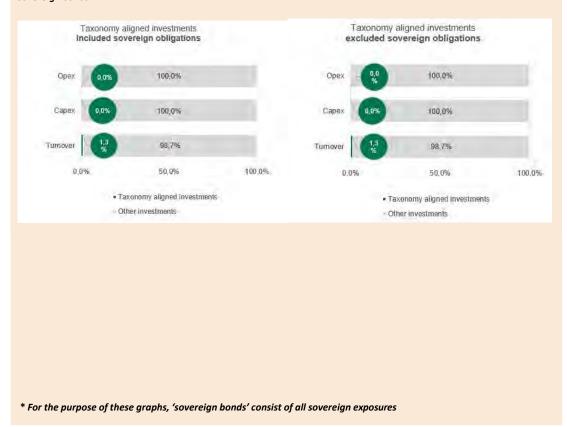

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Source: Taxonomy-alignment ,Sustainalytics -, as of 29 December 2023

The sub-fund had no investments in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets. The above reflects alignment as a result of investment in Samsung SDI as described above.

#### What was the share of investments in transitional and enabling activities?

Estimated share of investments in transitional activities 0% Estimated share of investments in enabling activities 1.3%

Source: Sustainalytics, as of 29 December 2023

The above is based only on investment in Samsung SDI as described above.

## How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As previously mentioned, the Sub-Fund invests in companies outside of the EU, hence reported data on their potential taxonomy alignment is not currently available. Still, as last year, the fund maintains some limited exposure to EU taxonomy-aligned investments (based on equivalent information as opposed to reported data).

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

35.3%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

#### This includes:

- 18.5% invested in emerging companies (other than Samsung SDI) having a share of their revenues contributing to climate change mitigation as estimated by Sustainalytics to be taxonomy aligned, but which are not required to report under the EU Taxonomy regulation. (weighted revenues-based allocation)
- Other investments with an environmental objective that is not covered by the current EU Taxonomy (covering climate change mitigation and adaptation objectives only for now)

What was the share of socially sustainable investments?

58.8%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

4.6%

The Sub-Fund held 4.6% in other net assets (primarily cash for liquidity management purposes) at the end of the year. While there was no minimum environmental or social safeguards on these investments, this is not expected to have any impact on the sustainability objective of this Sub-Fund.

Source: UBP, as of 29 December 2023

sustainable investments with an environment al objective that **do not** take into account the **criteria** for environment ally sustainable economic activities under the FU Taxonomy.

# What actions have been taken to attain the sustainable investment objective during the reference period?

On the investment side, every invested company has been assessed through an internally-designed methodology which includes but is not limited to:

- principal adverse impact indicators review
- controversies monitoring
- overall ESG/governance quality assessments,
- an exclusion list,
- materiality estimates in the IMAP score: the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

The Investment Manager exercises its voting rights, in line with the voting policy which follows sustainablitly principles.

Engagement with investee companies is conducted directly by the investment team as well as, on an ad-hoc basis, collaboratively.

The Investment manager participates in collaborative engagement to promote climate disclosures and ambitious climate strategies, notably via the CDP.

Engagement examples are provided in the annual impact report.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

#### **SFDR SCHEDULE- Annex V**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: UBAM - POSITIVE IMPACT EQUITY Legal entity identifier: 000000869\_00000122

## Sustainable investment objective

Did this financial product have a sustainable investment objective?					
● ■ ☑ Yes	● ○ □ No				
☑ It made sustainable investments with an environmental objective: 45.80%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments				
in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<ul> <li>□ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li>□ with an environmental objective in economic</li> </ul>				
☑ in economic activities that do not qualify	activities that do not qualify as environmentally sustainable under the EU Taxonomy				
as environmentally sustainable under the EU Taxonomy	☐ with a social objective				
☑ It made sustainable investments with a social objective: 52%	☐ It promoted E/S characteristics, but <b>did not</b> make any sustainable investments				

