Directors' Report

Report of the Directors

The Directors present herewith their report and audited financial statements for UBS (Irl) Investor Selection PLC (the "Company") for the year ended 30 September 2020.

Principal Activities

The Company is an open-ended investment company with segregated liability between its sub-funds and variable capital organised under the laws of Ireland.

The Directors have directed the affairs of the Company in accordance with the Companies Act 2014 (the "Act").

The Company comprises the following sub-funds:

UBS (Irl) Investor Selection - Currency Allocation Return Strategy

The investment objective of the sub-fund is to seek to achieve a return in excess of the reference index. The reference index is the sterling component of the Citigroup World Money Market Index Series - GBP 1 Month Euro Deposit.

UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund

The investment objective of the sub-fund is to seek to achieve risk-adjusted capital appreciation over a three year timeframe.

UBS (Irl) Investor Selection - Global Equity Long Short Fund

The investment objective of the sub-fund is to seek to deliver a positive return, over a three year timeframe, by exploiting mispriced stocks in equity markets around the world, including emerging markets. This sub-fund aims to demonstrate low correlation with, and less volatility than, equity markets.

UBS Global Emerging Markets Opportunity Fund

The investment objective of the sub-fund is to seek to achieve capital appreciation on a risk adjusted basis over the medium to long term.

A&Q Fundamental US Equity Long Short UCITS

The investment objective of the sub-fund is to seek a positive relative return versus traditional US Equity Long Short strategy benchmarks, over a three to five year timeframe.

There can be no guarantee that the sub-funds will be able to achieve their investment objectives or be profitable.

Business Review, Results, Activities and Future Developments

The results of operations are set out on page 13. A review of activities is contained in the Investment Manager's Reports for each of the five active sub-funds of the Company. Key Performance Indicators ("KPIs") monitored by the Directors are included in the Investment Manager's Reports for each of the sub-funds.

Structure

The Company is structured as an umbrella fund consisting of different sub-funds each comprising one or more share classes. Shares issued in each sub-fund will rank pari passu with each other in all respects except to the extent that they may differ in respect of certain matters including currency of denomination, hedging strategies, if any, applied to the currency of a particular class, dividend policy, voting rights, modifications on return of capital, the level of fees and expenses to be charged or the minimum subscription and minimum holding, if applicable. The assets of each sub-fund will be invested separately on behalf of each sub-fund in accordance with the investment objective and policies of each sub-fund. A separate portfolio of assets is not maintained for each class of share within a sub-fund.

As at 30 September 2020, the Company has established the sub-funds and classes which are set out in the supplements and the prospectus. Additional sub-funds in respect of which a supplement or supplements will be issued may be established by the Directors with the prior approval of the Central Bank of Ireland (the "Central Bank"). Additional classes in respect of which a supplement or supplements will be issued may be established by the Directors upon notification to, and clearance in advance by the Central Bank.

Directors and Company Secretary

Claire Cawley (appointed 10 November 2020)
Naomi Daly* (appointed 10 November 2020)
Thomas Stokes (appointed 10 November 2020)
John Donohoe* (resigned 10 November 2020)
Eimear Cowhey* (resigned 10 November 2020)
Adrian Waters* (resigned 10 November 2020)
Gavin Byrnes

* Non-executive Director independent of the Investment Manager.

Company Secretary details are disclosed on page 2.

In accordance with the Articles of Association, the Directors are not required to retire by rotation.

Directors' and Secretary's Interests

The Directors and Company Secretary who held office at 30 September 2020 had no interests in the shares or debentures of the Company during the year (2019: no interests in the Company).

Political Donations

All Directors are non-executive.

The Company made no political donations during the financial year ended 30 September 2020 (2019: Nil).

Dividend Policy

The Directors will have absolute discretion as to the payment of dividends. No dividends were paid or payable for the years ended 30 September 2020 and 30 September 2019.

Concentration of Investments

A sub-fund may at any one time be invested in a single industry or country and few issuers provided that such concentration complies with the UCITS Regulations. To the extent that a sub-fund's investments are concentrated in these ways, the overall adverse impact on a sub-fund could be considerably greater than if a sub-fund's investments were not concentrated to such an extent. A sub-fund is only concentrated in such a way if it is less risky to do so.

Accounting Records

The measures taken by the Directors to ensure compliance with the requirements of Section 281 to 285 of the Act, regarding adequate accounting records are through the appointment of the administrator, the implementation of necessary policies and procedures for recording transactions, the employment of appropriately qualified accounting personnel and the provision of adequate resources, including appropriate computerised accounting systems, to the financial function.

The accounting records of the Company are maintained at 32 Molesworth Street, Dublin 2, Ireland.

Risk Management

The role of the Board of Directors is to identify, monitor and manage risk on behalf of the Company. The Company has adopted procedures to ensure that material risks relating to the Company and its sub-funds have been identified and are managed.

The Directors of the Company have agreed that this process is suitable for adoption as the risk management process of the Company. UBS Fund Management (Luxembourg) S.A. (the "Manager") is the Manager and is responsible for the risk management process.

The Directors of the Company have appointed J.P. Morgan Bank (Ireland) plc as depositary who provides the safe-keeping of all the assets of the Company and is subject to regulations of the Central Bank of Ireland.

Going Concern

The Directors have made an assessment of the Company and it's ability to continue as a going concern and are satisfied that the Company and its sub-funds have the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast doubt upon the Company and its sub-funds ability to continue as a going concern. Therefore the financial statements continue to be prepared on a going concern basis.

Risk & Uncertainties

The Company is exposed to principal risks including market, credit and liquidity risk. The manner in which these risks have been dealt with is disclosed in Note 9 of the financial statements.

Following the decision by the people of the United Kingdom to leave the European Union, there remains uncertainty about the relationship between the United Kingdom and the European Union post "Brexit". The impact of this uncertainty extends to the financial services market within which the Company operates. As at the date of these financial statements, the Directors of the Company continue to monitor the situation as it develops as well as the impact on the Company.

In March 2020, the World Health Organisation declared the outbreak of COVID-19 to be a Pandemic. Although progress has been made towards the end of 2020 in managing this Pandemic, including through the continuing development of vaccines, it remains uncertain for how long and how severe the Pandemic will continue to globally and regionally impact the economy. This raises continuing uncertainties in relation to the volatility of asset prices of the fund and the valuation of assets covered in this report. The Board of Directors, the Manager and the Investment Managers continue to monitor the management of the Pandemic by governments and hence the economic impact on the portfolio and the Company itself. There is no evidence that the 'going concern' assumption made by the Board of Directors when preparing the financial statements of the Company is inappropriate.

Corporate Governance Code

The Board of Directors voluntarily adopted the Corporate Governance Code (the "IF Code") for Irish Domiciled Collective Investment Schemes as published by Irish Funds ("IF"), as the Company's corporate governance code. The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practices and processes for the financial year.

General Principles

The Company is subject to comply with the requirements of the Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the "UCITS Regulations") and the Central Bank UCITS Regulations 2019 (the "Central Bank UCITS Regulations"), and with effect from 1 November 2015, the Central Bank (Supervision and Enforcement) Act 2013 as applicable. The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report.

The Company is also subject to corporate governance practices imposed by:

- 1. The Act, which is available for inspection at the registered office of the Company; and may also be obtained at: http://www.irishstatutebook.ie/home.html;
- 2. The Articles of Association of the Company which are available for inspection at the registered office of the Company at 32 Molesworth Street, Dublin 2, Ireland and at the Companies Registration Office in Ireland; and
- The Central Bank in their UCITS Regulations which can be obtained from the Central Bank's website at: http://www.centralbank.ic/regulation/industrysectors/funds/Pages/default.aspx and are available for inspection at the registered office of the Company.

Internal Control and Risk Management Systems in Relation to Financial Reporting

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable, and not absolute, assurance against material misstatement or loss. The Directors have procedures in place to ensure that all relevant accounting records are properly maintained and are readily available including production of annual and half yearly financial statements.

The Directors have appointed the Administrator to maintain the books and records of the Company. The Administrator is authorised and regulated by the Central Bank and must comply with the rules imposed by the Central Bank. From time to time, the Directors examine and evaluate the Administrator's financial accounting and reporting routines. The annual financial statements of the Company are produced by the Administrator and reviewed by the Investment Manager. They are required to be approved by the Directors and the annual and half yearly financial statements of the Company are required to be filed with the Central Bank. During the period of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings.

The Directors monitor and evaluate the independent auditor's performance, qualifications and independence. As part of its review procedures, the Directors receive presentations from relevant parties including consideration of applicable accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

Derivative Instruments and Effective Portfolio Management Techniques

The Investment Manager's reports contained in the Annual Report provide a general description of the use of financial derivative instruments and effective portfolio management techniques during the reporting period and the resulting amount of commitments. The Investment Manager's reports also detail the purposes behind the use of various instruments together with the attendant risks.

The Value-at-Risk (the "VaR") tables report the exposure obtained through effective portfolio management techniques and financial derivative instruments.

The identity of the counterparties relating to these effective portfolio management techniques and financial derivative instruments, the type and amount of collateral received by the Company to reduce counterparty exposure are noted in the market risk tables for each sub-fund (Note 9 to the financial statements).

Income and expenditure related to all effective portfolio management techniques and financial derivative instruments are reflected in the Statement of Comprehensive Income of each sub-fund.

Restrictions on Transactions with Connected Persons

The Central Bank UCITS Regulations, paragraph 43(1) – 'Dealings by promoter, manager, trustee, investment adviser and group companies' states in paragraph one that any transaction carried out with a UCITS by a promoter, manager, trustee, investment adviser and/or associated or group companies of these ("connected parties") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the unit-holders of the UCITS.

The Board of Directors is satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in paragraph 43(1) are applied to all transactions with connected parties; and the Board is satisfied that transactions with connected parties entered into during the period complied with the obligations set out in this paragraph.

Significant Events during the Reporting Period

The following classes were launched on UBS Global Emerging Markets Opportunity Fund:

Class (EUR) Q-acc was launched as at 2 December 2019;

Class (USD) I-A3-PF-acc was launched as at 5 February 2020;

Class (EUR dist) I-A3-acc was launched as at 28 July 2020; and

Class (EUR) I-A3-acc was launched as at 28 July 2020.

The following classes were launched on UBS (Irl) Investor Selection - Currency Allocation Return Strategy:

Class (GBP) I-A3-acc was launched as at 8 June 2020; and

Class (EUR hedged) I-B-acc was launched as at 22 July 2020.

MUFG Alternative Fund Services (Ireland) Limited resigned as Company Secretary and was replaced by MFD Secretaries Limited with effect from 25 October 2019.

A new sub-fund, A&Q Fundamental US Equity Long Short UCITS was approved by the Central Bank of Ireland on 29 November 2019 and launched on 2 December 2019. This sub-fund seeks to deliver a positive relative return versus traditional US Equity Long Short strategy benchmarks, over a three to five year time frame.

KPMG resigned as auditor and was replaced by Ernst & Young with effect from 5 February 2020.

A new prospectus was issued on 30 April 2020 in relation to updates of the Company Secretary and Registered Office.

Maples and Calder resigned as legal adviser to the Company and was replaced by Dechert LLP from 28 July 2020.

There were no other events during the year that require adjustment to or disclosure in the financial statements.

Events After the Reporting Period

Effective from 10 November 2020, John Donohoe, Eimear Cowhey and Adrian Waters resigned as Directors of the Company. From the same date, Claire Cawley, Naomi Daly and Thomas Stokes have been appointed as Directors of the Company.

