

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

db x-trackers LevDAX® Daily ETF

Share Class: 1C (ISIN: LU0411075376), (WKN: DBX0BZ), (Currency: EUR)

a sub fund of db x-trackers. The Fund is managed by DB Platinum Advisors, part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the LevDAX® index which provides two times the performance of the DAX® index on a daily basis less a rate of interest. This means that the level of the Index should rise and fall at double the rate of the reference index. The interest rate deducted from the Index level is based on the rate at which banks in the Eurozone lend to each other overnight (as calculated by the European Central Bank).

The reference index reflects the performance of the shares of 30 of the largest and most actively traded German based companies on the Frankfurt Stock Exchange. To be included on the reference index, a company's readily available shares must be continuously traded and represent at least 5% of all readily available shares on

the Stock Exchange. The reference index is weighted in favour of larger companies and is reviewed and rebalanced at least annually. At each review, the combined value of a company's readily available shares cannot exceed 10% of the combined value of the shares of all companies comprising the reference index.

To achieve the aim, the Fund will enter into a financial contract (derivative) with Deutsche Bank to swap most subscription proceeds for the return on the Index.

No dividends will be paid on your shares.

You may redeem your shares on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 7 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as promoter, distributor, derivative counterparty and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund is neither sponsored nor promoted, distributed or in any other manner supported by Deutsche Börse AG (the "DBAG"). Neither the publication of the Index by DBAG nor the granting of any right to use the Index, represents a recommendation by DBAG of the Fund. DBAG has solely granted to the issuer of the fund the utilization of the Index Data and the Index Trademark as well as any reference to the Index Data and the Index Trademark in connection with the Fund.

The Index is constructed to track the performance of a leveraged position on the reference index. The Index is designed to do this on a daily basis only which should not be equated with seeking a leveraged position for periods longer than a day. The performance of the Fund over periods longer than one day will not be correlated or symmetrical with the returns of the reference index. The Fund is intended for institutional investors who wish to take a very short term view on the reference index e.g. for day trading purposes. The Leveraged Daily Index risk factor is for leveraged daily ETFs.

The financial contract (known as a derivative) used to gain exposure to the Index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs associated with the counterparty's hedging position. These index replication costs may lead to your investment suffering losses.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

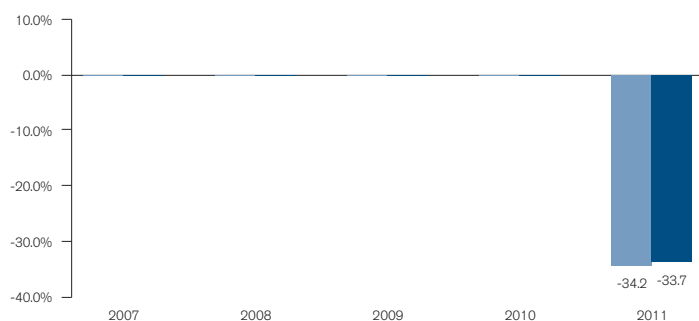

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.
Entry charge*	3.00%	
Exit charge*	3.00%	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		The ongoing charges figure is based on expenses for the year ending October 2011. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.
Charges taken from the Fund over a year		More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.
Ongoing charges	0.35%	
Charges taken from the Fund under certain specific conditions		* or EUR 25,000 whichever is the higher.
Performance fee	None	

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2010 and the share class was launched in 2010.

Past performance has been calculated in EUR.