# To what extent was the sustainable investment objective of this financial product met?

This Sub-Fund addresses the UN's Sustainable Developments Goals through six themes, three environmental (healthy ecosystems, climate stability, sustainable communities) and three societal (basic needs, health & wellbeing, inclusive & fair economies). The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the United Nations Sustainable Development Goals, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

The sustainable investments contributed to the sustainable investment objectives as:

• This Sub-Fund is committed to hold a minimum of 80% in sustainable investments. At the end of Dec, the Sub-Fund held 97.8% in sustainable investments, of which 10.2% in reported taxonomy aligned investments. These sustainable investments include at all times a mix of environmentally sustainable investments, including, but not limited to, the objectives mentioned in the previous paragraph, and socially sustainable investments.

source: UBP as at 29/12/2023

The Investment Manager has engaged with companies, both directly and collaboratively, on a variety of issues including, but not limited to, their GHG emissions and climate strategy or their biodiversity-related practices. Engagement examples are provided in UBP's annual impact report.

Sustainability indicator	Sub-Fund	Index*
IMAP** Score	14.6	-
Weighted Average Carbon Intensity*** (tCO2e/\$ mi. revenues)	115.4	94.2
Share of companies in breach of the UN Global Compact	0.0%	0.0%
Share of companies with sustainability linkage to pay	73.8%	67.6%
% of companies that measure employee satisfaction	74.4%	75.4%
share of companies under watch for breaches of UNGC	5.1%	0.09%

#### How did the sustainability indicators perform?

Past performance is not a guide for current or future returns. Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

At the end of 2023, the Sub-Fund's WACI was above that of the benchmark. This results from exposures to particular companies in industrial and utility sectors that tend to have a higher level of carbon intensity (scope 1 and 2 emissions) that may be required in certain market conditions in order for the Investment Manager to fulfil the dual mandate of the portfolio. The fund's carbon intensity is managed as much as possible by closely monitoring individual contributions and ensuring the number of very high emitter names is limited. Moreover, a high and growing proportion of the portfolio is committed to or has an approved Science Based Target in place (87.2% of the portfolio vs 77.9% of the benchmark). The Investment Manager remains committed to beat the benchmark on over the long term.

<sup>\*</sup>Index: MSCI Europe NR

<sup>\*\*</sup>The intensity of impact (IMAP) is measured through the Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in the Sub-Fund.

<sup>\*\*\*</sup>The WACI is defined as the market-weighted average of total carbon emissions in tons of CO2 divided by total revenues. It should be noted that only Scope 1 and 2 emissions are taken into account, as Scope 3 data is often incomplete and may result in double counting.

## • And compared to previous periods?

Sustainabiliy indicator	Sub-Fund	Index*
IMAP** Score	15.4	-
Weighted Average Carbon Intensity*** (tCO2e/\$ mi. invested)	115.3	115.7
Share of companies in breach of the UN Global Compact	0.0%	0.0%
Companies linking pay to sustainability	73.8%	67.6%
Companies measuring employee satisfaction	74.4%	75.4%

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

\*Index: MSCI Europe NR

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks. Based on our inhouse methodology, we consider that investments in the fund do no harm. For this, we tested mandatory PAIs either directly, where data was available, or indirectly through the consideration of Controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality as well as the exclusion of some harmful sectors).

# How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the principal adverse impacts from Table 1 Annex 1 on the sustainable investments primarily through the investment research, the application of an exclusion list and the norms-based screening.

The principal adverse impacts on sustainability factors are considered at different stages of the investment process:

- through the exclusion list
- in the context of its Investment Committee, the Investment Manager reviews all of the indicators available for the stocks in the portfolio
- in the Investment Manager's engagement with companies, both of individual and collective nature (including, but not limited to, GHG emissions, Activities negatively affecting biodiversity sensitive areas, Investing in companies without carbon emission reduction initiatives, Board gender diversity etc.)
  - Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

At the time of writing this report, several companies in which the fund is invested have reported their EU taxonomy aligned revenues, including among others Getlink Act, Terna Spa or Veolia. Considering the weight of these companies in the portfolio, this resulted in a revenue-based investment of 10.2% of total assets.