There were no other events after the year-end that require adjustment to or disclosure in the financial statements.

Directors' Compliance Statement

The Directors, in accordance with Section 225(2) of the Companies Act 2014, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act 2014 and Tax laws ("relevant obligations"). The Directors confirm that:

- A Compliance Policy Statement has been drawn up by the Directors which sets out the Company's policies for compliance
 with its relevant obligations under the Irish Companies Act;
- Appropriate procedures have been put in place, which have been designed to secure material compliance with the Company's relevant obligations; and
- A review process, the purpose of which to ensure that the aforementioned assurance measures regarding the Company's Compliance Policies are appropriate and operating effectively during each financial period.

Statement of Relevant Audit Information

- So far as each Director is aware, there is no relevant audit information of which the Company's statutory auditors are unaware;
- Each Director has taken all steps (being that he/she has made such inquiries of his fellow Directors and of the Company's
 statutory auditors) that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit
 information and to establish that the Company's statutory auditors are aware of that information.
- Section 167 (2) of the Companies Act 2014 requires the board of directors of a large company to establish an audit committee.
 The Directors have decided not to form an audit committee as the Board is formed of three non-executive Directors with one independent non-executive Director and the Company complies with the provisions of the Corporate Governance Code. The Company did not establish an audit committee due to the size, nature and complexity of the Company and the Directors do not believe it is required.

Statement of Establishment or otherwise of an Audit Committee

The Directors have decided not to establish an audit committee pursuant to section 167(2) of the Act based on (a) the nature, scale and complexity of the Company's business and the range of services and activities undertaken in the course of that business; (b) the resources available to the Company and the resources and expertise of the various third parties engaged to support the Company and carry out certain functions on its behalf; and (c) the procedures in place for the review, approval and circulation of the audited financial accounts and statements which are appropriate for a self-managed investment company pursuant to the UCITS Regulations.

Independent Auditor

KPMG, Chartered Accountants, resigned as auditor with effect from 5 February 2020. Ernst & Young have expressed their willingness to act as Auditor for the Company in accordance with Section 383 (2) of the Act.

Statement of Directors' Responsibilities in respect of the Directors' Report and the financial statements

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and applicable law.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and of its change in net assets attributable to holders of redeemable participating shares for that year. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern;
 and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that its financial statements comply with the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to a trustee for safe-keeping. They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the Companies Act 2014.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Depositary's Report

Report of the Depositary to the Shareholders

We have enquired into the conduct of UBS (Irl) Investor Selection PLC (the "Company") for the period 1 October 2019 to 30 September 2020 in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) UCITS Regulations, 2011, as amended (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion the Company has been managed in that period, in accordance with the provisions of the Company's Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not complied we, as Depositary must state why this is the case and outline the steps which we have taken to ensure the situation is rectified.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in the UCITS Regulations and to ensure that, in all material respects, the Company has been managed;

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the provisions of its Memorandum and Articles of Association, the UCITS Regulations, the Central Bank UCITS Regulations; and
- (ii) otherwise in accordance with the provisions of the Company's Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association, the UCITS Regulations, the Central Bank UCITS Regulations; and
- (ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF UBS (IRL) INVESTOR SELECTION PLC

Opinion

We have audited the financial statements of UBS (Irl) Investor Selection plc ('the Company') for the year ended 30 September 2020, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows and notes to the financial statements, including the summary of significant accounting policies set out in note 2. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union as applied in accordance with the provisions of the Companies Act 2014.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 30 September 2020 and of its profit for the year then ended;
- have been properly prepared in accordance with IFRS as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters, in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate: or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

Other information

The directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF UBS (IRL) INVESTOR SELECTION PLC (CONTINUED)

Opinions on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Respective responsibilities

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 8, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditor's report.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Investment Manager's Report - Unaudited

1st October 2019 to 30th September 2020

Market environment

The reporting period saw turbulence across a number of markets as optimism over easing geopolitical concerns quickly dissipated amid the COVID-19 pandemic. Signs of a "phase one" trade deal the US and China, and a resounding Conservative UK election victory lowered the probability of worst case outcomes and acted as a meaningful tailwind for risk assets in December, however focus quickly shifted to the global COVID-19 pandemic. A sudden rise in global infections in February 2020 saw asset volatility spike, with equities accelerating lower and credit spreads jumping on solvency concerns. Initially, the US dollar (USD) rallied at the expense of most other currencies on a global flight to safety and dollar shortage concerns. The USD peaked in mid-March before accommodative Federal Reserve intervention stemmed the damage. Global central banks followed suit in providing monetary accommodation, however corresponding fiscal stimulus measures gave further impetus to the recovery in riskier assets in Q2 2020. This environment largely continued into Q3 2020, as economic and public policy developments remained key drivers of asset prices. Dovish Fed rhetoric and optimism over global growth became a headwind for the USD, while in Europe, sentiment was lifted by regional leaders agreeing to a €750bn fiscal support package in July. Talk of potential negative rates were a headwind for the GBP later in the period, while growing Brexit uncertainty was another factor coming to the fore. Further afield in Asia, the Japanese yen (JPY) rose against the USD in the second half of the period, while the Australian dollar (AUD) grinded higher as global economic activity picked up from the Q1 2020 lows.

Performance

The Fund delivered a negative gross return of -13.72% over the reporting year to end September 2020.

The key detractor to performance was long positioning in the Brazilian real (BRL), which sold off early in the period on geopolitical risks and broad weakness in emerging market currencies. These losses accelerated as the COVID-19 crisis initially saw a spike in the USD amid widespread risk aversion and de-risking. As a result, the Fund's short USD exposures in H1 2020 also detracted from performance, as did long positioning in the Norwegian krone (NOK).

The key positive contributors to performance were the short positions in the Canadian dollar (CAD) and the Thai baht (THB), with both currencies declining sharply in H1 2020. Long Swedish krone (SEK) positioning also contributed positively, particularly in Q2 and Q3 2020 as it rallied versus peers.

Outlook

We perceive much of the price action in currency markets through September to be technically-driven and reflective of the extent to which positioning across many currencies has been reflective of global risk sentiment and over-arching global growth expectations rather than idiosyncratic / country-specific drivers as we navigate a recovery from the pandemic-induced global recession

CARS retains short exposures in the developed market commodity currencies of AUD, New Zealand dollar (NZD), and CAD. We scaled back the Fund's short position in GBP in the beginning of September following material weakness, first by selling EUR and later Swiss franc (CHF), retaining a small short GBP position going into October. The NOK remains our highest conviction long position, as it remains attractively valued with relatively strong macro-fundamentals and supportive policy. We are also constructive on the SEK and Latin American currencies. We are encouraged by recent LatAM FX price action, starting to keep pace with, if not close the gap on more cyclical G10 FX. We remain constructive on JPY - this long 'safe haven' exposure is largely offset by short positions in CHF and USD. PM Suga's focus on economic reform should prove supportive for the Japanese economy and the yen, with JPY remaining materially cheap. CAD looks marginally cheap relative to USD but expensive relative to most other currencies with this position helping negate any positive oil factor exposure within the portfolio through long MXN and NOK – relative to these currencies we view CAD as having underreacted to recent news flow. These positions are driven by valuation signals, incorporating assessments of fundamental macro-drivers and the influence of shifts in investor risk perception (particularly strong since the onset of concerns over COVID-19).

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

Investment Manager's Report - Unaudited

1st October 2019 to 30th September 2020

Market environment

The pandemic outbreak at the start of 2020 drove a clear move to risk-off in equity markets. The outbreak dominated headlines not only because of its impact on financial markets but also due to its unprecedented social implications. What followed swiftly after was intervention from central banks and governments around the world in an effort to provide liquidity to markets and stabilise growth. Volatility levels remained high and we saw indiscriminate selling as many investors were poorly positioned entering this environment. Markets rebounded during the quarter starting April but concerns later rose again on the back of the resurgence in COVID-19 infections, leading to the tightening of local restrictions in some parts of the world. Policymakers remained largely in a 'wait-and-see' mode on the stimulus front depending on the outlook. The overhang of US election uncertainty contributed to headwinds while Brexit related headlines also continued to drive volatility.

Performance

The Equity Opportunity Long Short Fund posted a positive absolute return of 14.4% (gross in EUR) over the year ending September 2020. We were well positioned heading into the downturn, which helped the strategy withstand the sharply falling market, thus showing strong downside protection. In the subsequent recovery, we took the opportunity to add value for our clients by selectively adding to our cyclical value exposure but at the same time avoiding deep value names that have structurally challenged business models. YTD performance was led by stock selection in the consumer discretionary sector, where we benefited from our holding in online retailers that remained resilient during the lockdown and stay-at-home trends. We also benefited from our holdings in the IT sector, including software company Microsoft and payments company PayPal. In addition, our shorts in real estate, our holdings in health care, industrials and energy contributed positively to performance. Financials was the only notable detractor at a sector level.

Outlook

The past months have given markets the opportunity to better understand the situation around COVID-19 and its potential effects. However, questions around timing remain – how lasting will the effects of the virus be and how soon will a recovery take place? These are difficult questions to answer not least because this crisis is unlike any before. While there are no systemic shocks or failure of financial systems as seen during the Global Financial Crisis, the lockdown measures implemented globally are unprecedented and have a direct impact on economic growth.

With the aim of stabilising economies and boosting liquidity, central banks and governments around the world have been providing significant levels of supportive measures much earlier than the efforts seen in late-2008. Fiscal stimulus as a percentage of GDP exceeds that of the Global Financial Crisis. We think that these measures will help to limit credit losses to moderate levels and provide a strong boost to demand.

Coming out of this crisis, we expect to see permanent shifts in consumer preferences. We also expect markets to continue to be volatile as a result of the ongoing uncertainties (COVID-19, US election, Brexit etc.). Equity markets will eventually see a recovery as things normalise but there is a possibility that some of the reopening of economies may be reversed in the event of a resurgence of infections, which will prolong normalisation.

As stock pickers, our focus remains on stocks that offer good risk versus reward. Going forward as price conscious bottom-up investors we recommend a more cautious selective stance, favouring businesses with strong balance sheets, good free cash flow generation and pricing power and cost cutting abilities. We remain solidly anchored in our 3-circle approach of stock selection (fundamental, quantitative and qualitative), which remains the core driver of performance.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

UBS (Irl) Investor Selection – Global Equity Long Short Fund

Investment Manager's Report - Unaudited

1st October 2019 to 30th September 2020

Market environment

Since the peak of the pandemic in the spring, the market narrative has been dominated by the transition to a "new normal," driven by the forces of technological disruption, deficit spending, and further central bank action. Those forces continued to drive equity markets higher in 3Q, although the quarter comprised two distinct parts. The first was a rally to record highs which peaked at the start of September. The second was a pullback from the peak, accompanied by a rotation out of mega-cap tech stocks. At its peak, the tech-heavy Nasdaq had rallied 76% from the March lows, and had risen 20% since the start of the quarter. Given the weight of the mega-cap tech names in the S&P 500, the index rallied by 60% from the March trough to the September peak, with a 16% gain in the first two months of 3Q. We think the correction and change of market leadership in September reflects a change in the narrative. Rather than focusing narrowly on tech, a better description of recent market dynamics is that growth has outperformed. Growth stocks are more digital and less cyclical, so they have benefited from stay-at-home trends, while companies that are more exposed to challenging economic conditions have de-rated. Additionally, growth stocks, like many in the IT sector, typically have stronger balance sheets and defensive cash flows, further increasing their appeal during turbulent times.

