

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS (Lux) Emerging Economies Fund - Global Short Term (USD), class (CHF hedged) P-dist (ISIN: LU0509218326), CHF

a sub-fund of UBS (Lux) Emerging Economies Fund

This fund is managed by UBS Fund Management (Luxembourg) S.A., a part of UBS AG.

Objectives and investment policy

We invest in government and corporate bonds from emerging economies that typically have less than one year to maturity. These bonds are mainly issued in local currencies.

Most of the fund assets are invested in bonds from issuers with average credit ratings. The bonds have low sensitivity to interest rates, which means that their prices respond quite weakly to changes in interest rates. Because a high proportion of the investments are in foreign currencies, the value of the fund reacts relatively strongly to changes in exchange rates.

Investors may demand to redeem their units from the investment company on any normal bank business day.

This share class does pay income as a result of the distribution received from underlying investments.

This share class is currency-hedged meaning that, using derivatives, the base currency of the fund is to a large extent hedged into the share class' currency.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within four years.

Risk and reward profile

More about the risk category

- The risk category is based on the fund's return volatility over the last five years. If the fund has less than 5 years' history, estimated volatility is used for the missing period.
- The fund is in category 5 because the volatility of its past returns has been high.
- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may vary over time.
- The lowest risk category does not mean 'risk free'.

Further material risks

- Bonds from emerging economies are usually considered as carrying significant credit risk.
- Small-scale use of uncollateralised over-the-counter instruments exposes the fund to small potential counterparty default risk.
- No capital guarantee exists for this product, so investors could lose the whole of their investment.
- A significant portion of the fund is invested in less liquid investments where bid-ask spreads and the price impact of trading might increase significantly under adverse market conditions.
- The use of derivatives to generate leverage could impact fund returns.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	6.00%
Exit charge	2.00%
Conversion charge	3.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.21%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The entry charge and exit charge shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending in 2011. This figure may vary from year to year. It generally excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.ubs.com/funds.

Past performance

Performance in the past is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as a percentage year-end over year-end change in the fund's net asset value. In general, any past performance takes account of all ongoing charges but not the entry charge. If the fund is managed against a benchmark, its return is also shown.

24/05/2010: Change of investment policy, i.e. the performance was achieved under conditions that no longer apply.

The class was launched in 2010. The fund was launched in 1995

The past performance is calculated in CHF.

Practical information

Depository

UBS (Luxembourg) S.A.

Further Information

Information about UBS (Lux) Emerging Economies Fund and its available share classes, the full prospectus and the latest annual and semi-annual reports can be obtained free of charge in English or German from the Fund Management Company, the Central Administrator, the Custodian Bank, the Fund's distributors or online at www.ubs.com/funds.