Dia the imancial product invest in jossii gas ana/or nacieal energy related activit	162
complying with the EU Taxonomy?	

Did the financial product invest in facil and and/or purloar energy related activities

☐ YES	
☐ In fossil gas	in nuclear energy
⊠ NO	

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

Source:

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Reported Taxonomy-alignment, Sustainalytics, as of 29 December 2023

The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets. The subfund had no investments in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Estimated share of investments in transitional activities 0.4% Estimated share of investments in enabling activities 4.7%

Source: based on company reports, as of 29 December 2023

Information on the split between transitional and enabling activities is not always available. Based on the partial information available, the fund held 0.4% investments in transitional activities and 4.7% in enabling activities (weighted aligned revenues).

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

35.6%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

#### This includes:

- companies having a share of their revenues estimated by Sustainalytics to be taxonomy aligned, but for which reported data was not available at the time of writing
- Other investments with an environmental objective that is not covered by the EU Taxonomy (which currently only covers climate change mitigation and adaptation)

What was the share of socially sustainable investments?

52 %

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

2.2%

The Sub-Fund held 2.2% in other net assets (primarily cash plus derivatives used for share class hedging) at the end of the year. While there was no minimum environmental or social safeguards on these investments, this is not expected to have any impact on the sustainability objective of this Sub-Fund.

Source: UBP, as of 29 December 2023

# What actions have been taken to attain the sustainable investment objective during the reference period?

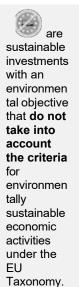

On the investment side, every invested company has been assessed through an internally-designed methodology which includes but is not limited to:

- principal adverse impact indicators review
- controversies monitoring
- overall ESG/governance quality assessments,
- an exclusion list,
- materiality estimates in the IMAP score: the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

The Investment Manager exercises its voting rights, in line with the voting policy which follows sustainablitly principles.

Engagement with investee companies is conducted directly by the investment team as well as, on an ad-hoc basis, collaboratively.

The Investment manager participates in collaborative engagement to promote climate disclosures and ambitious climate strategies, notably via the CDP.

Engagement examples are provided in the annual impact report.

The Sub-Fund UBAM - EUROPE RESPONSIBLE SMALL CAP EQUITY has been merged into the Sub-Fund UBAM-Positive Impact Equity on 17/04/2023.

How did this financial product perform compared to the reference sustainable

benchmark?

No reference benchmark.

How did the reference benchmark differ from a broad market index? N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

N/A

- How did this financial product perform compared with the reference benchmark? N/A
- How did this financial product perform compared with benchmark? N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### **SFDR SCHEDULE- Annex V**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name: UBAM - POSITIVE IMPACT GLOBAL EQUITY**

# To what extent was the sustainable investment objective of this financial product met?

This Sub-Fund addresses the UN's Sustainable Developments Goals through six themes, three environmental (healthy ecosystems, climate stability, sustainable communities) and three societal (basic needs, health & wellbeing, inclusive & fair economies). The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the United Nations Sustainable Development Goals, including, but not limited to climate change mitigation, promotion of circular economy solutions, affordable healthcare and education, and the protection and restoration of biodiversity.

The sustainability indicators were not subject to an assurance provided by one or more auditors/third parties.

The sustainable investments contributed to the sustainable investment objectives as:

This Sub-Fund is committed to hold a minimum of 80% in sustainable investments. At
the end of Dec, the Sub-Fund held 96%\* in sustainable investments, of which 0.8% in
reported taxonomy aligned investments. These sustainable investments include at all
times a mix of environmentally sustainable investments, including, but not limited to,
the objectives mentioned in the previous paragraph, and socially sustainable
investments.