Performance

Over the year, portfolio saw strong performance across major sectors (+9.15% net based on (EUR) I-B Acc Shareclass). Energy sector contributed the most with the short sleeve having delivered highly positive returns, our strategy worked well in the environment where share price was impacted by record low oil price and depressed demand. Furthermore, we saw positive contributions from Consumer Discretionary, Communications and Industrials sector as well. Biggest detraction came from Healthcare, Real Estate and Utilities.

Outlook

We expect excess liquidity will continue to support risk assets, and an earnings recovery to come through in the rest of the year, so we see further upside potential in global equities. Against this market background, we continue to search for fundamentally mispriced securities, and remain ready to take advantage of any opportunities presented by price/value dislocations caused by the Covid -19 crisis. We believe the fund is well positioned to face any market environment, as risk remains dominated by a large number of diversified, idiosyncratic, stock-specific sources, driven by our fundamental analysts.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

Statement of Financial Position

As at 30 September 2020

Investment Manager's Report - Unaudited

1st October 2019 to 30th September 2020

Market environment

Emerging markets (MSCI EM) equities returned (+10.5%) in USD terms over the 12 month-period ending 30 September 2020. After a strong Q4 2019 due to among others the phase 1 trade deal between US and China, markets moved to deep negative territory as the new Coronavirus started to spread. Thanks to subsequent loose monetary policy, fiscal support globally and positive vaccine trial results, markets were able to offset the losses in the second half of the 12 month-period.

Performance

The strategy outperformed its benchmark (+16.07% gross based on USD I-B Acc shareclass and excess return equals to 5.32%), the MSCI Emerging Marketing Index (r), over the 12 month period ending 30 September 2020. Stock selection within Consumer Discretionary and Consumer Staples contributed most, driven by holdings in Tal Education, MercadoLibre and Kweichow Moutai among others. Tal Education outperformed as the Covid-19 outbreak may accelerate the growth of their online business longer term. The company's online revenues have been growing fast off a small base, and they are much better positioned than their competitors in this segment – their market share gain should hence get accelerated. MercadoLibre rose as it is the primary beneficiary from acceleration in ecommerce and digital payments adoption amidst the Covid-19 outbreak in Latin America. Moutai outperformed as its earnings demonstrated resilience amidst Covid-19 impact. The retail price has continued to increase, indicating that demand has not been significantly impacted. In contrast, Financials detracted the most, namely our overweight in Bank Mandiri, HDFC Bank and Grupo Banorte. The stocks fell due to Covid-19 outbreak and on concerns that economic weakness may worsen asset quality for the banks.

Outlook

While we remain cautious about the impact of Covid-19, we have started to observe a nascent economic recovery globally according to some high frequency data set. A second wave of the Covid-19 pandemic should be more manageable than the first, given countries' experiences on how to manage the outbreak. Still, we remain cautious as markets are likely to remain volatile and difficult to predict, depending on the evolution of the outbreak as well as the extent of policy support globally and the progress in the vaccine development.

A key risk we are watching is US-China tensions which continue to be played out in several areas. We have reiterated that US-China tensions are not going away in a hurry irrespective of the outcome of the US elections. Meanwhile, China announced its 14th Five Year Plan with an emphasis on higher quality growth and reiterating its focus on domestic demand. Other key economic goals laid out in the plan included innovation, push for market reform and supply-side structural reform, reduction of income inequality, and trade and financial liberalisation.

We continue to focus on companies that are strong enough to withstand severe economic dislocation for 12-24 months – these are typically companies with a combination of low fixed cost, low interest burden, and low operating expenses. And among these, to identify those companies which have the most upside as and when the situation normalises. Even going into the downturn, our portfolio had anyway been tilted towards companies meeting the above criteria – with better balance sheets and higher ROEs than the broader market at large.

While we are not able to do our boots on the ground research for the time being, we still have our ears to the ground. We have ramped up talking to our network of contacts, industry experts and company representatives. In addition, our QED team (Quantitative Evidence and Data Science) has been enhancing our research by tracking high frequency indicators to enrich our idea generation, deepen fundamental insights and improve modelling efficiency through the application of data science tools, techniques and non-traditional datasets.

Hence, we remain confident in fundamental, long-term changes playing out in emerging markets and our strategies are focused on quality companies associated with them.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

Investment Manager's Report - Unaudited

2nd December 2019 (launch date) to 30th September 2020

Market environment

Whilst 2019 ended and 2020 began on a high, with optimism around a resolution to Brexit and a phase 1 trade deal between China and the US, positive sentiment was quickly muted by growing concerns around the outbreak of the Covid-19 virus in China. As the situation progressed and the virus crossed borders and was re-classified as a pandemic, markets reacted violently and sold off across the board. Participants encountered extreme volatility, significant de-risking and impaired liquidity, particularly in certain fixed income markets. Throughout the second and third quarters of 2020, however, risk assets rallied sharply following swift and significant monetary and fiscal responses from national governments and central banks, with investor sentiment buoyed by the gradual reopening of economies in May and June. However, volatility remained high and rising US-China tensions and an increase in reported Covid-19 cases towards the end of the period, weighed on markets.

Performance

The fund has returned approximately +7.64% net since the launch of the UCITS vehicle through 30 September 2020 (Class (USD) I-B-Acc). This compares favorably to the Russell 3000 Index at +6.86% and the HFRX Equity Hedge Index at -1.78% for the same period. Performance was driven primarily by long positions in the information technology sector, although exposure to communications, healthcare and consumer names were also accretive. On the negative side, exposure to the energy and financials sectors tended to detract. Stylistically, performance benefitted from being positioned long growth-oriented stocks and slightly short more cyclical/value-oriented companies. Exposures were actively managed throughout the year, with gross and net ranging from 20 to 152% and 15 to 42%, respectively, and ending the period at 126.4% and 39.5%.

Outlook

While the bulk of 2020 was characterised by uncertainty, Q4 has done its best to flip the script. The last month has seen the most contentious US presidential election in recent history brought to a close, and while the final composition of the US Senate is not complete, a significant political unknown has been eliminated. Furthermore, three consecutive Mondays in November produced positive vaccine news, which provided a spectrum of relief for many of the beaten down industries. Despite some degree of uncertainty remaining on both the political and pandemic fronts, these developments removed some of the clouds hanging over the global economy, allowing investors to look into 2021 where expectations tilt towards a return to a new normalcy and a degree of goldilocks / gridlock around US policy. The financial market's reaction was clearly favourable, with record setting monthly performance across some sectors. However; there was significant performance dispersion across market indices over the month. The WFH (Work From Home) arena dominated the performance leaders for most of the year, but a rotation is certainly in process in Q4 as value outperformed growth. The questions to wrestle with now are whether this is sustainable and how quickly valuations will reflect the expected shift in consumer and corporate behaviour. Hence, we remain confident in fundamental, long-term changes playing out in emerging markets and our strategies are focused on quality companies associated with them.

Historical performance is no indicator of current or future performance.

The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

1. Organisation

UBS (Irl) Investor Selection PLC (the "Company") was incorporated on 1 December 2009 as an open-ended investment company with variable capital organised under the laws of Ireland under the registration number 478169 and has been authorised in Ireland by the Central Bank of Ireland (the "Central Bank") pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, the Central Bank of Ireland UCITS Regulations, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). The Company is structured as an umbrella fund consisting of different sub-funds, each comprising one or more share classes.

UBS Fund Management (Luxembourg) S.A. acts as Management Company for the Company. As at 30 September 2020, the Company had no employees. The investment activities of UBS (Irl) Investor Selection – Currency Allocation Return Strategy are managed by UBS Asset Management Switzerland AG, UBS (Irl) Investor Selection Equity Opportunity Long Short Fund and UBS (Irl) Investor Selection – Global Equity Long Short Fund are managed by UBS Asset Management (UK) Ltd., UBS Global Emerging Markets Opportunity Fund are managed by UBS Asset Management (Singapore) Ltd. and A&Q Fundamental US Equity Long Short UCITS are managed by UBS Hedge Fund Solutions LLC (the "Investment Manager"). The registered office of the Company is situated at 32 Molesworth Street, Dublin 2, Ireland.

The sub-funds which were active at 30 September 2020 and approved by the Central Bank of Ireland are as follows:

		Commencement of
Sub-fund	Launched on	operations
UBS (Irl) Investor Selection - Currency Allocation Return Strateg	gy 30 June 2014	30 June 2014
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fun	nd 29 October 2010	29 October 2010
UBS (Irl) Investor Selection - Global Equity Long Short Fund	28 August 2012	28 August 2012
UBS Global Emerging Markets Opportunity Fund	1 January 2010	1 January 2010
A&Q Fundamental US Equity Long Short UCITS	2 December 2019	2 December 2019

2. Significant accounting policies

(a) Statement of compliance

The financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU, interpretations adopted by the International Accounting Standards Board (IASB) and Irish Statute comprising the UCITS Regulations, Central Bank UCITS Regulations and Companies Act 2014. Changes to significant accounting policies are described in Note 2 (d). The financial statements were authorised for issue on 22 January 2021.

(b) Basis of preparation

The financial statements of the Company are presented in United States Dollars ("USD") and rounded to the nearest USD. They are prepared on a fair value basis for financial assets and financial liabilities at fair value through profit or loss and derivative financial instruments. Other financial assets and financial liabilities are stated at amortised cost of redemption amount (redeemable participating shares).

Going concern

The Directors have made an assessment of the Company's ability to continue as a going concern and are satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis.

Use of judgments and estimates

The preparation of financial statements, in conformity with IFRS as adopted by the EU, requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of income, expenses, assets and liabilities. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

2. Significant accounting policies (continued)

(b) Basis of preparation (continued)

Use of judgments and estimates (continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period and future periods if the revision affects both current and future periods. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year, as well as critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in Notes 6 and 9.

(c) Foreign currency translation

Functional currency is the currency of the primary economic environment in which the Company operates. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events and conditions. The majority of the Company's investments and transactions are denominated in USD. Investor subscriptions and redemptions are determined based on net asset value, and received and paid in USD. The expenses (including management fees, depositary fees and administration fees) are denominated and paid in USD. Accordingly, management has determined that the functional currency of the Company is USD.

Transactions in foreign currencies are translated into the reporting currency at exchange rates at the dates of the transactions. For practical reasons, a rate that approximates the actual rate at the date of the transaction is often used, for example, an average rate might be used for all transactions in each foreign currency occurring during the year. However, if exchange rates fluctuate significantly, the use of the average rate for the year will be inappropriate. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to USD at the exchange rate at the date that the fair value was determined. For income and expenses that are recognised in the Statement of Comprehensive Income, the use of average exchange rate is permitted under IFRS if they are a reasonable approximation of the actual. Foreign currency exchange differences relating to investments at fair value through profit and loss and derivative financial instruments are included in the net gains on foreign exchange.

The Company operates a number of sub-funds, each with its separately determined functional currency as stated below.

	Functional Currency	Reporting Currency
UBS (Irl) Investor Selection PLC	USD	USD
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	GBP	GBP
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund	EUR	EUR
UBS (Irl) Investor Selection - Global Equity Long Short Fund	EUR	EUR
UBS Global Emerging Markets Opportunity Fund	USD	USD
A&Q Fundamental US Equity Long Short UCITS	USD	USD

The financial statements of each sub-fund are presented in the currency that it is primarily exposed to with the Company financial statements being presented in USD ("United States Dollars"). The difference arising from translation of the primary statements at different exchange rates, for the purpose of producing the financial statements of the Company, is included as a foreign currency translation adjustment in other comprehensive gain/(loss) in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

The following exchange rates were used for the conversion of the consolidated financial statements into USD as at 30 September 2020 and 2019:

	Closing	Rates	Average Rates		
	30 September 2020	30 September 2019	30 September 2020	30 September 2019	
GBP	1.2928	1.2323	1.2754	1.2766	
EUR	1.1727	1.0902	1.1203	1.1279	

2. Significant accounting policies (continued)

(d) New Standards, amendments and interpretations

IFRIC 23 "Uncertainty over Income Tax Treatments" (effective 1 January 2019)

IFRIC 23 "Uncertainty over Income Tax Treatments" was issued by the IASB on 7 June 2017 and was effective for periods beginning on or after 1 January 2019, with earlier adoption permitted. IFRIC 23 is an interpretation which clarifies how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over tax treatments.

IFRIC 23 was developed as an interpretation of IAS 12 and so it relates only to income taxes within the scope of that standard. This update had no impact on the financial statements of the Company.

The following new standards, amendments to standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below:

Standards	Narrative	Effective date*
	Financial instruments - Pre-replacement issues in the context of the	
IFRS 7 / IFRS 9 (amendments)	IBOR reform (amendment to IFRS 9)	1 January 2020
IAS 1 / IAS 8 (amendments)	Definition of Material used in Conceptual Framework	1 January 2020
	Sale or contribution of assets between an Investor and its Associate or	
IFRS 10 / IAS 28 (amendments)	Joint Venture (Amendments)	Not Specified
*Annual periods beginning on or after		

These amendments are not expected to have a material impact on the Company's financial statements.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Company.

(e) Financial instruments

(i) Classification

On initial recognition, the Company classifies financial assets as measured at amortised cost or fair value through profit or loss ("FVTPL"). A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI").

All other financial assets and liabilities of the Company are measured at FVTPL including transferable securities, derivative financial assets and derivative liabilities.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Company considers all of the relevant information about how the business is managed, including:

- The documented investment strategy and the execution of this strategy in practice. This includes whether the
 investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile,
 matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows
 or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How the Investment Manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

2. Significant accounting policies (continued)

- (e) Financial instruments (continued)
 - (i) Classification (continued)

Business model assessment (continued)

The Company has determined that it has two business models.

- Held-to-collect business model: this includes interest, dividend receivables, due from brokers, deposits with credit institutions and receivables. These financial assets are held to collect contractual cash flow.
- Other business model: this includes transferable securities and derivatives. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purpose of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition.

'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows;
- Leverage features;
- Prepayment and extension features;
- Terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- Features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

The Company has determined that the only financial assets classified at amortised cost are cash and cash equivalents due to the related contractual cashflows being solely payments of principal and interest.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The contractual cash flows of the Company's debt securities are solely principle and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. Consequently, all investments are measured at fair value through profit or loss.

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

The Company's policy requires the Investment Manager and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis with other related financial information.

(ii) Recognition

The Company recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instruments. Transactions are recognised using trade date accounting. From this date any gains and losses arising from changes in fair value of the financial assets or liabilities are recorded.

2. Significant accounting policies (continued)

(e) Financial instruments (continued)

(iii) Measurement

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and financial liabilities at fair value through profit and loss are expensed immediately to the Statement of Comprehensive Income.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. Financial assets classified as receivables are carried at amortised cost using the effective interest rate method, less impairment losses, if any. Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method. Financial liabilities arising from the redeemable shares issued by the Company are carried at the redemption amount representing the investors' right to a residual interest in the Company's assets.

The fair value of financial assets and liabilities that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date.

Valuation techniques used for non-standardised financial instruments such as OTC options and forward currency contracts, include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

(iv) Fair value measurement principles

In accordance with IFRS 13, *Fair Value Measurement*, the fair value of financial instruments traded in active markets (such as publicly traded derivatives, trading securities and exchange traded funds) is based on the last reported sales price at the close of trading on the reporting date. Financial assets and financial liabilities are priced at current midprice.

Not listed financial assets and financial liabilities (or traded on any stock exchange or over-the-counter market) are valued at their fair value estimated with care and in good faith by a stockbroker or other competent person, such as the Administrator, appointed by the Investment Manager and approved by the Depositary.

For certain other financial instruments, including amounts due from/to brokers, accounts payable and accrued expenses, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments.

The carrying amounts of the financial assets and liabilities not classified as FVTPL at the reporting date approximated their fair values.

(v) Derecognition

The Company derecognises a financial asset when the contractual rights to the flows from the financial asset expire or are extinguished or it transfers the financial asset and the transfer qualifies for derecognition in accordance with IFRS 9, *Financial Instruments* ("IFRS 9").

The Company uses the first in first out (the "FIFO") method to determine realised gains and losses on derecognition.

A financial liability is derecognised when the Company's obligation specified in the contract is discharged, cancelled or the obligation expires.

2. Significant accounting policies (continued)

- (e) Financial instruments (continued)
 - (vi) Specific instruments

Forward contracts

Forward contracts, ("Forwards") are commitments either to purchase or sell a designated financial instrument or currency amount at a specified future date for a specified price. Forward contracts may be settled in cash or in another financial asset. Forwards are individually traded over-the-counter contracts. Forward contracts result in credit exposure to the counterparty to the extent that the counterparty does not meet its obligations under the contract.

Forwards result in exposure to market risk based on changes in market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates and securities' values underlying these instruments. In addition, due to the low margin deposits normally required in relation to nominal contract sizes, a high degree of leverage may be typical of a forward trading account. As a result, a relatively small price/rate movement in the underlying security/currency of a forward may result in substantial losses to the Company.

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company's principal liability is its obligation to redeem shares at fair value on any dealing day at the request of a shareholder. Nominal amounts are the underlying reference amounts to foreign currencies upon which the fair value of the forward contracts traded by the Company are based.

While nominal amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the forward contracts, the underlying price changes in relation to the variables specified by the nominal amounts affect the fair value of these derivative financial instruments.

Equity swaps

Equity swaps allow a direct exposure to the market, to a sector or to an individual security. Swaps have a fixed maturity and naturally expire once the maturity reaches. However, the parties involved in a swap transaction may also terminate the contract before its expiry. Equity swaps are used to gain exposure to share price movements without buying the shares themselves. An equity swap on a company's shares will specify the price of the shares when the contract commences. The swap contract is an agreement to pay out cash on the difference between the starting share price and when the swap contract is closed.

Daily fluctuations in the value of a swap contract are recorded for financial reporting purposes as unrealised gains or losses and are recorded as a realised gain or loss when the position is closed.

Futures

Futures are commitments either to purchase or to sell a designated financial instrument or currency at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the futures contract values are settled daily. Futures contracts have little credit risk as counterparties are futures exchanges.

Futures result in exposure to market risk based on market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates. In addition, due to the low margin deposits normally required in relation to nominal contract sizes, a high degree of leverage may be typical of a futures trading account. As result, a relatively small price movement in the underlying security of a futures contract may result in substantial losses to the Company. Certain futures exchanges do not permit trading in particular futures contracts at prices that represent a fluctuation in price during a single day's trading beyond certain set limits. If prices fluctuate during a single day's trading beyond those limits, the Company could be prevented from promptly liquidating unfavourable positions and thus could be subject to substantial losses.

2. Significant accounting policies (continued)

- (e) Financial instruments (continued)
 - (vi) Specific instruments (continued)

Futures (continued)

The changes in value of open future contracts are recognised as unrealised gains or losses by marking-to-market the value of the contract at the reporting date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded in the Statement of Comprehensive Income.

Swap contracts

Credit default swaps are contracts in which the Company pays or receives premium flows in return for the counterparty accepting or selling all or part of the risk of default or failure to pay off a reference entity for which the swap is written, where the Company has bought protection the maximum potential loss is the value of the premium flows the Company is contracted to pay until maturity of the contract.

Where the Company has sold protection the maximum potential loss is the nominal value of the protection sold.

Interest rate swaps are contracts in which the Company exchanges interest rate cash flows for cash flows based on the return of an equity of a fixed income instrument, a securities index or another stream of cash flows.

These contracts allow the Company to manage its interest rate exposures. Interest rate swap returns are based on the movement of interest rates relative to a specified alternative as per the contract.

All swap contracts are stated at market value. The net income or expense in the swap agreements entered into by the Company is reflected in the Statement of Comprehensive Income. The unrealised gain or loss is reported as an asset or liability and changes in the market value are reflected in the Statement of Comprehensive Income in the year in which they occur.

Warrants

Warant contracts are options to purchase additional securities from the issuer at a specified price during a specified period. Warrants are sometimes used to gain exposure to emerging market equities where custody, liquidity, or other issues make ownership of local shares sub-optimal. Risks associated with the use of warrants are generally similar to risks associated with the use of purchased options. However, warrants do not have standardised terms, and may have longer maturities and may be less liquid than exchange-traded options. In addition, the terms of warrants may limit the Company's ability to exercise the warrants at such times and in such quantities as the Company would otherwise wish. Warrants are measured at fair value through profit or loss and are designated as financial assets or financial liabilities at fair value through profit or loss.

(f) Interest income and expense

Interest income and expense on financial instruments at amortised cost calculated using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter year) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial asset, future credit losses are not considered.

The calculation of the effective interest rate includes all fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

Interest income and expense includes interest on cash and cash equivalents and on financial assets and financial liabilities.

2. Significant accounting policies (continued)

(g) Gains and losses on financial assets and financial liabilities at fair value through profit or loss

Gains and losses from financial instruments at fair value through profit or loss include all realised gains/(losses) on transferable securities and financial derivative instruments, unrealised gains/(losses) from fair value changes and foreign exchange differences. Realised gains and losses are based on the FIFO method.

(h) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or a financial liability.

An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, the sub-fund shall measure the instrument at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds, forwards and swaps are included in the purchase and sale price of the investment. Transaction costs cannot be practically or reliably estimated as they are embedded in the price of the investment and cannot be separately verified or disclosed.

Transaction costs on purchases and sales of equities, options and futures are included in net gains/(losses) on investments in the Statement of Comprehensive Income for each sub-fund.

Custody transaction costs are separately identifiable transaction costs and the total costs incurred by each sub-fund during the year are disclosed in Note 15.

(i) Expenses

All expenses, including management fees, depositary fees, interest expenses, bank charges, tax expenses and general and operating fee expenses are recognised in the Statement of Comprehensive Income on an accruals basis. Other fees include general and operating fee expenses, bank charges, miscellaneous expenses, commission expenses, depositary fees and tax expenses.

(i) Net asset value per share ("NAV per share")

NAV per share at year-end is calculated by dividing the net asset value of the relevant sub-fund at year-end by the number of redeemable participating shares of the relevant class in issue as at the year-end.

(k) Cash and cash equivalents

Cash comprises current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. Cash and cash equivalents are valued at face value plus any accrued interest, where applicable.

(l) Balance due from/(to) brokers

In accordance with the Company's policy of trade date accounting for regular way sale and purchase transactions, sales/purchases awaiting settlement represent amounts receivable/payable for securities sold/purchased but not yet settled as at the Statement of Financial Position date. Due from/(to) broker accounts include the settlement amounts and all of the collateral amounts.

2. Significant accounting policies (continued)

(m) Foreign exchange gains and losses

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value in the Statement of Comprehensive Income. Included in the net gains/(losses) on foreign exchange are net foreign exchange gains and losses on monetary financial assets and financial liabilities other than those classified at fair value through profit or loss. Foreign exchange differences arising on translation of the sub-funds financial statements into the Company's financial statements are recognised in Other Comprehensive Income.