<sup>\*</sup>Source: UBP as at 29/12/23— due to rounding and the difference in data sources on holdings, the total share of E and S disclosed in the above chart may vary slightly from that disclosed in the allocation table available below.

The Investment Manager has engaged with companies, both directly and collaboratively, on a variety of issues including, but not limited to, their GHG emissions and climate strategy or their biodiversity-related practices. Engagement examples are provided in UBP's annual impact report.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

### How did the sustainability indicators perform?

Sustainability indicator	Sub-Fund	Index*
IMAP Score	14.6	-
Weighted Average Carbon Intensity*** (tCO2e/\$ mi. revenues	83.49	128.86
Share of companies in breach of the UN Global Compact	0.00%	0.69%
Share of companies under watch for breaches of UNGC	2.31%	-

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 29 December 2023

The benchmark is a standard reference representing the Sub-Fund's universe but is not aligned with the sustainable objective of the Sub-Fund.

#### • And compared to previous periods?

Sustainability indicator	Sub-Fund	Index*
IMAP Score	14.9	-
Weighted Average Carbon Intensity*** (tCO2e/\$ mi. revenues	78.3	162.2
Share of companies in breach of the UN Global Compact	0%	0.6%

Past performance is not a guide for current or future returns.

Source: UBP, MSCI ESG Research, as of 30 December 2022

\*Index: MSCI AC World Net Return

As in the previous year, the Weighted Average Carbon Intensity of the companies in which the portfolio is invested is well below the benchmark and the portfolio continues to have no exposure to companies in breach of the UN Global Compact.

<sup>\*</sup>Index: MSCI AC World Net Return

<sup>\*\*</sup>The intensity of impact (IMAP) is measured through the Investment Manager's proprietary scoring system, with a minimum scoring requirement for inclusion in the Sub-Fund.

<sup>\*\*\*</sup>The WACI is defined as the market-weighted average of total carbon emissions in tons of CO2 divided by total revenues. It should be noted that only Scope 1 and 2 emissions are taken into account, as Scope 3 data is additive across companies and may result in double counting.

## How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments made by this Sub-Fund during the reporting period did not significantly harm any other sustainable investment objectives, the Investment Manager applied its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

Based on our in-house methodology, we consider that investments in the fund do no harm. For this, we tested mandatory PAIs either directly, where data was available, or indirectly through the consideration of controversies (social, environmental, governance, labour compliance), SDG alignment (environmental activities strongly misaligned with environmental SDGs and social activities strongly misaligned with social SDGs are not deemed sustainable), overall ESG and governance quality, as well as the exclusion of some harmful sectors.

# How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager sought to limit the principal adverse impacts from Table 1 Annex 1 on the sustainable investments primarily through investment research, the application of an exclusion list and norms-based screening.

The principal adverse impacts on sustainability factors are considered at different stages of the investment process:

through the exclusion list

in the context of its Investment Committee, the Investment Manager reviews all of the indicators available for the stocks in the portfolio

in the Investment Manager's engagement with companies, both of individual and collective nature (including, but not limited to, GHG emissions, Activities negatively affecting biodiversity sensitive areas, Investing in companies without carbon emission reduction initiatives, Board gender diversity etc.).

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This Sub-Fund did not invest in companies flagged as being in breach with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights according to the analyses of external providers.

Source: Fund administration data with average calculation of the 4 guarter ends in 2023

The use of different data sources and systems may result in limited variations accross the various sections of the present report.

# To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

At the time of writing this report, three companies in which the fund is invested have reported their EU taxonomy aligned revenues (Corticeira Amorim, Prysmian Spa and Schneider Electric). Taking into account the weight of these companies in the portfolio, this resulted in a revenue-based investment of 0.8% of total assets. This fund has around 15% EU exposure, with most of the companies being located outside of the EU and therefore, reporting against taxonomy alignment is limited. This explains why the Sub-Fund has just fallen short of its 1% objective.