(n) Dividend income and expense

Dividend income and dividend expense are recorded on the ex-dividend date. Dividend income is recognised on a gross basis, before withholding tax.

(o) Distribution policy

Shares of a sub-fund may be issued as accumulating shares or distributing shares. The dividend policy and information on the declaration and payment of dividends for each sub-fund will be specified in the relevant supplement. The Constitution of the Company empower the Directors to declare dividends in respect of any Shares in the Company out of the net income of the relevant sub-fund (whether in the form of dividends, interests or otherwise) and/or net realised gains (i.e. realised gains net of realised and unrealised losses) or net realised and unrealised gains (i.e. realised and unrealised losses) subject to certain adjustments.

(p) Redeemable participating shares

All redeemable participating shares issued by the Company provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Company's net assets at the redemption date. In accordance with IAS 32, *Financial Instruments: Presentation* ("IAS 32") such instruments give rise to a financial liability for the present value of the redemption amount.

Applications for Shares may be made through the Administrator on behalf of the Company. Applications received and accepted by the Administrator prior to the subscription deadline for the relevant subscription day will be processed on that subscription day. Shareholders may redeem their shares on and with effect from any Redemption Day at the Net Asset Value per Share calculated on or with respect to the relevant Redemption Day as described in the Prospectus. Subject to certain exceptions in relation to certain switches of shares from one class to another class in the same sub-fund, switching will generally amount to a disposal of the original shares for tax purposes and accordingly, a chargeable gain or an allowable loss may be realised.

(q) Offsetting

Financial assets and liabilities are offset and the net amount presented in the Statement of Financial Position when and only when, the Company has legal right to offset the amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS as adopted by the EU, e.g. for gains and losses arising from a group of similar transactions, such as gains and losses from financial instruments at fair value through profit or loss.

(r) Anti-dilution measures

The Company may use "swing pricing" as the method to adjust the price of shares to minimise the impact of "dilution" on Shareholders' interests. Dilution occurs when the cost of purchasing or selling the assets of the Company is greater than the value of these assets due to taxes, dealing charges or any spread between the buying and selling prices of these assets. If the aggregate subscriptions and redemptions exceed a threshold then the net asset value used to process all deals in the Company (or a sub-fund) is adjusted to reflect by a swing factor. The swing factor, which shall not exceed 2%, and the threshold are set by the Directors and/ or the Investment Manager.

2. Significant accounting policies (continued)

(r) Anti-dilution measures (continued)

For the purpose of calculating any expenses of the Company (or a sub-fund) which are based on the net asset value of the Company (or a relevant sub-fund), the Administrator will continue to use the un-swung net asset value.

The anti-dilution levy ("ADL") is booked onto each sub-fund every time there is net flows. All capital activity is booked onto each sub-fund using un-swung NAV and all capital is booked on the TA system with swung information. The ADL is booked onto each sub-fund to make up the difference in the cash settlement of the capital trade and is booked as positive (negative) income to each sub-fund depending on net flows. The ADL is booked into each sub-fund the same time the capital trades are booked.

(s) Taxation

The Company is an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997. Therefore the Company is not liable to tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on redemption, repurchase, cancellation, transfer of shares or on the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- An exchange by a shareholder, effected by way of an arm's length bargain where no payment is made to the shareholder, of shares in the Company for other shares in the Company;
- Any transactions (which might otherwise be considered a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners;
- A transfer by a shareholder of the entitlement to shares where the transfer is between spouses and former spouses, subject to certain conditions; or
- An exchange of shares arising on a qualifying amalgamation or reconstruction (within the meaning of Section 739H of the Taxes Act) of the Company with another investment undertaking.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event. Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

(t) Hedge classes

For the benefit of holders of classes of shares that are denominated in a currency other than the base currency, the Investment Manager may, but is not obliged to, seek, through the use of forward foreign exchange contracts and/or currency futures contracts, to hedge the foreign exchange exposure arising as a result of fluctuations between the denominated currency of the class and the base currency. Hedged positions will be kept under review to ensure that over hedged positions do not exceed 105% of the net asset value of the class. This review will also incorporate a procedure to ensure that positions in excess of 100% will not be carried forward from month to month.

Any financial instruments used to implement such strategies with respect to one or more classes shall be assets/liabilities of a sub-fund as a whole but will be attributable to the relevant class(es) and the gains/(losses) on the relevant financial instrument and the costs of the relevant financial instruments will accrue solely to the relevant class. Where a class of shares is to be hedged this will be disclosed in the supplement for the sub-fund in which such class is issued. Any currency exposure of a class may not be combined with or offset against that of any other class of a sub-fund. The currency exposure of the assets attributable to a class may not be allocated to other classes. Hedge classes are currently operational on the funds UBS (Irl) Investor Selection - Currency Allocation Return Strategy and UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund.

Investors should also note that, to the extent that hedging is successful, the performance of the class is likely to move in line with the performance of the underlying assets and that investors in a hedged class will not benefit if the class currency falls against the base currency and/or the currency in which the assets of the Company are denominated and that this hedging strategy may substantially limit holders of these shares from benefiting if the base currency falls against the denominated currency of the class. Each sub-fund's currency hedging policy is set out in the relevant supplement of the prospectus.

3. Interest income and expense

The following table details the interest income earned and expense incurred by the Company during the year:

All other assets and liabilities included in the Statement of Financial Position are carried at values that reflect a reasonable approximation of their fair value and are classified as level 2.

The fair value hierarchy is as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices);
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs). The level in the fair value hierarchy within which the fair value measurement of an instrument is categorised in its entirety is determined on the basis of the lowest level input, 1 being the highest level that is significant to the fair value measurement of that instrument in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded derivatives, warrants, US government treasury bills and certain non-US sovereign obligations. Quoted market prices are primarily sourced from market leading financial data vendors. The Company does not adjust the quoted price for these instruments.

6. Fair value estimation (continued)

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include fund of funds investments, investment-grade corporate bonds and certain non-US sovereign obligations, and over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

The Company's level 2 investments primarily include forward foreign currency derivatives and equity swaps which are easily valued based on observable market data.

At year-end, the Company held no assets classified as level 3 investments. There were no level 3 investments held at the end of the last period 30 September 2019. No investments have been transferred between levels.

7. Share capital

The authorised share capital of the Company is 500,000,000,000 shares of no par value and 300,000 redeemable non-participating shares of no par value each. The minimum issued share capital of the Company is 2 redeemable non-participating shares of no par value each. The 2 redeemable non-participating shares of no par value each are held by the Investment Manager. Non-participating shares do not entitle the holders to any dividends and on a winding up entitle the holders to receive the amount paid up thereon but do not otherwise entitle them to participate in the net assets of the Company.

The Company is a daily dealing fund therefore an investor can subscribe and/or redeem as they wish. Both the fund and the investor have an option to redeem shares. No premium is payable on the redemption of shares.

The Directors reserve the right to impose "an anti-dilution levy" representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought or sold) and other dealing costs relating to the acquisition or disposal of assets and top reserve the value of the underlying assets of the sub-fund.

There were new classes launched in UBS (Irl) Investor Selection - Currency Allocation Return Strategy and UBS Global Emerging Markets Opportunity Fund during the year. The classes closed during the year are in UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund and UBS Global Emerging Markets Opportunity Fund.

The rights attaching to the redeemable participating shares issued in the Company or any class may, whether or not the Company is being wound up, be varied or abrogated with the consent in writing of the shareholders of three-quarters of the issued shares of the Company or the relevant class, or with the sanction of an ordinary resolution passed at a general meeting of the Shareholders of the Company or the relevant class.

The rights attaching to the shares shall not be deemed to be varied by the creation, allotment or issue of any further shares ranking pari passu with shares already in issue.

Redeemable participating shares may be redeemed on redemption days as set out in the prospectus and will be redeemed at the net asset value per share quoted on that day, calculated in accordance with the prospectus.

^{*}Fund was launched 2 December 2019

When cash is pledged as collateral, it is derecognised from cash and cash equivalents and subsequently recognised in the balances due from broker account. Cash is held with J.P. Morgan Bank, UBS AG, Bank of America Merrill Lynch, Bank of New York, Goldman Sachs, Morgan Stanley, Goldman Sachs Bank and Bank of New York Mellon.

The credit ratings of the banks as classified by Moody's are as follows: J.P. Morgan (Aa1) (2019: Aa1), UBS AG (Baa1) (2019: Baa1), Morgan Stanley (Baa1) (2019: A3), Bank of America Merrill Lynch (Baa1) (2019: Baa1), Goldman Sachs Bank (Aa3) and Bank of New York Mellon (A2). There are no restrictions on the cash and cash equivalents amounts held with these brokers.

9. Financial instruments and associated risks

The Company maintains positions in a variety of derivative and non-derivative financial instruments as dictated by its investment management strategy.

The Company's investing activities expose it to various types of risk that are associated with the financial instruments and markets in which it invests. The most significant types of financial risk to which the Company is exposed are market risk, credit risk, liquidity risk and operational risk.

The Company employs financial derivative techniques and instruments for the purposes of investment and/or efficient portfolio management subject to the limits laid down by the Central Bank of Ireland and subject to the terms of the supplement for the relevant sub-fund. These financial derivative techniques and instruments may include, but are not limited to, warrants, exchange traded futures and options, forward currency contracts and swap agreements.

The Manager uses a risk management process to measure, monitor and manage risks attached to the financial derivative positions and details of this process have been provided to the Central Bank of Ireland.

9. Financial instruments and associated risks (continued)

The Manager employs a risk management process which enables it to measure, monitor and manage the risks within the sub-funds. The Company must calculate its global exposure on at least a daily basis. Global exposure is calculated using VaR for UBS (Irl) Investor Selection – Currency Allocation Return Strategy, UBS (Irl) Investor Selection – Equity Opportunity Long Short Fund, UBS (Irl) Investor Selection – Global Equity Long Short Fund and A&Q Fundamental US Equity Long Short UCITS. Global exposure is calculated using the commitment approach for the UBS Global Emerging Markets Opportunity Fund. Any techniques or instruments including repurchase agreements which are used by the sub-funds to generate additional leverage or exposure to market risk are taken into account when calculating the global exposure of the sub-fund. Leverage is calculated using the sum of the notionals of the derivatives used by the sub-fund. Through regular monitoring and review of risks related to the specific sub-funds, the Manager aims to quantify and analyse the current risk against the expected risk profile of the portfolio and performance targets of the sub-funds. Methods of measuring risk include, but are not limited to, VaR analysis, stress testing, sensitivity measures, leverage and relative risk. An ex-ante tracking error model is also used by the Manager to control risk. All sub-funds remain within the allotted parameters.

The Board of Directors issues a risk management statement (Financial Derivative Instrument Report) to the Central Bank of Ireland on an annual basis.

Asset allocation is determined by the Company's Investment Manager who manages the distribution of the assets to achieve the investment objectives. Divergence from target asset allocations and the composition of the portfolio is monitored by the Company's Investment Manager. The nature and extent of the financial instruments outstanding at the reporting date and the risk management policies employed by the Company are discussed below. However these are not all the risks involved. Investors should refer to the prospectus to see the full list of risks.

(a) Market risk

Market risk is the risk that changes in currency risk, price risk and interest rates risk will affect the positions held by the Company.

The Company is exposed to market risk on investments in that the Company may not be able to readily dispose of its holdings when it chooses and also that the price obtained on disposal is below that at which the investment is included in the Company's financial statements. All trading financial instruments are recognised at fair value through profit or loss and all changes in market conditions directly affect net income.

The Investment Manager uses financial derivative instruments which may give rise to leverage within the portfolio, subject to the limits set out in the prospectus, to increase the potential overall return on capital. Leverage may be created through the use of financial derivative instruments, subject to UCITS Regulations. The leverage created through the use of financial derivative instruments will be measured using either the commitment approach or VaR depending on the risk profile of the strategies pursued by each sub-fund.

The commitment approach calculates leverage by measuring the market value of the underlying exposures of financial derivative instruments. An overall risk monitoring structure is in place which sets risk and leverage limits for the Company, and prescribes action to be taken upon these limits being breached.

In pursuing each sub-fund's investment objectives, the Investment Manager seeks to allocate risk capital in the most appropriate way, given prevailing market opportunities, in order to achieve the desired compensation for the risk capital being expended.

Risk management is therefore at the forefront in setting investment strategy. Before entering into an investment, the Investment Manager will always take note of the investment's market price. Price is a required data point in assessing attractiveness. Similarly, the attractiveness of an investment cannot be estimated without a thorough analysis of the investment's potential risk.

Efficient risk capital allocation involves expending appropriate amounts of a Company's risk budget when it is desirable to do so in response to conditions in the market environment. It also involves separating and diversifying the decision dimensions available to the Investment Manager. The output of the Company's risk capital allocation system parallels investment decision-making by embodying and visually representing these characteristics.

The Investment Manager is able to use the risk capital allocation system to test and evaluate potential changes to investment strategy.

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Currency risk

The Company may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, the Company is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse affect on the value of that portion of the Company's assets or liabilities denominated in currencies other than the functional currency.

The Company's foreign currency exchange rate risk is managed on a daily basis by the Investment Manager.

The Company may employ strategies aimed at hedging against currency risk at the class level. When the Company enters into such currency transactions as part of the sub-fund's investment policy, the hedging transactions at the share class level will be considered distinct from the tactical currency transactions of the relevant sub-fund.

The Investment Manager may utilise hedging strategies in order to hedge the exposure of classes that are denominated in currencies other than the base currency of the relevant sub-fund. The hedging will typically be undertaken by means of forward contracts but may also include currency options.

The following table sets out the Company's total exposure to foreign currency risk and the net exposure to foreign currencies of monetary assets and monetary liabilities.

^{*}Fund was launched 2 December 2019

Amounts in the above table are based on the carrying value of monetary assets and liabilities.

Sensitivity analysis

At 30 September 2020, had the base currency strengthened by 5% in relation to all currencies, with all other variables held constant, net assets attributable to holders of redeemable participating shares and the change in net assets attributable to holders of redeemable participating shares per the Statement of Comprehensive Income would have decreased by the amounts shown overleaf. Had the base currency weakened by 5% in relation to all other currencies it would have resulted in an equal but opposite effect. The analysis is performed on the same basis for 2019.

Global Exposure

Risk management

Global exposure in accordance with the applicable laws and regulatory provisions, is calculated using either the commitment approach or the VaR approach. The VaR of each sub-fund's portfolio is the estimated loss that may arise on the portfolio over a specified period of time (holding period) from an adverse market movement within a specified probability (confidence level).

Leverage

Leverage is defined pursuant to the applicable ESMA directives as the total of the notional values of the derivatives used by the respective sub-fund. According to this definition, leverage may result in artificially increased leverage amounts, as some derivatives that can be used for hedging purposes may be included in the calculation. Consequently, this information does not necessarily reflect the precise actual leverage risk that the investor is exposed to.

VaR models

When global exposure is monitored using a VaR model, the following inputs are used for the models:

VaR model	Confidence level	Time horizon	Length of data history
Monte Carlo VaR	99%	20 days	2 years
Historical VaR	99%	20 days	2 years

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations, including the following:

- A 20-day holding period assumes that it is possible to hedge or dispose of positions within that period. This may not be the case for certain highly illiquid assets or in situations in which there is severe general market illiquidity.
- A 99% confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1% probability that losses could exceed the VaR.

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Global Exposure (continued)

Leverage (continued)

- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.
- The VaR measure is dependent on the sub-fund's position and the volatility of market prices.
- The VaR of an unchanged position reduces if market price volatility declines, and vice versa.

The overall structure of VaR limits is subject to review and approval by the board of directors. VaR is measured daily.

Price risk

Price risk is the risk that value of an instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Price risk is mitigated by the Company's Investment Manager by constructing a diversified portfolio of instruments traded on various markets. Details of price risk exposure and concentrations by industry and geographical area contained in the Schedule of Investments.

The following tables detail the breakdown of the investment assets and liabilities held as a percentage of the net assets of the sub-funds.

Sensitivity analysis

A 5% increase in prices of the financial assets and liabilities at fair value through profit or loss at 30 September 2020 would have increased the net assets attributable to holders of redeemable participating shares and the change in net assets attributable to holders of redeemable participating shares in the following funds by:

	30 September 2020	30 September 2019
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	GBP 23,168,329	GBP 17,184,784
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund	EUR 7,689,009	EUR 7,844,248
UBS (Irl) Investor Selection - Global Equity Long Short Fund	EUR 3,577,291	EUR 2,809,786
UBS Global Emerging Markets Opportunity Fund	USD 130,078,648	USD 85,149,367
A&Q Fundamental US Equity Long Short UCITS	USD 1,241,279	-
UBS (Irl) Investor Selection PLC	USD 174,483,369	USD 117,941,205

9. Financial instruments and associated risks (continued)

(a) Market risk (continued)

Price risk (continued)

Sensitivity analysis (continued)

An equal change in the opposite direction would have decreased the net assets attributable to holders of redeemable participating shares and the change in net assets attributable to holders of redeemable participating shares by an equal but opposite amount.

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Company holds cash and cash equivalents and financial instruments that are interest earning and as a result the Company is subject to risk due to fluctuations in the prevailing levels of market interest rates in relation to this financial instrument.

The Company's hedging transactions using derivative instruments also involve the risk that unanticipated and significant changes in interest rates will cause a significant loss of basis in the contract. The counterparties to the Company's derivatives are financial institutions carefully selected by the Investment Manager.

The Company's interest rate risk is managed on a daily basis by the Investment Manager.

The following tables detail the Company's exposure to interest rate risks. This includes the Company's assets and trading liabilities at fair values, categorised by the earlier of contractual re-pricing or maturity date measured by the carrying value of the assets and liabilities:

Sensitivity analysis

An increase of 100 basis points in interest rates as at the reporting date would have increased the net assets attributable to holders of redeemable participating shares and changes in net assets attributable to holders of redeemable participating shares by UBS (Irl) Investor Selection - Currency Allocation Return Strategy GBP5,680,427 (2019: GBP4,014,581), UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR197,683 (2019: EUR298,187), UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR133,811 (2019: EUR134,475), UBS Global Emerging Markets Opportunity Fund USD727,683 (2019: USD352,334), A&Q Fundamental US Equity Long Short UCITS by USD29,590 (2019:USDNil) and UBS (Irl) Investor Selection PLC USD8,489,656 (2019: USD5,771,191). A decrease of 100 basis points would have had an equal but opposite effect.

9. Financial instruments and associated risks (continued)

(b) Credit risk

Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Credit risk associated with trading and investing activities is managed through the Company's market risk management process discussed above.

The amount of credit exposure is represented by the carrying amounts of the assets in the Statement of Financial Position. Substantially all financial instruments are cleared through and/or held in custody by J.P. Morgan Bank (Ireland) plc, the Depositary. The Company is therefore subject to credit risk to the extent that the Depositary may be unable to fulfill its obligations either to return the Company's securities or repay amounts owed. Details of credit risk exposure and concentration are contained in the Schedule of Investments.

At the reporting date, the Company's financial assets exposed to credit risk amounted to the following:

^{*}Fund was launched 2 December 2019

Transferable securities in the above tables contain equities which are not directly subject to credit risk, which include UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund EUR149,365,600 (2019: EUR159,977,392), UBS (Irl) Investor Selection - Global Equity Long Short Fund EUR68,148,417 (2019: EUR57,665,526), UBS Global Emerging Markets Opportunity Fund USD2,561,399,451 (2019: USD1,666,688,649) and A&Q Fundamental US Equity Long Short UCITS USD8,373 (2019: USDNil).

Substantially all of the assets held by the Company are held by J.P. Morgan Bank (Ireland) plc, the Depositary (the parent company J.P. Morgan Chase Bank N.A has a Credit rating of Aa1 at Moody's). Bankruptcy or insolvency by J.P. Morgan Bank (Ireland) plc may cause the Company's rights with respect to the assets held by J.P. Morgan Bank (Ireland) plc to be delayed or limited. The Company monitors its risk by monitoring the credit ratings of J.P. Morgan Chase Bank N.A on a monthly basis, as reported by Standard and Poor's, Moody's or Fitch.

The Company will be exposed to the credit risk of the Depositary or any depository used by the Depositary regarding the cash balances held in unsegregated accounts with same. In the event of insolvency or bankruptcy of the Depositary or any depository used by the Depositary, the Company will be treated as a general creditor.

9. Financial instruments and associated risks (continued)

(b) Credit risk (continued)

The risk that counterparties to both derivative and other instruments might default on their obligations is monitored on an ongoing basis. To manage the level of credit risk, the Company deals with counterparties of good credit standing as per credit rating agencies such as Moody's.

The below table states the counterparties used by the Company and also states the collateral and collateral type held by counterparty for the sub-funds in relation to out of the money positions.

Offsetting and amounts subject to master netting agreements.

None of the financial assets and liabilities are offset in the Statement of Financial Position. The disclosures set out in the table below include the financial assets and liabilities that are subject to master netting arrangements.

The ISDA does not meet the criteria for offsetting in the Statement of Financial Position. This is because the Company and its counterparties do not intend to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

The financial assets and liabilities in the below table are subject to offsetting, enforceable master netting arrangements and similar agreements:

(c) Liquidity risk

The Company's liquidity and cash flows are related to its market risks. Liquidity and cash flow risk may result from a significant decline in the market value of investments. The performance of the Company will therefore depend in part on the ability of the Investment Manager to anticipate and respond to such fluctuations in market interest rates and to utilise appropriate strategies to maximise returns while attempting to minimise the associated risks. The Company's constitution provides for daily creation and cancellation of shares and it is therefore exposed to the liquidity risk associated with meeting shareholder redemptions at any time.

The Company invests in futures, options, and in a number of financial derivative instruments including but not limited to: credit default swaps, interest rate swaps, swaptions, currency swaps and total return swaps which are not exchange traded.

Financial liabilities of the Company comprise of investments in financial derivative instruments, redemptions payable, amounts due to broker, accounts payable and accrued expenses and net assets attributable to holders of redeemable participating shares. Investments in financial derivative instruments, redemptions payable, amounts due to broker, accounts payable and accrued expenses are typically settled within 30 days to 1 year from the transaction date.

The total net asset value (NAV) of the Company is considered to be a liability of the Company as investors may choose to redeem part or all of their outstanding shares at any time.

The total NAV of the Company is considered to be a liability of the Company as investors may choose to redeem part or all of their outstanding shares at any time. The carrying value of liabilities is the same as the contractual cash flow being short term in nature (except for the liabilities at FVTPL).

(d) Operational risk

The primary responsibility for the development and implementation of controls over operational risk rests with the Board of Directors. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- requirements for appropriate segregation of duties between various functions, roles and responsibilities;
- requirements for the reconciliation and monitoring of transactions;
- compliance with regulatory and other legal requirements;
- documentation of controls and procedures;
- requirements for the periodic assessment of operational risk faced, and the adequacy of controls and procedures to address the risks identified;
- contingency plans;
- ethical and business standards; and
- risk mitigation, including insurance if this is effective.