Did the financial product the EU Taxonomy?	invest in fossil gas and/or nuclear energy related activities complying with
☐ YES	
☐ In fossil gas	☐ in nuclear energy
⊠ NO	

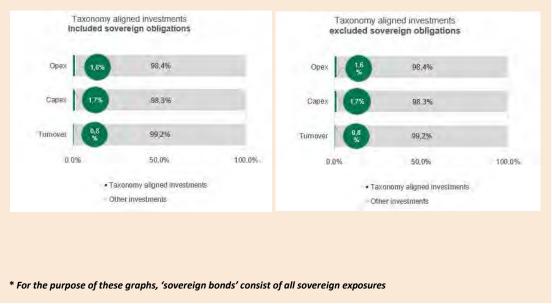

'1-Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

The taxonomy methodology was not subject to an assurance provided by one or more auditors/third parties.

Taxonomy-aligned activities are expressed as a share of:

- turnover
   reflecting the
   share of revenue
   from green
   activities of
   investee
   companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- operational
  expenditure
  (OpEx) reflecting
  green operational
  activities of
  investee
  companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Source: Reported Taxonomy-alignment, Sustainalytics, as of 29 December 2023

The sub-fund had no investments in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear. The graph 'taxonomy aligned investments-excluded sovereign obligations' represents 100% of the total net assets.

The sub-fund had no investment in taxonomy-aligned fossil gas and nuclear. As a result all taxonomy aligned turnover, capex, opex mentioned in the charts above refer to Taxonomy-aligned investments, excluding fossil gas and nuclear.

Taxonomy aligned investments mean Taxonomy aligned (no gas and nuclear) Other investments mean Non Taxonomy-aligned

What was the share of investments in transitional and enabling activities?

Estimated share of investments in transitional activities 0%
Estimated share of investments in enabling activities 0.8%
Source: based on company reports,, as of 29 December 2023

All companies reporting taxonomy-aligned revenues were involved in enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The share of taxonomy-aligned reported revenues, capex, opex has slightly decrease compared to the previous period.

are sustainable investments with an environmen tal objective that do not take into account the criteria for environmen tally sustainable economic activities under the EU Taxonomy.

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

#### This includes:

- companies having a share of their revenues estimated by Sustainalytics to be taxonomy aligned, but for which reported data was not available at the time of writing, or which do not have to report under the EU Taxonomy regulation
- Other investments with an environmental objective that is not covered by the current EU Taxonomy (which only covers climate change mitigation and adaptation)

#### What was the share of socially sustainable investments?

54.2%

Source: UBP, Sustainalytics, MSCI ESG Research, as of 29 December 2023

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

4.0%

Source: UBP, as of 29 December 2023

The Sub-Fund held 4.0% in cash for liquidity management purposes at the end of the year. While there was no minimum environmental or social safeguards on the cash portion, this is not expected to have any impact on the sustainability objective of this Sub-Fund.

# What actions have been taken to attain the sustainable investment objective during the reference period?

On the investment side, every invested company has been assessed through an internally-designed methodology which includes but is not limited to:

- principal adverse impact indicators review
- controversies monitoring
- overall ESG/governance quality assessments,
- an exclusion list.
- materiality estimates in the IMAP score: the scoring of materiality (the share of a business represented by positive-impact business line) is a net score which also reflects any business lines with a neutral or even negative impact.

The Investment Manager exercises its voting rights, in line with the voting policy which follows sustainablitly principles.

Engagement with investee companies is conducted directly by the investment team as well as, on an ad-hoc basis, collaboratively.

The Investment manager participates in collaborative engagement to promote climate disclosures and ambitious climate strategies, notably via the CDP.

Engagement examples are provided in the annual impact report.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did the reference benchmark differ from a broad market index?
N/A