The Directors' assessment over the adequacy of the controls and processes in place at the service providers with respect to operational risk is carried out via regular discussions with the service providers and a review of the service providers' SOC 1/ISAE 3402 reports on the internal controls, if available.

Substantially all of the assets of the Company are held by J.P. Morgan Bank (Ireland) plc. Bankruptcy or insolvency of the Company's Depositary may cause the Company's rights with respect to the securities held by the Depositary to be delayed or limited.

The Manager monitors credit ratings and the capital adequacy of its depositary and reviews the findings documented in the SOC 1/ ISAE 3402 report on the internal controls annually.

The Company has provided the Depositary a general lien over the financial assets held in custody for the purpose of covering the exposure from providing depositary services. The general lien is part of the standard contractual terms of the custody agreement.

9. Financial instruments and associated risks (continued)

(e) Capital management

The Company is required to maintain a minimum capital requirement of EUR300,000, or its foreign currency equivalent. If redemptions or decreases in the value of the Company's investment portfolio cause the value of the share capital to fall below the equivalent of EUR300,000, the Board of Directors will make a decision to seek the termination of the Company, the return of assets to shareholders and the revocation of the Company's authorisation.

The Administrator will notify the Board of Directors if during any particular month, the net asset value of the Company falls below this level. As soon as the Board of Directors becomes aware that the capital of the Company is below the required level, the Board of Directors will inform the Depositary and the Central Bank.

(f) Leverage

The Company may be leveraged. The use of leverage creates special risks and may significantly increase the Company's investment risk. Leverage creates an opportunity for greater yield and total return but, at the same time, will increase the Company's exposure to capital risk and interest costs.

Any investment income and gains earned on investments made through the use of leverage that are in excess of the interest costs associated therewith may cause the net asset value of the shares to increase more rapidly than would otherwise be the case. Conversely, where the associated interest costs are greater than such income and gains, the net asset value of the shares may decrease more rapidly than would otherwise be the case.

(g) Depositary

The Company has appointed J.P. Morgan Bank (Ireland) plc as depositary of all of its assets pursuant to the custodian agreement.

In accordance with and subject to the depositary agreement, the Depositary provides safe custody for all the assets of the Company under the control of its custodial network. The Depositary will be obliged, inter alia, to ensure that the issue and repurchase of shares in the Company is carried out in accordance with the relevant legislation and the Articles of Association. The Depositary will carry out the instructions of the Company unless they conflict with the UCITS Regulations or the Articles of Association. The Depositary is also obliged to enquire into the conduct of the Company in each financial year and report thereon to the shareholders.

(h) Use of derivative instruments

Each sub-fund may invest in derivative instruments. The types and degrees of risk vary depending upon the characteristics of the particular instrument and the assets of a Company as a whole. Use of these instruments may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large impact on a Company's performance.

(i) Involvement with unconsolidated structured entities

The Company has concluded that listed open-ended investment funds in which it invests, but that it does not consolidate, meet the definition of structured entities because of contractual cash flows being short term in nature. The following funds hold investments in open ended money market funds.

		Market Value	Total Assets of	% of Total

10. Taxation

The Company is an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997. Therefore, the Company is not liable to tax in respect of its income and gains, other than on the occurrence of a chargeable event.

Generally a chargeable event arises on redemption, repurchase, cancellation, transfer of shares or the ending of a 'Relevant Period'. A 'Relevant Period' is an eight year period beginning with the acquisition of the shares by the Shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A gain on a chargeable event does not arise in respect of:

- (i) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another Company; or
- (iii) certain exchanges of shares between spouses and former spouses; or
- (iv) an exchange of shares representing one Fund for another Fund of the Company; or
- (v) shareholders who are neither Irish resident nor Irish ordinarily resident for tax purposes at the time of the chargeable event and who have provided the Company with a relevant declaration to that effect; or
- (vi) certain exempted Irish tax resident Shareholders who have provided the Company with the necessary signed statutory declarations.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event

There were no chargeable events for the year under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its Shareholders.

11. Segregation of liabilities between sub-funds

As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, the Company is a single legal entity which may operate or have assets held on behalf of or be subject to claims in other jurisdictions (such as the United Kingdom) which may not necessarily recognise such ring-fencing and, in such circumstances, the assets of one sub-fund may be exposed to the liabilities of another.

Shareholders who choose or are obliged under local regulations to pay or receive subscription or redemption monies or dividends via an intermediate entity rather than directly to or from the Administrator (e.g. a Paying Agent in a local jurisdiction) bear a credit risk against that intermediate entity with respect to (a) subscription monies prior to the transmission of such monies to the Administrator for the account of the Company, and (b) redemption monies payable by such intermediate entity to the relevant Shareholder.

12. Cross investments

There were no cross investments made by the sub-funds during the year.

UBS (Irl) Investor Selection - Currency Allocation Return Strategy

13. Fees and expenses

The aggregate fees of the Investment Manager and the Administrative Costs (being, generally, the fees of the Manager, the Depositary and the Administrator together with all custody and transaction costs, auditors' fees, legal fees, registration fees and Directors' fees) equal the percentage of the Net Asset Value of the sub-fund as set out in the table below:

13. Fees and expenses (continued)

Manager and Investment Manager's fees

The Company has appointed UBS Asset Management (UK) Ltd. as an Investment Manager for UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund and UBS (Irl) Investor Selection - Global Equity Long Short Fund. The Company has appointed UBS Asset Management Switzerland AG and UBS Asset Management (Singapore) Ltd. as Investment Managers for UBS (Irl) Investor Selection - Currency Allocation Return Strategy and UBS Global Emerging Markets Opportunity Fund, respectively. The Company has appointed UBS Hedge Fund Solutions LLC as an Investment Manager for A&Q Fundamental US Equity Long Short UCITS. All appointments are in accordance with the relevant Investment Manager Agreement. The fees are accrued daily and payable monthly in arrears out of the assets of the Company with properly vouched expenses.

UBS Fund Management (Luxembourg) S.A. was appointed as Manager of the Company. The Manager is paid out of the aggregate fee rates listed on previous page. The fees charged per sub-fund are as follows:

30 September 2020

^{*}The crystallisation point for performance fees for UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund and UBS (Irl) Investor Selection - Global Equity Long Short Fund is 30 September. The crystallisation point for performance fees for UBS Global Emerging Markets Opportunity Fund is 31 December. Therefore, the performance fees payable by UBS Global Emerging Markets Opportunity Fund amount are not yet actually payable as at 30 September.

^{**}Fund was launched 2 December 2019

13. Fees and expenses (continued)

Performance fees (continued)

The Performance fees will be calculated and accrued as at each Valuation Point. The Performance fees will be calculated in respect of each financial year (a "Calculation Period"). However, the first Calculation Period in respect of any Class of Shares will be the period commencing on the Business Day immediately following the close of the Initial Offer Period for that Class and ending on 30 September in that same year. The first value used in determining the first Performance fees shall be the Initial Price.

Administration fees

The Company and/or the Manager, on behalf of the Company, shall pay to the Administrator out of the assets of the Company an annual fee, accrued at each valuation point and payable quarterly in arrears at a rate which shall not exceed 0.075% per annum of the net asset value of each sub-fund (before calculation of the Investment Manager's fees, Manager fees or the Administration fees) subject to a minimum annual fee of EUR60,000 (plus VAT, if any thereon) per sub-fund and to a fee of EUR3,000 plus VAT, if any, in respect of the preparation by the Administrator of each set of financial statements required to be prepared in respect of the Company.

The Administrator shall also be entitled to be repaid out of the assets of the Company all of such government or similar fees (including but not limited to filing fees and annual return fees to the extent payable by the Administrator), charges, taxes, duties and imposts whatsoever levied on or in respect of the Company or business of the Company as it may properly pay.

The fees and charges of the Administrator are subject to variation and renegotiation from time to time provided that any increase in the Administrator's fee is subject to prior notification to Shareholders.

13. Fees and expenses (continued)

Directors' fees

The Constitution authorise the Directors to charge a fee for their services at a rate determined by the Directors. All Directors other than non-executive Directors receive zero fees. Gavin Byrnes is an employee of the Investment Manager. The fees of any Director in any accounting period shall not in any event exceed EUR50,000 (plus VAT, if any) without the approval of the Board. Any increase in Directors' remuneration above that figure will be notified in advance to Shareholders and Shareholders will be given sufficient time to redeem their Shares prior to the implementation of any such increase. All Directors will be entitled to reimbursement by the Company of expenses properly incurred in connection with the business of the Company or the discharge of their duties.

During the year ended 30 September 2020, the Directors charged fees of EUR81,000 (2019: EUR77,000) for UBS (Irl) Investor Selection PLC. At 30 September 2020, EUR81,000 (2019: EUR77,000) was payable. Fee charged by the Director of the Company, John Donohoe, for provision of Money Laundering Reporting Officer ("MLRO") and Beneficial Ownership Services was EUR4,375.

Auditor fees

During the year ended 30 September 2020, the auditor's charged statutory audit fees of EUR53,000 (2019: EUR67,625) to the Company. At 30 September 2020, EUR53,000 (2019: EUR67,625) was payable. During the year ended 30 September 2020, the auditor's charged other non-audit services fees (tax advisory) of EUR27,049 (2019: EURNil) to the Company.

^{*}General & operating fee is composed of the Depositary and the Administrator together with all custody and transaction costs, auditors' fees, legal fees, registration fees and Directors' fees. The Investment Managers have undertaken to limit the general & operating expenses attributable to each class of share, as set out at the beginning of this note, for each sub-fund and for each share class that has launched. Each figure is expressed as a percentage per annum of the net assets of the particular share class. The general & operating expenses accrue daily and are generally paid monthly in arrears. To achieve this, the relevant Investment Manager absorbs, either directly by waiving a portion of its Investment Management fee or by reimbursement to the account of the relevant class of the sub-fund, any general & operating expenses over the applicable limit that may arise.

^{**}Fund was launched 2 December 2019

14. Accounting estimates and judgments

As indicated in Note 2(e) many of the Company's financial instruments are measured at fair value in the Statement of Financial Position and it is usually possible to determine their fair values within a reasonable range of estimates. For the majority of the Company's financial instruments, quoted market prices are readily available.

Fair value estimates are made at a specific point in time, based on market conditions and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgement (e.g., interest rates, volatility, estimated cash flows etc.) and therefore, cannot be determined with precision.

15. Transaction Costs

The below table shows the transaction costs incurred by the sub-funds during the year. The equity costs comprise trade commissions and miscellaneous trade fees required at a country level and are charged separately from the trade price. The derivative transaction costs comprise of future and option commissions that are charged separately from the trade price and also swap trade fees that are included in the trade price.

	Equities	Derivatives	Total
UBS (Irl) Investor Selection PLC - Currency Allocation Return Strategy - GBP	-	-	-
UBS (Irl) Investor Selection PLC - Equity Opportunity Long Short Fund - EUR	666,402	57,597	723,999

UBS (Irl) Investor Selection PLC - USD	4,346,844	92,486	4,439,330

16. Portfolio Turnover Rate ("PTR")

The portfolio turnover rate is calculated by adding total purchases and sales, subtracting total subscriptions plus total redemptions and dividing the total by the average of net assets during the period under review.

The portfolio turnover statistics are the following for the period under review:

	30 September	30 September
	2020	2019
UBS (Irl) Investor Selection - Currency Allocation Return Strategy	102.79%	27.07%
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund	284.37%	149.64%
UBS (Irl) Investor Selection - Global Equity Long Short Fund	240.22%	93.96%
UBS Global Emerging Markets Opportunity Fund	35.37%	4.66%
A&Q Fundamental US Equity Long Short UCITS	42.86%	-

17. Distributions

No distributions were made during the year ended 30 September 2020 (2019: Nil).

18. Stock lending

The Company did not engage in any agreement to lend securities in its portfolio in exchange for a fixed rate of interest.

19. Related parties

- (a) Gavin Byrnes is a Managing Director Head of Alternative Products for UBS Asset Management, an entity within the UBS Group. He was appointed as a Director of the Company.
- (b) No present Director has any interests beneficial or non-beneficial in the share capital of the Company. Fees paid to the Directors, including John Donohoe's fee for provision of MLRO and Beneficial Ownership Services, are disclosed in Note 13.
- (c) The Company's investment in related companies are shown below:

The fees charged by the Manager and the Investment Managers, who are affiliated to the Investment Manager and forms part of the UBS group of companies, are disclosed in Note 13. The Investment Managers have undertaken to limit the general & operating expenses attributable to each class of share, as set out at the beginning of Note 13, for each sub-fund and for each share class that has launched. Each figure is expressed as a percentage per annum of the net assets of the particular share class. The general & operating expenses accrue daily and are generally paid monthly in arrears. To achieve this, the relevant Investment Manager absorbs, either directly by waiving a portion of its Investment Management fee or by reimbursement to the account of the relevant class of the sub-fund, any general & operating expenses over the applicable limit that may arise.

The fees charged by the Swiss Representative, Swiss Paying Agent and Distributor, who are affiliated to the Investment Manager and form part of the UBS group of companies, are part of general & operating fee amount.

20. Commitments and contingent liabilities

As at 30 September 2020, the Company did not have any significant commitments or contingent liabilities (2019: Nil).

21. Net asset value reconcilation

IAS 38 "Intangible Assets" ("IAS 38") states that organisational costs should be expensed immediately and not capitalised in the Statement of Financial Position.

The impact of IAS 38 at A&Q Fundamental US Equity Long Short UCITS net asset value at 30 September 2020 is detailed in the tables on next page which show the reconciliation between the net assets as reported at 30 September 2020 and net assets determined in accordance with IFRS and the net asset value per redeemable participating share as reported at 30 September 2020 and the net asset value per redeemable participating shares determined in accordance with IFRS.

21. Net asset value reconciliation (continued)

22. Significant events during the reporting period

The following classes were launched on UBS Global Emerging Markets Opportunity Fund:

Class (EUR) Q-acc was launched as at 2 December 2019;

Class (USD) I-A3-PF-acc was launched as at 5 February 2020;

Class (EUR dist) I-A3-acc was launched as at 28 July 2020; and

Class (EUR) I-A3-acc was launched as at 28 July 2020.

The following classes were launched on UBS (Irl) Investor Selection - Currency Allocation Return Strategy:

Class (GBP) I-A3-acc was launched as at 8 June 2020; and

Class (EUR hedged) I-B-acc was launched as at 22 July 2020.

MFD Secretaries Limited, an entity in the Maples Group, was appointed as Company Secretary to the Company on 25 October 2019.

A new sub-fund, A&Q Fundamental US Equity Long Short UCITS was approved by the Central Bank of Ireland on 29 November 2019 and launched on 2 December 2019. This sub-fund seeks to deliver a positive relative return versus traditional US Equity Long Short strategy benchmarks, over a three to five year time frame.

KPMG resigned as auditor and was replaced by Ernst & Young with effect from 5 February 2020.

A new prospectus was issued on 30 April 2020 in relation to updates of the Company Secretary and Registered Office.

Maples and Calder resigned as legal adviser to the Company and was replaced by Dechert LLP from 28 July 2020.

Following the decision by the people of the United Kingdom to leave the European Union, there remains uncertainty about the relationship between the United Kingdom and the European Union post "Brexit". The impact of this uncertainty extends to the financial services market within which the Company operates. As at the date of these financial statements, the Directors of the Company continue to monitor the situation as it develops as well as the impact on the Company.

In March 2020, the World Health Organisation declared the outbreak of COVID-19 to be a Pandemic. Although progress has been made towards the end of 2020 in managing this Pandemic, including through the continuing development of vaccines, it remains uncertain for how long and how severe the Pandemic will continue to globally and regionally impact the economy. This raises continuing uncertainties in relation to the volatility of asset prices of the fund and the valuation of assets covered in this report. The Board of Directors and the Investment Managers continue to monitor the management of the Pandemic by governments and hence the economic impact on the portfolio and the Company itself. There is no evidence that the 'going concern' assumption made by the Board of Directors when preparing the financial statements of the Company is inappropriate.

There were no other events during the year that require adjustment to or disclosure in the financial statements.

23. Subsequent events

Effective from 10 November 2020, John Donohoe, Eimear Cowhey and Adrian Waters resigned as Directors of the Company. From the same date, Claire Cawley, Naomi Daly and Thomas Stokes have been appointed as Directors of the Company.

23. Subsequent events (continued)

Subsequent to the year ended 30 September 2020 and until approval of these financial statements by the Board, the Company incurred the following net subscriptions and redemptions:

UBS (Irl) Investor Selection - Currency Allocation Return Strategy
UBS (Irl) Investor Selection - Equity Opportunity Long Short Fund
EUR (3,784,699)
UBS (Irl) Investor Selection - Global Equity Long Short Fund
EUR (9,965,600)
UBS Global Emerging Markets Opportunity Fund
USD 162,517,521
A&Q Fundamental US Equity Long Short UCITS
USD (3,000,046)

There were no other events after the year-end that require adjustment to or disclosure in the financial statements.

24. Approval of financial statements

The accounts were approved by the Board on 22 January 2021.

Soft commissions

The Investment Manager may make use of arrangements to enable it to obtain execution and research services which are beneficial to the sub-funds, both from counterparties and third parties. All transactions undertaken and the services provided under these arrangements in respect of the sub-funds will be subject to Financial Conduct Authority rules and to the fundamental rule of providing best execution to the sub-funds, being the best price available in the market, exclusive of any charges, but taking into account any exceptional circumstances such as counterparty risk, order size or client instructions.

There were no soft commissions arrangements during the year ended 30 September 2020.

Foreign exchange rates

The following foreign exchange rates were used to translate assets and liabilities into the reporting currency USD at 30 September 2020 and 2019.

Remuneration Disclosure

The Board of Directors of UBS Fund Management (Luxembourg) S.A. has adopted a remuneration policy (the "Policy") whose objectives are:

on one hand, to ensure that the remuneration framework is in line with the applicable laws and regulations, and more specifically with provisions defined under:

- (i) the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment in Transferable Securities as amended from time to time (the "UCITS Law") transposing the UCITS Directive 2009/65/EC (the "UCITS Directive") as amended by Directive 2014/91/EU (the "UCITS V Directive"),
- (ii) the Alternative Investment Fund Managers Directive ("AIFMD") 2011/61/EU, transposed into the Luxembourg AIFM Law dated from 12 July 2013, as amended from time to time,
- (iii) the ESMA's guidelines on sound remuneration policies under the UCITS Directive ESMA/2016/575 and ESMA's guidelines on sound remuneration policies under the AIFMD ESMA/2016/579 both published on 14 October 2016 and
- (iv) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector issued on 1 February 2010;
- (v) the Directive 2014/65/EU on markets in financial instruments (MiFID II);
- (vi) the Commission Delegated Regulation 2017/565/EC of 25 April 2016 supplementing Directive 2014/65/EU (MiFID II Level 2);
- (vii) the CSSF Circular 14/585, transposing the ESMA Guidelines 2013/606 on remuneration policies and practices (MiFID ESMA Guidelines);

and on the other hand, to comply with the UBS AG Remuneration policy framework. The Policy is meant not to encourage excessive risk taking, to contain measures to avoid conflicts of interest, to be consistent with, and promote, sound and effective risk management and to be consistent with the UBS Group business strategy, objectives and values.

Further information in relation to UBS AG Remuneration Policy is available in the UBS Group AG Annual Report and in the Compensation report.

More details about the remuneration policy of the Management Company, which describes, but not limited to, how remuneration and benefits are determined, are available at http://www.ubs.com/lu/en/asset_management/investor_information.html.

The Policy is subject to an annual review by the control functions of the Management Company after review and update by the Human Resources department; and is approved by the Board of Directors. Last approval by the Board of Directors took place on 20 September 2019. No material changes were made to the Policy.

Application of the requirements and remuneration disclosure

In accordance with the Article 151 of the UCITS Law, the Management Company is required to disclose at least annually certain information concerning its remuneration policy and the practices for its identified staff.

The Management Company complies with the aforementioned regulatory provisions in a way and to the extent that is appropriate to its size, internal organisation and the nature, scope and complexity of its activities.

Considering the total size of funds under management, both UCITS and AIFs although a significant portion is not complex or risky investment, UBS Fund Management (Luxembourg) S.A. judges that the proportionality principle may not be applicable at the level of the Company but at the level of the Identified staff.

By application of the proportionality principle for the Identified staff, the following requirements on pay-out processes for Identified staff are not applied:

- The payment of variable remuneration in instruments related mainly to the funds in relation to which they perform their activities;
- Deferral requirements;
- Retention periods;
- Incorporation of ex-post risk factors (i.e. malus or clawback arrangements).

Application of the requirements and remuneration disclosure (continued)

The deferral requirements remain however applicable when the employee's total annual compensation is exceeding the threshold defined under the UBS Group Compensation Framework; the variable compensation will be treated in line with the plan rules defined under the UBS Group Compensation Framework.

Remuneration disclosure

Due to the roles of Management Company staff, the below disclosed remuneration was calculated in proportion of the net assets of the Fund out of the net assets of all the funds under the governance of UBS Fund Management (Luxembourg) S.A. (including both AIF and UCITS funds).

For the fiscal year ending 31 December 2019, the proportional remuneration (fixed and variable) paid by UBS Fund Management (Luxembourg) S.A. to its entire staff amounted to EUR 96,916, of which EUR 5,297 represented the variable remuneration. The Management Company employed an average of 45.1 staff (full time equivalent) during this period.

The proportional remuneration (fixed and variable) paid by the Management Company to its Identified staff amounted to EUR 42,708, of which EUR 3,084 represented the variable remuneration (20 beneficiaries).

Remuneration disclosure of delegates

For the year ending 31 December 2019, the aggregate total remuneration paid by all Investment Managers to their Identified staff in relation to the Fund amounted to EUR1,169,682 of which EUR1,016,991 represented the variable remuneration (11 beneficiaries).

Securities financing transactions regulation

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on 12 January 2016 and, amongst other requirements, introduces new disclosure requirements in the Company's financial statements published after 13 January 2017 detailing the sub-fund's use of securities financing transactions and total return swaps. As a result, additional disclosures have been included in this appendix.

Below is the market value of assets engaged in securities financing transactions as at 30 September 2020. The assets which are engaged in securities financing transactions at this date are total return swaps, in the form of Contracts for Difference ("CFDs"). The Funds do not engage in securities lending, or repo transactions.

Below is the market value of assets engaged in securities financing transactions as at 30 September 2020 based on a commitment amount of EUR11,410,304 in absolute terms.

Fund Name	Amount EUR	% of net assets as at 30 September 2020
